The charges will be increased by one-sixth, but, unless the goods are insured in accordance with the next succeeding subparagraph, the liability of the Department will be limited to £20 for each package or the contents thereof.

(iv) Packages of copper coin which are carried at the risk of the Department and all packages consigned under subparagraph (i) of paragraph (b) of this regulation shall be insured in the manner provided in Regulation 110, and, in particular, the following provisions shall apply :—

If the Department so requires each package shall be opened by and at the expense of the consignor for inspection by an officer of the Department, and shall afterwards be securely closed by the consignor in the presence of such officer.

The charge as provided in Regulation 110 on declared value to be paid for insurance shall be in addition to charges at ordinary parcels rates or double the ordinary parcels rates (as the case may be) for conveyance, increased for railway risk as provided in subparagraph (iii) of this paragraph.

## 70. COMPUTATION OF CHARGES

1. In computing the charges on goods, the following provisions will apply :--

(a) Except as otherwise provided, goods from different consignors to one consignee, or from one consignor to different consignees, will be charged separately.

(b) A package containing different rated commodities will be charged the rate applicable to the highest rated commodity.

(c) Except as otherwise provided, any consignment consisting of two or more commodities chargeable at different rates and forwarded from one consignor to one consignee will be charged separately.

(d) Goods chargeable at Classes C, D, E, and G, or at such rates subject to a percentage increase or decrease, will be subject to a minimum charge as per Regulation 71, or parcels rates, whichever is cheaper.

(e) Timber and/or all goods chargeable on weight consigned from one consigner to one consignee loaded in the same wagon, may be grouped for the purpose of the minimum load per wagon, and the charges at the appropriate local or classified rate may be based on the actual weight of each commodity (minimum charge as per Regulation 71) under the following conditions :--

(i) The total weight charged for will not be less than the highest minimum weight specified for any commodity included in the consignment.

- (ii) When the actual aggregate weight of all the commodities in the consignment is less than the highest minimum weight the weight required to make up the minimum will be charged at the rate applicable to the lowest rated commodity in the consignment.
- (iii) For the purpose of this subparagraph timber will be calculated as 450 superficial feet to the ton.

(f) Where local rates are in operation, and the sum of the charges computed separately at local rates or at local rates and classified rates (as the case may be) is lower than the amount of charges computed at the through classified rate, the lower charges as so computed shall apply.

The following examples are given by way of illustration but are not exhaustive :---

Let A, B, C, and D be stations in that order on a continuous line of railway with local rates in operation between A and B and between B and C respectively.

Case 1. Consignment from A to B or from B to C: Local rate supersedes classified rate in each case.

Case 2. Consignment from A to C would be charged at the cheapest of the following computations :—

(i) Both local rates.

(ii) Either local rate and the classified rate for the balance of the journey.

(iii) The through classified rate.

Case 3. Consignment from A to D would be charged at the cheapest of the following computations :--

(i) Local rate A to B and B to C and classified rate C to D.

(ii) Local rate A to B and classified rate B to D.

(iii) Classified rate A to B, local rate B to C, classified rate C to D.

(iv) Through classified rate A to D.

Let X, Y, and Z be stations in that order on a continuous line of railway with a local rate in operation between X and Z.

A consignment from X to Y would be charged at the cheaper of the following computations :--

(i) Local rate X to Z and classified rate Z to Y,

(ii) Through classified rate X to Y.

#### Computation of Charges--continued

2. Goods Subject to an Increase in Rate.—Where it is prescribed that the rate for any goods will be subject to a percentage or other increase, the appropriate rate will, subject to the following provisions, be so increased :—

- (a) Classes C and D goods subject to a per-centage or other increase chargeable on actual weight at a local rate which exceeds the classified rate
- (b) Goods chargeable on actual cubic measurement

3. Goods Subject to a Reduction in Rate.—Where it is prescribed that the rate for any goods will be subject to a percentage or other reduction, the appropriate rate will, subject to the following provisions, be so reduced :—

- (a) Goods (other than Class D goods) charge-able on weight at a local rate which exceeds the classified rate
- (b) Class D goods chargeable on weight where the local rate exceeds the classified rate
- (c) Goods chargeable on weight at a local rate which does not exceed the classified rate
- (d) Goods chargeable on actual or half cubic measurement at a local rate

- The increase will not apply to the local rate but the charges will not be less than if computed at the classified rate plus the increase.
  - The increase will not apply (except on dangerous goods).

The reduction will apply to the local rate.

