Approving Variation of Agreement Between Her Majesty the Queen and Consolidated Zinc Proprietary Ltd.

BERNARD FERGUSSON, Governor-General
ORDER IN COUNCIL

At the Government Buildings at Wellington this 20th day of March 1967

Present:

THE RIGHT HON. KEITH HOLYOAKE, C.H., PRESIDING IN COUNCIL

PURSUANT to the Manapouri - Te Anau Development Act 1963 and clause 22 of the agreement dated 15 August 1963 between Her Majesty the Queen and Consolidated Zinc Proprietary Ltd., a copy of which is set out in the Schedule to the said Act, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby approves of the said agreement being varied in accordance with the agreement dated 15 November 1966 between the Minister of Electricity and the said company, a copy of which is set out in the Schedule to this Order in Council.

SCHEDULE

AN agreement made the 15th day of November 1966, between the Minister of Electricity of the Government of New Zealand of the one part, and Consolidated Zinc Proprietary Ltd., the registered office of which is at 95 Collins Street, Melbourne, in the State of Victoria, in the Common-

wealth of Australia (hereinafter referred to as "the company", which expression shall include its permitted assigns), of the other part:

Whereas, by an agreement (hereinafter referred to as "the 1963 agreement") made the 15th day of August 1963 between Her Majesty the Queen, in respect of the Government of New Zealand, acting by and through the Minister of Electricity (hereinafter referred to as "the Crown") of the one part, and the company of the other part, which agreement was validated by and is set out in the Schedule to the Manapouri - Te Anau Development Act 1963, it was agreed *inter alia* that the Crown should, if so required by the company, and subject to certain terms and conditions as therein set forth, make available to the company all electrical power within the power potential of the water resources other than two Crown blocks (both those terms being as defined in the 1963 agreement);

And whereas the Crown desires to take temporarily, not only from the said two Crown blocks, but also from one decimal eight 100-megawatt blocks (as defined in the 1963 agreement) up to a total of 2,600,000,000 kilowatt hours of electrical energy per year, and pro rata for part of a year, so that it may defer construction of other hydro-electric power stations in New Zealand and for that purpose to construct as soon as practicable, and within the limits imposed under section 4 of the said Act, all works requisite to enable the maximum use of the water resources for the generation of electrical power;

And whereas it is considered that it is advisable and for the benefit of both the Crown and the company that the provisions of the 1963 agreement should be varied in certain respects as hereinafter set forth in order to permit the best use to be made of the water resources for the generation of electrical power;

And whereas clause 22 of the 1963 agreement provides that, with the approval of the Governor-General, by Order in Council, the 1963 agreement may be varied pursuant to agreement between the Minister of Electricity and the company:

Now, therefore, it is hereby agreed as follows:

1. Clause 1 of the 1963 agreement shall be varied by omitting therefrom the definitions of "the power potential of the water resources" and "undeveloped portion of the power potential of the water resources", and by substituting the following definitions:

"the power potential of the water resources" means such electrical power, calculated on the basis that it includes two Crown blocks, and that apart therefrom it comprises 100-megawatt blocks and a fraction of a 100-megawatt block, as can be generated on the basis of the maximum usage of the long-term regulated flow of the water resources by generating units at the power station at Lake Manapouri, having a total capacity of 700 megawatts, or by generating units from time to time installed at the said power station, if those last-mentioned generating units have a total capacity of more than 700 megawatts:

"long-term regulated flow of the water resources" means the maximum average flow which can be obtained over the long term from the water resources, regulated in accordance with good engineering and hydrological practices, within the limits imposed under section 4 of the Manapouri - Te Anau Development Act 1963; provided however that, until the works known as the Te Anau control structure and the Mararoa dam have been completed, "long-term regulated flow of the water resources" means the maximum average flow which can be obtained as aforesaid, but without the provision of the said works:

"Stage I" means the period from the 31st day of January 1963 until the date on which the Crown is first obliged to make available electrical power to the company pursuant to a notice given by the company under paragraph (e) of clause 5 hereof:

"Stage II" means the period from the conclusion of Stage I to the expiration or sooner determination of this agreement:

"surplus electrical power" means electrical power which, from time to time, can be generated in accordance with good electrical practices at the power station at Lake Manapouri in excess of the power potential of the water resources."

