*New Zealand Schools of Mines.—Rules Governing Scholarship Examinations*

Mines Department,  
Wellington, 24th June, 1946.

SIX scholarships will be offered annually for competition by students attending Schools of Mines within the Dominion—three for the South Island and three for the North Island.

2. The scholarships will be tenable for four years at the University of Otago and will be of an annual value of £85 each to successful candidates who, while attending the classes at the University of Otago, have to reside away from their homes, and of £45 each to successful candidates who are able to reside at their homes while attending the University classes.

3. Holders of scholarships will be required to attend during the University session at the University of Otago (no class fees will be charged on subjects contained in the curriculum of the Otago School of Mines), and during the long recess will also be required to engage in approved practical work at one of the mines or batteries in the Dominion, or in the field with the New Zealand Geological Survey Department.

4. Qualifying examinations for scholarship candidates will be held in or about the month of November in each year on such days and at such centres as the Under-Secretary of the Mines Department may appoint.

5. The examination will embrace six of the following subjects, the scope and standard of which are prescribed in the syllabus of the New Zealand Schools of Mines:—

- (1) Mathematics.
- (2) Elementary Mechanics.
- (3) Theoretical Chemistry.
- (4) Practical Chemistry and Quantitative Analysis.
- (5) Electricity.
- (6) Geometrical and Mechanical Drawing.
- (7) General and Mining Geology.
- (8) Metallurgy of Gold and Silver.
- (9) (a) Coal-mining; or (b) Metal-mining.
- (10) Winding, Haulage, and Pumping.
- (11) Ventilation.
- (12) Land and Mine Surveying.

Three subjects—namely, Mathematics, Electricity, and either Elementary Mechanics or Theoretical Chemistry—will be compulsory for all candidates.

6. The scholarships will be awarded to those candidates who, having complied with the prescribed conditions, obtain the highest total marks in three compulsory subjects and three optional subjects, but no scholarship shall be awarded to any candidate unless he has obtained not less than 60 per cent. of the marks in each of these six subjects.

7. The examination may be passed as a whole or in sections, and shall be open to all students attending Schools of Mines who are not less than sixteen years of age on the 1st day of November of the year in which the examination is held: Provided that no student, unless granted exemption under the next succeeding clause, shall be eligible for examination in any subject unless he has attended regularly at a School of Mines within the Dominion for not less than one year at least 80 per cent. of the lectures in that subject.

8. The Minister of Mines may grant such exemption from the requirements of the last preceding clause as he thinks reasonable in any case where it was not practicable for a student to attend 80 per cent. of the lectures in a subject in which he desires to be examined,

or where no lectures were held in any such subject at the School of Mines at which he was a student, or where the Minister is satisfied on the certificate of a Director of a School of Mines that a student has, either prior to or during his attendance at a School of Mines, completed a satisfactory course of study in any such subject at some other institution.

9. The power of waiver exercisable under the last preceding clause shall be so exercised that no student shall be eligible to sit the examination unless he has attended the lectures prescribed by clause 7 in at least four subjects.

10. In order to qualify for a partial pass in the examination a candidate must obtain not less than 60 per cent. of the marks in each of four subjects. The remaining two subjects may be passed separately provided the whole examination is concluded not later than the second examination succeeding the examination at which the candidate passed the first section.

11. No payment on account of any scholarship will be made until the whole examination is passed and the candidate commences his studies at the University of Otago.

12. Every candidate must make application to sit the examination to the Under-Secretary of the Mines Department at Wellington not later than the 1st day of November preceding the examination.

Such application must state the branch of mining the candidate intends to take up and the subjects in which he desires to be examined, and must be accompanied by a fee of £1 and a certificate from the Director of a School of Mines stating the number of lectures which the candidate has attended in each subject.

Candidates who elect to pass the examination in sections as provided by clause 7 must make separate applications for examination in respect of each section, and each application must be accompanied by a fee of £1 and a certificate of attendance from the Director of a School of Mines.

