NOTE.—At stations where departures from normal are in parentheses, the temperature record has been maintained for less than ten years, the rainfall record for less than twenty years. Rainfall normals have been revised and now refer to the standard period 1921-1950. Where observations are not available for the whole period, or where the site of the raingauge has been changed, the normals are partly interpolated.

NOTES ON THE WEATHER FOR JANUARY 1953

General.—January's weather displayed much variety, ranging from persistently cool and wet conditions in eastern districts of the North Island to warm sunny weather in Westland. Other districts experienced less extreme conditions but generally there was a lack of settled weather. This weather pattern has been similar in its essential characteristics to that of the previous two months.

Quite apart from the serious flood damage which occurred during the last quarter in the Manawatu district and in North Canterbury, the persistent rain and lack of sunshine have adversely affected crops and delayed farming operations. Dairy production remained high, but it has been a poor season for sheep.

Rainfall.—Rainfall was at least double the average over North Canterbury, Marlborough, Wellington, and Hawke's Bay. Some parts of this area received over four times the average rainfall, and many totals were higher than in any January for more than fifty years. The greater part of this rainfall occurred during the passage of a storm which moved northwards from North Canterbury to Manawatu between the 24th and 27th. Major floods occurred in the Ashley, Clarence, Porangahau, and Manawatu Rivers, resulting in widespread damage to farm lands and serious disruption to road and rail communications. Exceptionally high rainfalls were recorded for the twenty-four-hour period up to 9 a.m. on the 28th at Nikau Hill (10.31 in.) and Motutararaia (9.19 in.).

Rainfall was moderately below average in Northland, Bay of Plenty, Nelson, and Southland, but in South Westland totals were less than one-quarter of the average.

Thunderstorms were unusually frequent in the Auckland and Hawke's Bay Provinces, being reported in some districts on at least eight days.

Temperature.—In Canterbury mean temperatures were 2°-3° F. below normal, but farther north along the east coast the departure from normal was, in places, even greater. Conditions became relatively warmed towards the west and south, temperatures in Southland being close to normal, and in Westland 1° F. above normal.

Sunshine.—The distribution of sunshine was very similar to that of the previous two months. In Westland the total duration was equivalent to 2½ to 3 hours a day above average, and there was a modest surplus in Otago and Southland. Elsewhere totals were below average with a large deficit east of the North Island ranges, especially in Hawke's Bay and Gisborne, where the deficit was equivalent to three hours a day.

Weather Sequence.—Though pressures were relatively high over New Zealand at the beginning of the month, a shallow trough lying across the middle of the country caused light rain over a wide area during the first two days. Southerly winds and cool showery weather developed in the south on the 3rd and advanced steadily northwards, while a depression from the Tasman Sea moved across Northland on the 4th.

The arrival of a large anticyclone over the South Island on the 5th brought a spell of fine warm weather, except in eastern districts of the Auckland Province where light rain continued to fall intermittently under the influence of a disturbance centred far to the north-east. Temperatures became temporarily cooler on the east coast of the South Island on the 8th and a few showers occurred in the South.

A ridge of high pressure persisted over the Dominion until the 10th, although by then the anticyclone was centred far beyond the Chatham Islands. There was a change to southerly winds in the south on the 11th as a trough began to move slowly eastwards across the country. The weather deteriorated rapidly in the North Island and in eastern districts of the South Island. A low-pressure centre within the trough moved slowly across Northland on the 12th and next day another centre developed off East Cape. On the 14th an anticyclone cell was centred just south-east of Southland and south-easterly winds had become general. This cell slowly collapsed while another, centred over the Tasman, intensified and later passed across the North Island on the 18th. Conditions improved in the North Island on the 17th, but showers persisted about and east of the main ranges. Isolated showers were also reported from Canterbury and Marlborough up to the 18th.

By the 20th the main high-pressure centre had intensified still further and was located well to the east of New Zealand. The passage of an active trough caused rain to spread eastwards across the country on the 21st—the first appreciable rainfall in South Westland since the beginning of the month. On the 22nd southerlies prevailed over the South Island and south-westerlies in the North Island causing a sharp drop in the temperature. The weather soon cleared again in South Westland but remained unsettled elsewhere.

Heavy rain developed in North Canterbury and Marlborough on the 24th due to the formation of a very active depression east of Banks Peninsula. South-easterly winds became fresh to strong south of this depression, the centre of which followed an unusual northward course and caused serious flooding progressively in Marlborough, Wairarapa, southern Hawke's Bay, and Manawatu. Some exceptionally

heavy rainfalls were reported east of the Manawatu Gorge on the night of the 27th when the depression was centred over Northland. Pressures had been rising slowly but steadily in the south and on the 27th an anticyclone enveloped the South Island.