2. Clause 4 of the 1963 agreement shall be varied by:

(a) inserting the letter "(a)" immediately after the figure "4" at the commencement of the said clause 4;

(b) adding at the end of the said clause 4 the following paragraphs—

"(b) The Crown will instal as soon as possible in the power station at Lake Manapouri seven generating units, having a total capacity of at least 700 megawatts. The first four generating units shall each have a capacity of 100 megawatts. Subject to confirmation of present engineering studies, which indicate that it is feasible for each of the remaining three generating units to have a greater capacity than 100 megawatts, the Crown shall instal those three generating units with the maximum feasible capacity.

"(c) If the company gives to the Crown a notice in accordance with paragraph (c) of clause 5 hereof, then the Crown will construct the works known as the Te Anau control structure and the Mararoa dam and all works ancillary thereto as soon as feasible, but in any case so that they shall be completed not later than the 1st day of January 1976, or such later date as the company may agree."

3. Clause 5 of the 1963 agreement shall be varied by omitting paragraphs (c) to (g), both inclusive, and by substituting the following paragraphs:

"(c) On or before the 31st day of December 1968, the company may give to the Crown notice requiring the supply to the company of a number of 100-megawatt blocks, being not less than one nor more than two decimal four (as the company may decide) on and from the date specified in the notice, but not earlier than 30 months after the date the notice is given.

"(d) After giving the notice referred to in paragraph (c) of this clause, the company may give the Crown from time to time a notice requiring the supply to the company of the number of 100-megawatt blocks stated in the notice on and from the date specified in the notice (which date shall not be before the date on which the Crown is obliged to make available electrical power to the company under the notice given by the company pursuant to the said paragraph (c)); provided always that the company shall not give a notice under this paragraph which would require the Crown to make available to the company pursuant to that notice, and to notices previously given under this paragraph and under the said paragraph (c), more than a total of two decimal four 100-megawatt blocks before the 1st day of January 1973, or more than a total of three 100-megawatt blocks.

"(e) After the company has given notices under paragraphs (c) and (d) of this clause, requiring the Crown to supply it with a total of three 100-megawatt blocks, the company may give to the Crown from time to time a notice requiring the supply to the company on and from the date specified in the notice (which date shall not be before the last date on which the Crown is obliged to commence to make available electrical power to the company under notices given by the company pursuant to paragraph (d) of this clause) of the number of 100-megawatt blocks stated in the notice, but so that the total number of 100-megawatt blocks required by all notices given under this paragraph shall not exceed one decimal eight 100-megawatt blocks; provided that—

"(i) a notice under this paragraph shall not be given before the 1st day of April 1973;

"(ii) the date specified in a notice given under this paragraph, on and from which electrical power is required by the company, shall not, for notices given before the 1st day of October 1976, be earlier than 42 months after the date the notice is given, and for notices given on or after the 1st day of October 1976, be earlier than 30 months after the date the notice is given.

"(f) In this paragraph 'excess continuous electrical power' means—

"(i) in respect of the period prior to the completion of the said Te Anau control structure and Mararoa dam, the number of 100-megawatt blocks by which the power potential of the water resources is determined to exceed two Crown blocks plus four decimal two 100-megawatt blocks; and

"(ii) in respect of the period after the completion of the said Te Anau control structure and Mararoa dam, the number of 100-megawatt blocks by which the power potential of the water resources is determined to exceed two Crown blocks plus four decimal eight 100-megawatt blocks.

"After the date on which the Crown is first obliged to make available electrical power to the company under the notice given by the company under paragraph (c) of this clause, the company may from time to time give to the Crown a notice (which shall state that it is given under this paragraph) requiring the supply to the company of the excess continuous electrical power or any part thereof as stated in the notice (to the extent not required under prior notices pursuant to this paragraph) on and from the date specified in the notice; provided that, if at any time any estimate or assumption which was made to determine the excess continuous electrical power is shown to have been incorrect, then the excess continuous electrical power shall be redetermined and the quantity of continuous electrical power required under notices given by the company under this paragraph shall be reduced by the quantity (if any) by which it exceeds the excess continuous electrical power so redetermined. In making the determination and redetermination as aforesaid the parties shall take into account their desire to make the maximum use of the water resources to meet the requirements of both of them under this agreement.

