Timber Preservation Regulations 1955—Branding and Identification of Preservative Treated Timber

PURSUANT to regulation 12 of the Timber Preservation Regulations 1955*, the Timber Preservation Authority hereby gives notice that, subject to the exemptions provided herein, timber which has been preservative treated as provided in the said regulations shall be legibly branded or identified in the manner herein described.

1. *Definitions*—For the purpose of these regulations, the following definitions shall apply:

1.1 *Brand*—Means a legible mark placed on preservative treated timber containing the registered number of the plant allocated by the authority and a further mark to identify the TPA Commodity Specification to which the timber has been treated. Such brand shall be in block letters not less than 10 mm high and numerals and letters shall be displayed in the Arabic style. As an example, material treated to Commodity Specifications C3 at plant number 700 will be branded 700 C3 or $\frac{700}{C3}$ or $\frac{C3}{700}$.

Exceptions to this clause are detailed in clauses 1.4 (Surface Brand), 1.6 (Packet Brand), 1.7 (Disc Brand), and 2.1.3 below.

1.2 *Burn Brand*—Means method of applying a brand to timber by means of heated branding irons. Letters shall be not less than 10 mm in height.

1.3 *End Brand*—Means the position of application of a brand as described in clause 1.1 above. This shall be on or within 50 mm of the end of the piece of sawn timber or roundwood.

1.4 *Surface Brand*—Means a brand placed on the face, back, or edge of machined treated timber by incising or branding with a permanent ink approved by the Authority. Such brand shall embody the words "TREATED" together with, as a minimum, the number or trade name approved by the Authority for the organisation performing the branding and may include the type of treatment and other information. Face brand has a corresponding meaning.

1.4.1 *Repetitive Surface Brand*—Means a surface brand as defined in clause 1.4 above. The brand must repeat at not more than 600 mm centres.

1.5 *Incised Brand*—Means a surface brand impressed on to machined timber as described in clause 1.4.1 above.

1.6 *Packet Brand*—Means a weather resistant, legible brand placed on each side and the top of a packet of treated timber as detailed in clause 1.1 except that letters shall be not less than 20 mm in height. "Packet" for the purpose of this clause means a made up bundle of timber for subsequent handling as a single unit as described in clause 2.1.2.

1.7 *Disc Brand*—Means a metal disc, recessed so that the crown shall be not less than 2 mm from the surface of a pole and centred 3 m from the butt end. The disc shall be 50 mm in diameter and shall contain as a minimum information in the manner as described in clause 1.1.

1.8 *Registered Number*—Means a number allocated to the plant or timber merchant and approved by the Authority in writing in accordance with Regulation 9 of the Timber Preservation Regulations 1955.

1.9 *Commodity Number*—Means the letter "C" followed by the number of the commodity as set out in the publication *Timber Preservation in New Zealand: Specifications*.

1.10 *Dye Colouration*—Means a dye added to colourless preservative treatment solutions for identification purposes. The colour is not a requirement and does not signify treatment to the Authority's specifications.

1.11 *Roundwood*—Means wood treated in the unsawn state, e.g., posts, poles, piles, and also includes "half rounds" and "quarter rounds".

1.12 *Remote from the Site*—Means at a place outside the premises on which the treatment plant is located.

2. *Sawn Timber*—All treated timber shall be identified by end brand in the case of rough sawn timber, or surface brand or end brand in addition to surface brand (see clause 2.2) in the case of machined timber in the manner described below. Exemptions from the need to brand sawn timber are listed in clause 2.3 below.

2.1 *Rough Sawn Timber*—All preservative treated rough sawn timber shall be branded on or at one end with a clearly legible burn brand as defined in clauses 1.1 and 1.2. Exemptions from this requirement are:

2.1.1 Timber treated to Commodity Specification C8 (low hazard building timbers) which is dressed or planer gauged at or adjacent to the treatment plant at which it is treated shall be branded in accordance with clause 2.2 below.

2.1.2 Treated timber cut at or adjacent to the treatment plant for subsequent finger jointing remote from the site shall be packet branded as detailed in clause 1.6.

2.1.3 Timber treated to Commodity Specification C8 which shall be burn branded on or at the end with the registered number only.

2.2 *Machined Timber*—All timber which is machined prior to or subsequent to preservative treatment shall be repetitively surface branded in accordance with clause 1.4.1 above, unless treated to a specification higher than C8, when the letter "C" followed by the appropriate commodity number is to be either incorporated in the repetitive surface brand or burn

branded on the end as described in clause 1.3 above in addition to the repetitive surface brand.

Variations to this clause are:

2.2.1 Scantlings and framing timbers.

2.2.1.1 Which are dressed or planer gauged on all four sides shall be repetitively surface branded on at least one face except where a clear face is required on all four sides when a clear legible burn brand on the end will suffice provided a dispensation in accordance with paragraph 5 below is obtained.

2.2.1.2 Which are dressed or planer gauged on less than four surfaces shall either be surface branded in accordance with subclause 2.2.1.1 above or end branded in accordance with definition 1.3.

