\*S.R. 1975/57

## GENERAL INFORMATION

The following explanatory notes do not form part of this standard grade, but are presented for the information of growers/exporters.

1. In the opinion of the New Zealand Ministry of Agriculture and Fisheries, this standard grade will permit the entry

of New Zealand onions to all countries to which they are likely to be exported.

2. Notwithstanding clause 1 of these notes, it is the ultimate responsibility of the exporter to ensure that onions exported meet the requirements of the importing country and the importer.

3. Export inspection should be carried out in the districts of origin if at all practicable.

4. To avoid delays in the entry of consignments to European markets particularly, the onions should be accompanied by a Control Certificate which lists the details of the consignment including grade, and is signed by an authorised inspector. This is in addition to the Plant Health Certificate and any other necessary documentation.

5. The uniformity of sizing requirements are included to comply with those of the countries listed in the Third Schedule. However, it is the Ministry's view that exports to other countries should also comply with the uniformity of sizing requirements, except where otherwise agreed between exporter and importer.

## NOTES TO THE ACCOUNTS

## Statement of Accounting Policies

1. (a) *Amortisation of public Securities*: Book values of New Zealand Government and local authority securities which are purchased at a discount or a premium, are being amortised annually so as to attain their redemption values by maturity date.

(b) *Profits and losses on realisation of public Securities*: The difference between the book value and proceeds on realisation of New Zealand Government and Local Authority Securities is taken to Profit and Loss Account in equal annual instalments over a period of 5 years commencing with the year in which they arise.

2. *Investments*: The New Zealand Government and local authority securities are all redeemable at par at fixed dates. Whilst in the ordinary course of business some realisation of the Bank's investment in these securities may take place, at prices below book values, it is the opinion of the directors that existing reserves are sufficient to cover any losses that are likely to arise on sales undertaken in the normal course of business.

As at 30 June 1977.

Book Value: \$26,411,936.

Market Value: \$24,895,725.

RESEARCH, BULLETIN 217

118 p. 1976. \$4.50

This is an account of the recovering of the land at Molesworth for productive farming and should prove very interesting and informative to all high country farmers.