"(g) After the 30th day of June 1986, or such earlier date as the Minister may agree, if the total electrical power required by the company under notices given by it under the foregoing provisions of this clause is at least equal to the power potential of the water resources less two Crown blocks, then the company may at any time or times request the Crown to supply the company with electrical power of a stated wattage (either continuously or at a load factor stated in that request) not exceeding the equivalent of two Crown blocks, less the electrical power (if any) which the company has required the Crown to supply under notices given by the company as hereafter provided in this paragraph. The Crown shall notify the company as soon as possible whether or not it will make available all or any part of the two Crown blocks and, if so, the wattage of the electrical power and the load factor at which, and the date from which, it would be available. At any time within six months after the company is so notified that any electrical power is available as aforesaid it shall have the right to give to the Crown notice requiring the supply to the company of electrical power of the wattage and at the load factor so notified, from the

date of availability so notified, or such other later date as may be agreed by the Minister and the company.

"(h) No notice under this clause shall be given which requires the supply of electrical power to the company under that notice to commence after the 30th day of June 1991, or such later date as the Minister may from time to time agree.

"(i) If the company does not give a notice to the Crown pursuant to paragraph (c) of this clause by the 31st day of December 1968 (or any extended date under clause 13 hereof), requiring the supply to the company of at least one 100-megawatt block by not later than the 1st day of July 1971, then this agreement shall forthwith thereafter cease and determine, except as to the provisions of clauses 16 and 26 hereof.

"(j) In this clause, where reference is made to a number of 100-megawatt blocks that number may be either a whole number, or a fraction; or a whole number and a fraction."

4. The 1963 agreement shall be varied by inserting immediately after clause 5 thereof the following additional clauses:

"5A. Any surplus electrical power for the time being shall be made available by the Crown to the company; provided that if in any calendar year the company avails itself of surplus electrical power and, as a result of it doing so, the Crown during that year—

"(i) if that year ends during Stage I, does not obtain 2,600,000,000 kilowatt hours of electrical energy; or

"(ii) if that year ends during Stage II, does not obtain 1,050,000,000 kilowatt hours of electrical energy, or if the Crown has made available to the company part of the two Crown blocks under notices given by the company pursuant to paragraph (g) of clause 5 hereof, such lesser number of kilowatt hours as can be obtained in a year from the part of the two Crown blocks not so made available;

"then the company, if required by the Crown, shall release during the periods and on the conditions agreed between the company and the Minister (or, in default of agreement, as determined by reference to arbitration in the manner provided by clause 21 hereof), from the electrical power which the Crown is obliged to make available to the company, under notices given by it under clause 5 hereof, sufficient electrical power to enable the Crown to obtain the number of kilowatt hours which, for the reason aforesaid, it was unable to obtain during the relevant calendar year, or such lesser number of kilowatt hours as the Crown may agree.

"5B. During the term of this agreement the parties shall regularly consult together and shall make available to each other such data, records, reports, and information as may be reasonable on the one hand to enable the Crown to plan the operation of the power station at Lake Manapouri, so as to make the maximum use of the water resources for the generation of electrical power, and on the other hand to enable the company to plan its operations in the Bluff-Invercargill area and to assess the future availability of electrical power under this agreement."

5. Clause 6 of the 1963 agreement shall be varied by omitting the expression "paragraph (f)" and by substituting the expression "paragraph (h)".

6. This agreement shall be governed by New Zealand law.

7. The Minister of Electricity shall take all such action as may be necessary to obtain the approval of the Governor-General by Order in Council to this agreement, for the purposes of clause 22 of the 1963 agreement, and this agreement shall take effect from the date on which it is approved by Order in Council, as aforesaid, and shall not vary the 1963 agreement until that date.

In witness whereof this agreement has been executed the day and year first hereinbefore written.

Notwithstanding the capital amounts expended by the Crown on the said measures, the total of the amounts debited in respect thereof to Capital Account No. 1 and Capital Account No. 3 shall not, except as otherwise may be agreed between the Minister and the company, exceed the net amount which the company would have been obliged to expend for these purposes if—

"(c) The said Capital Accounts shall not include any item which comprises only construction equipment (as hereinafter defined). Net expenditure by the Crown on construction equipment expended directly and necessarily in connection with the development of the water resources shall be apportioned between appropriate items in accordance with good accounting principles, and the amount so apportioned to an item shall be deemed to be expended on that item. As and when construction equipment is sold, disposed of, or appropriated to a use other than the development of the water resources, the Crown shall credit against each of the items in respect of which expenditure on that construction equipment had been debited a proportion (determined in accordance with good accounting principles) of the amount so debited. In this paragraph 'construction equipment' means machinery, plant, equipment, buildings, works, and other assets and goods acquired by the Crown for, or in connection with, the development of the water resources, but not being, or incorporated in, works which are a permanent part of the development of the water resources.