13. Candidates must present themselves for examination on the days fixed, as provided in clause 4 hereof.

14. The Minister of Mines retains to himself the right to cancel any scholarship should the holder attend irregularly or be reported for idleness or bad conduct, and may, if he considers it reasonable or necessary, hold any scholarship over for such period as he thinks fit.

15. There will be refunded by the Mines Department to holders of scholarships having to pay more than £5 for the return railway (second-class), steamer, or motor-service fares to Dunedin any excess over the sum of £5, but such refund will only be made once in each year. Refunds of motor-service fares will be made only in cases where neither steamer nor railway transport is available or where the cheapest form of transport is by motor-service. Receipts for each fare paid in excess of 5s. (other than railway fares) must accompany each application for a refund.

16. These rules supersede the regulations of 17th June, 1941, published in the *New Zealand Gazette* of the 26th June, 1941, at page 2032.

ENGINEERS REGISTRATION BOARD OF NEW ZEALAND

LIST OF REGISTERED ENGINEERS AS AT 7TH JUNE, 1946, AND EXPIRING 31ST MARCH, 1947

Explanation

The list is in two parts as follows :—

Part A.—Giving those registered by examination or by “ recognized certificate ” under one of the following subsections of the 1924 Act :—

- 6 (i) a.—Registration by virtue of holding a “ recognized certificate ” in the form of a Diploma of Corporate Membership of one of the British Institutions of Civil, Electrical, or Mechanical Engineers, and of having had not less than three years’ experience in the practice of engineering.
- 6 (i) c.—Registration by virtue of a pass in examinations approved by the Board (being the full associated membership examinations of one of the British Institutions of Civil, Electrical, or Mechanical Engineers, or equivalent exempting examinations), and also of having had not less than three years’ experience in the practice of engineering.

Part B.—Giving those registered under one of the following subsections, now expired, of the 1924 Act or amendments :—

- 6 (i) b of the 1924 Act, which provided for registration during the first period of operation of the 1924 Act of a person who had then attained the age of twenty-five years and had been engaged during a period of not less than six years before the commencement of the Act in the acquisition of professional knowledge, or in the practice of engineering in a manner satisfactory to the Board, and who made application for registration within twelve months after the commencement of the Act.
- 2 (i) of the 1928 amendment, which in effect re-enacted clause 6 (i) b of the 1924 Act with respect to any licensed surveyor in New Zealand who satisfied the Board that he had prior to the coming into operation of the 1924 Act substantial practical experience in engineering as part of his practice or employment whether on his own account or otherwise, and who made application for registration within six months of the passing of the amendment : *Indicated by † in Column 3.*

Section 7 of the 1944 amendment, which provided for the registration of engineers who, within the twelve years prior to the passing of the amendment, had had six years responsible engineering practice, or substantially equivalent experience, in local authority work, and who applied within six months of the passing of the amendment. Provision is made for special consideration to discharged servicemen who apply within six months of their discharge : *Indicated by \* in Column 3.*

Particulars in the lists as entered under each column are as follows :—

Column 1.—This contains the name of each engineer who at the date of the list is the holder of an Annual Practising Certificate issued under section 3 of the 1944 Amendment Act. An engineer who has been registered is required to hold a current Annual Practising Certificate in order to retain the full rights of registration. The qualifications, involving University degrees and recognized certificates or approved examinations, are taken from the person’s application for Practising Certificate and have not been verified or checked against the person’s registered particulars.

Column 2.—This gives the postal address, either business or residential, as on the application for Annual Practising Certificate.

Column 3.—This shows the date of original registration.

Column 4.—This shows the class of engineering in which the Board has accepted the engineer’s training and experience as a qualification for registration. Engineering is classified only in the three main branches of Civil, Electrical, and Mechanical. Where an engineer has not satisfied the Board’s requirements for qualification in one of these main branches, the restrictive or specialist class in which he is accepted is shown.