- The charges will be computed at the classified rate less the reduction.
- The reduction will not apply to the local rate but the charges will not be greater than if computed at the classified rate less the reduction.
- The reduction will apply to the local rate except in the case of ship's goods on port lines (See Reg. 127, paragraph 2 (b)).

4. Minimum Quantity.—Except as otherwise provided, where a rate is specified as being for a minimum quantity the rate so specified applies only to quantities of not less than the weight specified; but where the charges for the minimum weight specified amount to less than the weight specified is the higher rate prescribed for smaller quantities than the specified minimum, the charges as for the minimum quantity at the lower rate will apply.

5. Alternative Charge.---Wherever an alternative charge is specified, it is intended that the lower charge will be taken, unless otherwise provided.

6. Goods Chargeable on Weight or Measurement.—(a) All goods chargeable on weight will be charged on the actual gross weight (avoirdupois) of the goods when received by the Department for carriage.

(b) When goods are packed for carriage, the weight or measurement of the consignment will include the weight or dimensions of the case or packing used, provided that the charge shall not be less than for such case or packing when consigned alone.

(c) Except when inconsistent with the context or otherwise expressly stated "measurement" means cubic measurement. Whenever charges are based on measurement and are to be computed at a rate per unit of weight, such measurement shall be converted into weight at the rate of 40 cubic feet to the ton.

7. Bogie Wagon Rate.—Except where otherwise specified, a rate per wagon refers to a four-wheeled wagon, and except as aforesaid, a bogie wagon will, in computing charges at a rate per wagon, be charged at twice the rate for a four-wheeled wagon. See also Regulation 106.

8. Insulated Wagons.—Where an insulated wagon is specially ordered and supplied for the conveyance of goods, the charges will be computed on a minimum weight of 30 cwt. in respect of each four-wheeled insulated wagon.

9. Frozen or Chilled Goods Consigned to a Port or Wharf for Export.-The railage or haulage charges as the case may be, will be computed on the following minimum weights :---

					Tons.
Insulated WA wagon	••	••	••		$3\frac{1}{2}$
Insulated W wagon	••	••	••		4
Insulated V or Fv wagon	••	••	••		8
Insulated VB wagon	••	••	••	• •	11

The minimum loads per wagon of frozen or chilled goods will be deemed to be complied with in cases where the total tonnage forwarded by any one consignor for one complete shipment is not less than the total capacity of all the wagons used, based on the prescribed minimum of each wagon. In cases where the Department for its convenience supplies wagons having a total minimum capacity greater than the classes of wagons ordered by the consignor for any one shipment, the charges will be based on the appropriate minimum loads of the classes of wagons ordered.

10. Goods Booked Between Two Separate Sections of Railway.-The charges for each section will be computed separately.

\* Where the charges are computed at the foregoing scale the minimum charge for each consignment will be 6s. 7d.

.

Charges at the foregoing scale will be increased by 50 per cent. in the case of Australian hardwood timber in sizes classified at Class K plus 50 per cent. (vide Regulation 68).

3. (a) Ladders or Small Loads of timber of under 100 superficial feet may be charged on actual weight at Class C, or at parcel rates if cheaper than the charge for timber in small lots

(b) Where two or more ladders are forwarded in one consignment, the charges for each ladder under 100 superficial feet will be computed separately as shown in subparagraph (a) hereof.

4. Less Than Minimum Wagon Loads .- In cases where a wagon does not contain the specified the specified minimum shall be calculated at the lowest rate applicable to any class of timber in the consignment, such rate not to exceed single rate, Class K, and where applicable the provisions of paragraph 2 of this regulation shall apply.

(i) On the actual quantity of timber at the small-lots scale, plus the charge for one check wagon. (ii) On the actual quantity of timber at Class K rates, subject to the minimum load prescribed for a four-wheeled wagon n.o.s., plus the charge for one check wagon.

(b) Where a consignment of timber loaded on a bogie wagon (or a pair of N timber-wagons) also requires a four-wheeled check wagon, the minimum load will be that specified for the bogie wagon used (or a pair of timber-wagons) plus the minimum load for a four-wheeled wagon n.o.s. Lesser quantities will be charged at the total of such minima or, if cheaper, on either of the following alternatives :

(i) On the actual quantity at Class K rates, subject to the minimum load for the bogie wagon (or pair of timber wagons) used, plus the charge for one check wagon.

(ii) On the actual quantity at the small-lots scale, plus the charge for two check wagons.

