Mean earth temperature at 1 ft., 46.4°; and at 3 ft., 47.6°. Number of rain days, 26, being only once exceeded, in 1886. Total rainfall, 144 per cent. above normal, making it the wettest August ever experienced.

NOTE.—Hail fell on three occasions; there were two fogs; and frosts occurred on four mornings.

NOTES ON THE WEATHER FOR AUGUST, 1941.

General Notes.—August was a month of cool, unsettled weather with frequent rain. Young stock suffered from the wet conditions and the lack of sunshine, losses of ewes and lambs occurring in Wellington and Canterbury where the rainfall was heaviest.

Rainfall totals were mainly in excess. For Wellington and Christchurch cities it was the wettest August for which records are available, and the same is true of many stations in the South Wellington and Canterbury Provinces.

Temperatures.—Mean temperatures were below normal, departures being mainly two or three degrees in Wellington and in eastern and southern districts of the South Island, but only about one degree elsewhere.

Sunshine.—Except in Auckland, Westland, and Southland Provinces, sunshine figures were poor, and several stations, including Wellington, Blenheim, and Dunedin, established new minimum records for August.

Weather Sequence.—Cold southerly winds prevailed at the opening of the month, with showery periods in eastern and northern districts and some snow in the high country. By the 4th, when an anticyclone was over New Zealand, fine conditions became almost general.

A small anticyclone became centred to the south-east of New Zealand on the 11th while pressure was low to the west, so that north-easterly winds gradually prevailed and rain slowly extended southwards over most of the country.

Pressure continued low to the east but rose in the south and north. By the 23rd the weather was fine over the South Island and, after a few showers between Cape Palliser and Gisborne, it became fine generally.

An extensive depression from the Central Tasman Sea moved towards New Zealand on the 26th, with the result that widespread rain occurred over the North Island and extended to most of the South.

The total estimated quantity of timber in cubic feet is 254,800, or in board feet 1,559,000, made up as follows:—

Species.	Cubic Feet.	Board Feet.
Rimu	254,800	1,559,000

Upset price: £1,500.

Time for removal: Two years.

Terms of Payment.

Terms and Conditions.

1. All instalment-payments shall be secured by "on demand" promissory notes made and endorsed to the satisfaction of the Commissioner of State Forests, and interest at the rate of 1 per cent. per annum in excess of current bank overdraft rates will be charged on all notes overdue from the date of maturity to the date of payment.

2. The right to cut and remove the timber will be sold in accordance with the provisions of the Forest Act, 1921-22, the regulations in force thereunder, and these conditions.

3. The aforementioned qualities, quantities, and kinds as to the said timber shall be taken as sufficiently accurate for the purposes of this sale, and no contract for the purchase shall be voidable, nor shall the successful purchaser be entitled to any abatement in price, by reason of the said timber being of less quantity, quality, or kind as stated herein or in any advertisement having reference to the said timber.

6. Intending tenderers are expected to visit the locality and to satisfy themselves in every particular on all matters relative to the sale.

7. Each tenderer must state the total price that he is prepared to pay for the timber. The highest or any tender will not necessarily be accepted, and the timber described is submitted for sale subject to the final acceptance of the tender by the Commissioner of State Forests.
