To be read in conjunction with the Statement of Accounting Policies which form part of the Financial Statements.

## STATEMENT OF ACCOUNTING POLICIES

### GENERAL ACCOUNTING PRINCIPLES

The general accounting principles of the New Zealand Society of Accountants statements, for the measurement and reporting of the financial results and situation on a historical basis, have been followed. Particular accounting policies used which significantly affect the measurement of the Bank's profit and its financial position are set out below.

#### 1. Government stock—

(a) Between 1971 and 1973 several parcels of low yielding Government stock were exchanged for stocks yielding a higher rate of interest. The contracts provide for the stock, with a face value of \$2,817,240, to be resold on various dates, between 1984 and 1986. The contracted selling price will result in a capital loss and this is being amortised on a straight line basis over the period concerned. Up to 31 March 1975, the annual provision was made from the Reserve Fund, in accordance with section 27.1 (6) of the Trustee Savings Bank Act 1948, and shown as a separate item in the balance sheet. A change of policy has been implemented during the year ended 31 March 1976 and the annual provision has been charged against the appropriation account, with the accumulated provision being deducted from the book value of Government stock.

#### (b) Values of Government stock—

Values of the stocks held at 31 March 1976 were

Cost price .. .. .	\$9,190,455
Face value .. .. .	\$9,200,740
Market value .. .. .	\$7,385,438

#### 2. Interest—

- (a) Interest on Investments: Interest on investments and mortgages is brought into revenue during the period in which it is earned, rather than the period during which it is received.
- (b) Personal Loans: The policy is to add interest to the full advance at the commencement of the loan, and this amount is brought into revenue during the appropriate financial year by applying the "Rule of 78".
- (c) Investment Accounts: Interest accrued on depositors' investment accounts is calculated at the full rate payable and an adjustment, based on past experience of early maturities is then made to acknowledge that some accounts will close before maturity.

#### 3. Depreciation—

- (a) Up to 31 March 1975 depreciation was calculated on rates allowable for taxation purposes. For the year ending 31 March 1976, and for subsequent years, depreciation is calculated on a straight line basis. The principal write off periods in use for fixed assets are
- |                          |                |
|--------------------------|----------------|
| Buildings .. .. .        | 10 to 50 years |
| Office equipment .. .. . | 10 years       |
| Furniture .. .. .        | 10 years       |
| Vehicles .. .. .         | 5 years        |

(b) The net effect of the change in the basis of calculation is to increase the 1976 pretax profit by \$1,658.53.

(c) The Head Office land and buildings were revalued in 1975 and depreciation is written off the buildings on the basis of the new valuation. All other assets are included at cost.

#### 4. Taxation—

The liability for deferred taxation arises from timing differences related to—

- (a) Accrued interest.  
(b) Depreciation allowances.

#### AUDITORS' CERTIFICATE

We have examined the records and financial accounts of the Wanganui Savings Bank for the year ended 31 March 1976, as required by section 29 (3) of the Trustee Savings Banks Act 1948.

Our examinations were made in accordance with the general principles of auditing and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion the accompanying revenue account, appropriation account and balance sheet, together with the statement of accounting policies, present fairly the financial position of the Wanganui Savings Bank at 31 March 1976, and the results of its operations for the year then ended.

## NOTES TO THE ACCOUNTS

1. Government Stock—It has been the bank's policy to amortise discounts and premiums on Government stock securities over the term of the investment on a straight-line basis, and to show the value of the stock in the balance sheet at cost price plus amortised discount to date.

In accordance with this policy the sum of \$404 has been credited to the profit and loss account for this financial year. This amount relates to stocks held at 31 March 1975.

Following a ruling from the Inland Revenue Department, the cost price of stocks, purchased since 1 April 1975, at a discount or premium, is the price paid for the stock, and no deduction from interest receivable is allowed for the interest content of the purchase. The bank has decided to make provision over the term of the stock for losses or gains on maturity. In accordance with this policy the sum of \$3,473 has been debited to the profit and loss account for this financial year.