6. Separate Consignments of timber loaded in the same wagon by different consignors at the one forwarding station and forwarded to one consignee and receiving station may be grouped for the purpose of calculating the minimum load as provided for in paragraph 1 hereof. The same method of charging may be observed in respect of separate consignments of timber loaded in the same wagon from one consignor to various consignees at the same destination station.

In all other cases, each consignment of timber will be charged separately.

7. When Timber is Over 22 ft. in Length, check wagon or wagons may be charged for.

8. In Computing the Charges for Timber, superficial measurements of 5 ft. and over will be calculated to the next 10 ft: and will be charged *pro rata* of the prescribed rate for 100 superficial feet. Superficial measurements of 4 ft. and under will be foregone.

9. Timber Shorts-i.e., pieces not exceeding 6 ft. in length-will be charged on measurement at Class K rate or vide paragraph 2 hereof, except where timber shorts for the purposes specified in Regulation 68 are classified at tonnage rates.

Where the actual weight of timber shorts (chargeable on weight) and shooks cannot be deter-mined by weighing, the weight may be computed on the basis of 450 superficial feet to the ton.

Where alternative rates on weight or superficial measurement are specified in Regulation 68, the measurement should be stated on consignment-notes and charges will be assessed at the appropriate rate on actual weight (or on computed weight if the actual weight is not available) or, if cheaper, on actual measurement at Class K rate (subject in either case to the appropriate wagon minimum).

**Computation of Measurement.**—10. Except where otherwise specified, odd lengths of 6 in. and upwards will be counted as a foot in measuring the length of timber; less than 6 in. will be omitted.

11. Except otherwise specified, in computing the sizes of sawn timber, whether dressed or undressed, fractional parts less than  $\frac{1}{5}$  in. in width or thickness will be reckoned as  $\frac{1}{5}$  in.

12. Sawn timber in pieces not exceeding 7 ft. in length will, except where otherwise provided, be charged at the actual measurement.

13. White pine, 4 in. by  $\frac{7}{6}$  in. or 4 in. by  $1\frac{3}{4}$  in., in lengths of 10 ft 6 in. and 17 ft. 6 in., when consigned to cooperages or freezing-works having cooperages, will be charged at the actual measurement.

14. In computing the measurement of rusticated weatherboards, tongued-and-grooved flooring and lining boards, and all other boards of irregular width and thickness, the full over-all measurement will be charged for—*i.e.*, the board will be taken to measure as if its greatest width and thickness were uniform throughout the entire width and thickness of the board.

15. The superficial measurements of round timber will be computed according to Hoppus' tables of trade measurement as follows (odd lengths of 6 in. and upwards will be counted as a foot in measuring lengths; less than 6 in. will be omitted) :--

Description.

Poles and all round timber, except as Table No. 5. specified below Logs consigned to sawmills—

Logs consigned to sawmills— Under 23 ft. in length ... Length 23 ft. and over ... Where the girthing point covers any prominent protuberance, the girthing point will be measured as the longer, e.g., a 25 ft. log will be measured as one 13 ft. and one 12 ft. log. Where the girthing point covers any prominent protuberance, the girthing point will be moved a sufficient distance towards the larger end of the log as will enable the tape to avoid the protuberance. No allowance will be made for bark by ringing or otherwise, or for tops, butts, or unsound wood. 16. For Each Certificate of Timber Measurement supplied by the Department at the request of consignors or consignees, 1s. 6d. per 100 superficial feet additional will be charged. Measuring of timber will be performed only at the option of the Department. Handling and Tallying.—17. The Department may require all loading and unloading to be performed by the owner. For each loading or unloading performed by the Department the following charges will be made :—

Except in the case of calves not exceeding fourteen days conveyed in LA wagons, live-stock conveyed in wagons other than H, Hc, J, Jc, S, or T will be charged as for the number of stock-wagons of the appropriate type that would have been required to transport the consignment. 2. Mixed Consignments of cattle, horses, ponics, foals, mules, asses, hounds, or drover's dogs loaded in the same wagon will be charged separately for each class of animal or as one lot as "cattle," whichever is the cheaper. Where mixed consignments are carried and charged at the small-lots scale, the first animal rate will be charged on the highest rated animal in each wagon and the respective rates as for the additional animals on the remainder. 3. Part Wagons.—When a wagon is only partially occupied by a consignment of live-stock, the Department reserves to itself the right to fill to its full carrying-capacity with other stock. If a whole wagon is specially required by the consignor, the wagon rate will be charged, irrespective of the number of animals.