The weather began to improve in the North Island on the 29th as the depression moved away to the north, but many thunderstorms were reported during that afternoon in the Auckland Province.

With the collapse of the anticyclone over New Zealand on the 29th, highest pressures were to be found over the North Tasman Sea. A weak cold front associated with a depression far to the south crossed the South Island on the 30th, causing a few showers in the west and south. At the end of the month a weak anticyclone lay to the north of the Dominion, while a vigorous depression which had suddenly developed in the South Tasman Sea was rapidly approaching Southland.

6. The several prices, allowances, and margins of profit fixed by this Order apply with respect to sales by auction as well as to other sales.

7. (1) The growers’ prices fixed by this Order do not include the cost of sacks or other containers.

(2) The maximum price that may be charged or received by a grower for the sacks in which any lot of potatoes to which this Order applies are packed shall be computed as follows:—

For corn sacks of a size 48 in. by 26½ in., 46 in. by 26½ in., 44 in. by 26½ in., 46 in. by 23 in., or 41 in. by 23 in.:

At the rate of 30s. per ton of potatoes:

For all other sacks or bags: At the rate of 11s. per ton of potatoes:

(3) Where any potatoes to which this Order applies are packed in sacks the maximum price that may be charged or received for the potatoes shall be computed on the gross weight of the potatoes and the sacks.

APPLICATION OF THIS ORDER

8. (1) This Order applies only with respect to potatoes that are intended for human consumption.

(2) All potatoes sold or delivered to a purchaser during the currency of this Order shall be deemed to be intended for human consumption unless they are sold for some other specific purpose.

(4) Notwithstanding anything in the foregoing provisions of this clause, where any extraordinary charges beyond the control of the grower are reasonably incurred by him in or in the course of delivering any potatoes at the place specified in any contract as the place of delivery, the amount of such charges may, with the approval of the Tribunal, be added to the price to be paid to the grower for those potatoes.

Distributors' Prices

12. (1) Subject to the provisions of the next succeeding clause, the maximum price that may be charged or received by any distributor for any potatoes grown in New Zealand shall not exceed the sum of the following amounts:—

- (c) An amount computed at the rate of 15s. a ton.

13. Where any wholesaler who does not normally carry on business as a distributor sells any potatoes to another wholesaler (thus becoming a distributor in respect of that transaction) the price to be charged by the vendor may exceed the maximum price determined in accordance with the last preceding clause by such amount as may be mutually agreed to by the parties to the transaction: Provided that in any such case the maximum price that may be charged by the purchasing wholesaler in accordance with the next succeeding clause shall be determined as if he had bought those potatoes at the price paid by the wholesaler from whom he bought them.

Wholesalers' Prices

14. (1) Subject to the provisions of clause 13 hereof, the maximum price that may be charged or received by any wholesaler for any potatoes grown in New Zealand and sold by him to a retailer for purposes of retail sale shall not exceed the sum of the following amounts:—

- (a) The price actually paid or payable by the wholesaler to the grower or any other person for the potatoes and for the sacks, but not exceeding the maximum price fixed by the foregoing provisions of this order in respect of the sale to the vendor.
- (b) An amount (not exceeding 4s. a ton) in respect of any potatoes actually received into and delivered from the wholesaler's store, together with any grading, transport, or other charges actually paid by the wholesaler;

- (d) An amount computed at the rate of £1 5s. a ton for lots of less than a half-ton, and at the rate of £1 a ton in all other cases.

- (d) An amount computed at the rate of £1 5s. a ton for lots of less than a half-ton, and at the rate of £1 a ton in all other cases.

Computation of Distributors' and Wholesalers' Prices by Reference to Average Prices

15. In computing the maximum price that may be charged by any distributor or by any wholesaler for potatoes that have been acquired by him in different lots at different prices, the appropriate

maximum price may, with the general or special approval of the Tribunal, and subject to any conditions that may be imposed by the Tribunal, be computed by reference to the average of the several prices paid for such potatoes.

Distributors and Other Wholesalers to Specify Weights and Grades of Potatoes on Relevant Invoices

16. (1) Every distributor or other wholesaler who sells any potatoes to which this Order applies shall specify in the relevant invoices, with respect to each item, the weight and the grade of the potatoes comprised in the item.

(2) For the purposes of this clause the term "grade" with respect to any lot of potatoes means, as the case may require, "good table" or "f.a.q." or "under-grade."