The nominal value of the bank's Government stock holding is \$19,219,040.

2. Local Authority Securities—Securities totalling \$182,000 were sold during the year at book value, and invested in special mortgages in accordance with a contract, to produce a higher income. Further securities, totalling \$234,000, were sold on a temporary basis with a contract to repurchase in August 1976.

The funds obtained have been invested in mortgages to produce a higher income. All securities were originally investments made direct with local authorities to assist in filling loans raised by local bodies in the Bay of Plenty, and the sale of the securities does not affect the individual local authorities.

3. Shares—Medical Data Processing Ltd.—These shares have not been treated as those of an associated Company as a contract for sale had been entered into prior to the 31st day of March 1976.

4. Shares—Northern Trustee Computerbank Ltd.—These shares have been treated using the standard accounting practice adopted by the New Zealand Society of Accountants for an associated company.

#### AUDITOR'S CERTIFICATE

I report that I have examined the balance sheet of the Bay of Plenty Savings Bank as at 31 March 1976, and the related revenue account for the year ended on that date, and have received all the information and explanations I have required. In my opinion the accompanying balance sheet and revenue account presents fairly the financial position of the bank as at the 31 March 1976, and the results of the operations for the year ended on that date, and were in general conformity with generally accepted accounting principles applied on the basis consistent with that of the preceding year.

#### NOTES TO THE ACCOUNTS

Statement of Accounting Policies: The general accounting principles recommended by the New Zealand Society of Accountants for the measurement and reporting of results on an

historical basis have been adopted in the preparation of the financial statements. The particular accounting principles which materially affect the measurement of profit and financial position are detailed below.

**1. Revenue:**

- (a) Interest accrued on investments has been taken into account.  
 (b) *Personal Loans*: The "Rule of 78" has been used in determining interest earned.

**2. Depreciation:** Calculation has been made on basis of Inland Revenue Department rates. First year depreciation and special depreciation have been claimed where applicable.

**3. New Zealand Government stock:** In accordance with established policy New Zealand Government stock has been shown at face value. Prior to 1 April 1975 certain parcels of New Zealand Government stock were purchased at a discount.

**4. Taxation:** The charge for income tax shown as a charge against revenue is the estimated tax liability calculated on a basis consistent with past practice.

**AUDITORS' CERTIFICATE**

We, the undersigned, being the auditors of the Southland Savings Bank, appointed in terms of section 29(3) of the Trustees Savings Banks Act 1948, report:

1. That we have examined the books, accounts, and vouchers of the bank, and have received all the information and explanations we have required.

2. We have verified the cash, investments, securities, and assets of the bank as at 31 March 1976.

3. The general manager has certified that to the best of his knowledge and belief, all requirements of the Trustees Savings Banks Act 1948, and regulations thereunder, have been complied with.

In our opinion, the above balance sheet and profit and loss account are properly drawn up so as to give respectively a true and fair view of the state of the Southland Savings Bank's affairs as at 31 March 1976, and of the results of its business for the year ended on that date, in conformity with generally accepted accounting principles and applied on a basis consistent with that of the preceding year.

### GROWING TAMARILLOS

Agriculture Bulletin No. 307

Ministry of Agriculture and Fisheries

The tamarillo or tree tomato is a native of the Andean region of Peru. The first known record of the tamarillo in New Zealand is in the 1891-92 catalogue of D. Hay and Sons, Auckland.

The commercial production of tamarillos in this country began in a small way more than 50 years ago, but it was not until the supply of tropical fruits such as bananas, pineapples, and citrus from overseas was restricted during World War II that any appreciable quantities were produced for marketing.

In New Zealand this fruit used to be called the tree tomato. The tree tomato officially had its name changed to "Tamarillo" in January 1967 to provide a more appealing and exotic name, especially for export promotion.

This handy little booklet supplies information on how to grow and care for tamarillo plants.