"(e) Each of the amounts debited to Capital Account No. 1, pursuant to paragraphs (c) and (d) of clause 5 hereof, shall be apportioned at the time it is so debited between the items within Capital Account No. 1 so that the proportion debited in respect of an item bears the same proportion to that amount as the total of the amounts debited by balance day, and estimated to be debited between balance day and apportionment day, in respect of the item, pursuant to paragraph (a) or paragraph (b) of clause 5 hereof, bears to the total of the amounts debited by balance day, and estimated to be debited between balance day and apportionment day, to Capital Account No. 1, pursuant to the said paragraph (a) and paragraph (b).

"(f) The amount debited to Capital Account No. 2, pursuant to paragraph (b) of clause 6 hereof, shall be apportioned between the items within Capital Account No. 2 so that the proportion debited in respect of an item bears the same proportion to that amount as the total of the amounts debited by balance day, and estimated to be debited between

balance day and apportionment day, in respect of the item, pursuant to paragraph (a) of clause 6 hereof, bears to the total of the amounts debited by balance day, and estimated to be debited between balance day and apportionment day, to Capital Account No. 2, pursuant to the said paragraph (a)."

4. Clause 8 of the Schedule shall be varied by:

(a) renumbering it "10";

(b) inserting after the words "Capital Account No. 2" wherever therein appearing the words "or Capital Account No. 3 or Capital Account No. 4";

(c) inserting after the word "item" where secondly appearing in paragraph (a) the words "or part of an item".

5. The Schedule shall be varied by omitting clauses 9, 10, 11, and 12 thereof, and substituting:

"11. (a) The price payable by the company for all electrical power under the agreement shall be based on a yearly amount per kilowatt, calculated as provided in clause 12 hereof (hereinafter called 'the yearly kilowatt price'). The company shall pay for the said electrical power on a quarterly basis.

"(b) The company shall pay in respect of a quarter—

"(i) for all electrical power under the agreement (other than electrical power made available in pursuance of notices given by the company under paragraph (g) of clause 5 of the agreement), an amount equal to the sum of the notified kilowatt quarterly amounts (a 'notified kilowatt quarterly amount' for the purpose of this subparagraph being, in respect of each of the notified kilowatts during a quarter, the proportion of the yearly kilowatt price equal to the proportion which the number of days in that quarter in respect of which the company is obliged to pay under the agreement for the notified kilowatt bears to the total number of days in the calendar year in which that quarter occurs); and

"(ii) for electrical power made available in pursuance of notices given by the company under the said paragraph (g), an amount equal to the product of the yearly kilowatt price multiplied by the number of kilowatts which bears the same proportion to 200,000 as the quantity of energy available during that quarter (on the basis of the load factor of the electrical power required under the said notices) from the electrical power so made available, and for which the company is obliged to pay under the terms of the agreement during that quarter, bears to the quantity of energy available from two Crown blocks during the calendar year in which that quarter occurs.

"(c) The Crown shall render an account to the company for the amount payable for electrical power under the agreement at the beginning of each calendar quarter in respect of the preceding quarter, and each account shall be payable within one month after it is received by the company at its office at Bluff, or elsewhere as may be agreed, at the New Zealand Electricity Department's office at Dunedin, or by lodgment to the Public Account at any branch in New Zealand of the Bank of New Zealand, followed by mailing of the bank's receipt for the amount so lodged to the said Department's office.

"(d) In any case where immediately after the end of a particular quarter it is not possible to calculate accurately the yearly kilowatt price or the number of notified kilowatts because some or all of the components of either or both of them are not then known, a *pro forma* account shall be rendered in respect of that quarter with either or both (as the case may be) the yearly kilowatt price and number of notified kilowatts estimated as accurately as is then possible, and the amount of the *pro forma* account shall be adjusted in the quarterly account next after all components are known. In the event of it being necessary to estimate the number of notified kilowatts because the exact number in any block of electrical power required by the company under a notice given pursuant to clause 5 of the agreement has not at the time been determined under clause 8 of the agreement, then the number of notified kilowatts in that block shall, for the purpose of the *pro forma* account, be estimated as the number of kilowatts required by that notice.