2.2.1.3 Which are dressed or planer gauged remote from the site before treatment shall not be surface branded prior to treatment but shall be end branded at the treatment plant in accordance with clause 1.3 above. In addition, the edge of each piece of the outer tiers of the packet is to be burn branded not less than 1 m from the butt end. (Precise details of this branding may be found in Section B of the publication *Timber Preservation in New Zealand: Specifications* or obtained from the Secretary T.P.A.)

2.2.2 Weatherboards, flooring, fascia, barge, and cover boards shall be repetitively surface branded on the back of the board.

2.2.3 Finger jointed material treated to a Commodity Specification other than C8 shall be repetitively surface branded in accordance with clause 1.4.1 above and in addition either:

2.2.3.1 Include the commodity specification reference in such brand; or

2.2.3.2 End brand in accordance with clause 1.3.

2.2.4 All other dressed lines shall be:

2.2.4.1 Repetitively surface branded; or

2.2.4.2 Branded with a single surface brand within 150 mm of the end; or

2.2.4.3 End brand as detailed in clause 1.3.

2.3 Exemptions from the need to brand:

2.3.1 Fence battens and droppers.

2.3.2 Timber 1250 mm² and less in cross-section.

2.3.3 Timber less than 19 mm nominal sawn dimension in thickness.

3. *Roundwood*—All roundwood shall be branded as detailed in clauses 1.1 (brand), 1.2 (burn brand), and 1.3 (end brand), or with a disc as described in clause 1.7 above.

4. *Veneer, Plywood, and Particle Board*—4.1 Veneer and Plywood Low-Hazard Protection:

4.1.1 Plywood made from veneers treated to Commodity Specification C10 or pressure treated in made-up form shall be branded on the back or edge of each sheet with the plywood manufacturer's name, mark, or registered number plus the identification "C10".

4.1.2 Veneers treated to Commodity Specification C10 for disposal for manufacture into plywood shall have each package or bundle marked with the registered number of the treatment plant with, as a minimum, the identification "C10".

4.2.2 Veneers treated to C11 and disposed of for manufacture into plywood shall have each package or bundle marked with the registered number of the treatment plant together with the identification "C11".

4.3 Particle Board Moderate Hazard Protection: Particle Board treated to Commodity Specification C12 shall be branded on the back or edge of each sheet with the manufacturer's name, mark, or registered number with, as a minimum, the identification "C12".

5. *Dispensations*—Notwithstanding anything in the provisions of this notice, the Authority may, if it thinks fit, in special circumstances, grant dispensation from any of the foregoing provisions.

6. *Effective date*—The provisions of this notice shall come into force on the 1st day of January 1978.

7. *Previous notice cancelled*—The provisions of previous notices published in the *Gazette* are hereby revoked.

NOTES TO THE ACCOUNTS

Statement of Accounting Policies

1. (a) *Amortisation of public Securities*: Book values of New Zealand Government and local authority securities which are purchased at a discount or a premium, are being amortised annually so as to attain their redemption values by maturity date.

(b) *Profits and losses on realisation of public Securities*: The difference between the book value and proceeds on realisation of New Zealand Government and Local Authority Securities is taken to Profit and Loss Account in equal annual instalments over a period of 5 years commencing with the year in which they arise.

2. *Investments*: The New Zealand Government and local authority securities are all redeemable at par at fixed dates. Whilst in the ordinary course of business some realisation of the Bank's investment in these securities may take place, at prices below book values, it is the opinion of the directors that existing reserves are sufficient to cover any losses that are likely to arise on sales undertaken in the normal course of business.

DIRECTIONS FOR EDUCATIONAL DEVELOPMENT

A REPORT PREPARED BY THE ADVISORY COUNCIL ON EDUCATIONAL PLANNING

141 p. 1975. \$2.50

This report marks the culmination of the activities of the Educational Development Conference. The Advisory Council has recommended the directions it considers New Zealand education should go in the next 5 or 10 years.

Five principal areas are identified as requiring attention.

Education is seen as a lifelong activity, and emphasis is therefore placed on the "foundations"—early childhood education, the school curriculum and special provisions for special needs, and parent education.

Special attention is given also to the relationship between the school and the community, the need for close mutual support and co-operation, including understanding and respect for minority cultures.

A key to the quality of education is the people involved in it. Teacher education, the availability of advisory and ancillary staff, as well as resources for materials and research, have a chapter devoted to them.

Since education is seen as a lifelong activity, this is considered at some length. Facets such as accessibility, transfer of credits, and the role of existing institutions are discussed, together with ways in which continuing education could be provided for the whole community.

In discussing the administration and organisation of education the principle followed is the maximum devolution of authority and responsibility to the agencies and the community, at for instance, school committee and district level.

ECONOMICS OF THE NEW ZEALAND MAORI

By *Raymond Firth*

519 p. 1972. \$8.75

The Maori people are honourably known far outside the confines of their New Zealand home. Acknowledged to be one of the finest of the native races within the British Commonwealth they have long been celebrated for their splendid physical appearance, their proud bearing, their aristocratic spirit, their fluent oratory, and above all for their prowess in war. This book contains an account of the social and economic organisation of the Maori people before the organisation was transformed by contact with Western civilisation. It is a major scientific contribution to economic anthropology and has now become a standard work.