It is also to be noted that corporate membership of one of the recognized British Engineering Institutions entitles the holder to be styled as a “ Chartered Engineer,” but this information is omitted from the list.

NOTES ON THE WEATHER FOR MAY, 1946

**General.**—Several rather slow-moving depressions to the north and east of the North Island gave a prevalence of easterly or north-easterly winds which brought unsettled conditions to eastern districts, rain being more frequent in the North Island than in the South. Hawke's Bay especially has received great benefit from the soaking rains. As in April, westerlies were not prominent. The mild wet weather in the north has maintained a good late growth, but in the more southern districts where several sharp frosts occurred this has been checked. Humidities have been high, and drying winds would benefit pastures and also the ground for cultivation.

**Rainfall.**—Rainfall totals were above average in eastern and central portions of Auckland, also in Gisborne, Hawke's Bay, and Wellington, as well as near the east coast of the South Island. Deficiencies occurred elsewhere, and Murchison, Reefton, Otira, and Invercargill received barely half their usual rain. Amounts were double the average about coastal Hawke's Bay and from Blenheim to Timaru. Some notable falls were 12·89 in. at Whararata (Cook County) for the three days 22nd–24th; and on the 17th, Kekerangu received 6·43, Clarence 5·26, and Kaikoura 5·09 in.

**Temperatures.**—Mean temperatures were above normal generally, with appreciable departures in northern districts but decreasing towards the south as the result of frosty nights. For the North Island as a whole it was the mildest May since 1928.

**Sunshine.**—The duration of bright sunshine was almost normal in Taranaki and better than average in Westland, Otago, and Southland, but was poor over the remainder of the country. The deficits averaged at least an hour a day in eastern districts from Waihi to Masterton. The last fortnight was very clear west of the Southern Alps, and Haast, with 178·5 hours, had the highest total this month.

**Weather Sequence.**—During the opening days an extensive anticyclone centred near Chatham Islands was moving slowly away, while pressure remained low to the north of the Dominion. Strong north-easterly winds were giving rain at times to the east coast north of Tauranga, but settled conditions prevailed elsewhere. A trough arriving on the 3rd gave heavy rain in the far south-west. After a weak cold front passed late on the 4th, a small wedge moved over the South Island. The area of heavy rain had meantime been moving from the far north down the east coast to southern Hawke's Bay.

The passage of a depression forming on a cold front which began to move north-eastward over the South Island on the 6th was associated with widespread rain.

By the 9th the disturbances were passing off the North Island, and south-westerlies were general. Except for a few showers in the more exposed districts, the weather became fair. A high-pressure ridge was across the North Island on the 12th.

A cold front arriving on the 13th gave some heavy rain in Westland, and behind a secondary the next day an anticyclonic cell moved on to the South Island on the 15th. The two fronts were then giving scattered rains over the North Island, but precipitation became more general on the 16th and later spread to most of the South Island, there being a depression to the north-west while the anticyclone moved away eastward. With a low-pressure area west of Nelson there were some thunderstorms in western districts of the North Island and some heavy easterly rains between Timaru and Cape Campbell on the 17th–18th, but, with the system travelling to the south-east, the 19th was a fair day in most places. An anticyclone was then passing northern New Zealand. This intensified when located to the north-east, and a low in the northern Tasman Sea gradually moved eastward, passing North Cape on the 22nd and continued slowly south-eastward. North-easterly winds were giving scattered rains in the North Island. By the 23rd a fast-moving anticyclone was over southern New Zealand, and winds had become more southerly and strengthened, with considerable rain east of the North Island ranges. As the depression and anticyclone continued eastward the weather was mostly cloudy along the East Coast with patches of rain, especially on the 27th, when a secondary depression was off Canterbury.

The weather on the 28th and 29th was more generally settled, an anticyclone covering New Zealand on the latter day. As it shifted eastwards easterly winds predominated, and scattered showers occurred north of Castlepoint.