(3) Where no grade is specified in any invoice, the potatoes referred to in the invoice, shall, for the purpose of this order be deemed to be "under-grade."

Retailers' Prices

17. (1) Subject to the following provisions of this clause, the maximum price inclusive of the container that may be charged or received by any retailer for potatoes, whether grown in New Zealand or imported into New Zealand, shall not exceed the sum of the following amounts:—

- (a) The price actually paid or payable by the retailer for the potatoes, but not exceeding the maximum price fixed by the foregoing provisions of this order in respect of the sale to the vendor.
- (b) Any grading, transport, or other charges actually paid or payable by the retailer;
- (c) An amount equal to 33¼ per cent of the sum of the amounts specified in paragraphs (a) and (b) hereof.

(2) The retail price of any potatoes, computed in accordance with the last preceding subclause, shall be calculated by reference to the prices and weights disclosed in the appropriate invoices.

(3) Notwithstanding anything to the contrary in the foregoing provisions of this clause, but subject to the provisions of sub-clauses (4) and (5) hereof, the retail price of potatoes inclusive of the container to which this Order applies shall not in any case exceed the appropriate price set out in the Schedule hereto.

(4) Where any potatoes to which this Order applies are sold by retail in lots of 14 lb. or 28 lb. or 56 lb. or 112 lb., the maximum retail price inclusive of the container shall not in any case exceed:—

Where the Maximum Retail Price (as Fixed by the Last Preceding Subclause) is—	Maximum Retail Price per Lot of—			
	14 lb.	28 lb.	56 lb.	112 lb.
	s. d.	s. d.	s. d.	s. d.
3d. per lb.	3 4	6 6	13 0	25 9
3½d. per lb.	3 8	7 1	14 2	28 0
3¾d. per lb.	4 0	7 7	15 2	30 0
4d. per lb.	4 3	8 2	16 4	32 3
4½d. per lb.	4 6	8 8	17 4	34 3
4¾d. per lb.	4 10	9 3	18 6	36 6
5d. per lb.	5 1	9 10	19 8	38 6
5½d. per lb.	5 4	10 4	20 8	40 9

(5) For the purposes of this subclause, the term "specified weight" means 14 lb., 28 lb., 56 lb., or 112 lb. Where any potatoes to which this order applies are sold by retail in any lot exceeding 14 lb., a maximum price for the lot, inclusive of the container, shall be calculated at the rate fixed in respect of the nearest specified weight to the weight of the lot sold.

(6) If in respect of any lot of potatoes sold by a retailer the maximum price, calculated in accordance with the foregoing provisions of this clause, is not an exact number of pence or half-pence (in the case of a lot less than 5 lb.) or is not an exact number of pence (in the case of a lot of 5 lb. or more), the maximum price of the lot shall be the next highest halfpenny or the next highest penny, as the case may be. The provisions of this subclause shall apply notwithstanding that in any case the retailer purports to sell any potatoes otherwise than by weight.

(7) For the purposes of this clause the price paid or payable by a retailer for any lot of potatoes and the grading, transport, and other charges paid or payable by him in respect of the same lot, shall be apportioned evenly over the whole lot, and the price and charges paid or payable by the retailer for each 1 lb. of potatoes included in the lot shall be determined accordingly.

18. Notwithstanding anything in the foregoing provisions of this Order and subject to such conditions, if any, as it thinks fit, the Tribunal, on application by any retailer, may authorize special maximum retail prices in respect of any potatoes to which this Order applies where special circumstances exist or, for any reason extraordinary charges (freight or otherwise) are incurred by the retailer in obtaining delivery from the source of supply that is nearest or most convenient of access to him. Any authority given by the Tribunal under this clause may apply with respect to a specified lot or consignment of potatoes or may relate generally to all potatoes to which this Order applies sold by the retailer while the approval remains in force.

Retailers to Exhibit Prices

19. Every retailer who offers or exposes any potatoes to which this Order applies for sale in any shop shall keep in a prominent position in such proximity to the potatoes to which it relates as to be obviously descriptive thereof a ticket, placard, or label on which shall be stated in legible and prominent characters the retail price per pound of the potatoes.

BRANDING OF GOOD TABLE POTATOES

20. Every grower, distributor, or wholesaler who grades any potatoes as "good table" shall affix to every sack so graded a tag on which shall be written the words "Good Table Grade" and the name and address of the person so grading the potatoes: Provided, however, that where a grower so grading potatoes is a member of a growers' association approved by the Minister of Agriculture his registered number may be given in place of his name and address.
