NOTES TO THE ACCOUNTS

Statement of Accounting Policies

1. (a) *Amortisation of public Securities*: Book values of New Zealand Government and local authority securities which are purchased at a discount or a premium, are being amortised annually so as to attain their redemption values by maturity date.

(b) *Profits and losses on realisation of public Securities*: The difference between the book value and proceeds on realisation of New Zealand Government and Local Authority Securities is taken to Profit and Loss Account in equal annual instalments over a period of 5 years commencing with the year in which they arise.

2. *Investments*: The New Zealand Government and local authority securities are all redeemable at par at fixed dates. Whilst in the ordinary course of business some realisation of the Bank's investment in these securities may take place, at prices below book values, it is the opinion of the directors that existing reserves are sufficient to cover any losses that are likely to arise on sales undertaken in the normal course of business.

As at 30 June 1977.

Book Value: \$26,411,936.

Market Value: \$24,895,725.

NOTES FORMING PART OF THESE ACCOUNTS

1. Bases of accounting.
These accounts are prepared on an historical basis. The following significant accounting principles have been applied:
(a) Premiums and discounts on dated investments are amortised from the date of purchase to maturity on a straight line basis. Realised profits and losses on sales of investments are taken to profit and loss account in equal instalments over five years commencing with the year in which disposal takes place. As redeemable quoted investments are normally held to or near maturity, no provision is considered necessary for any difference between the book amounts and the market values of such individual stocks quoted below book amounts at the balance date, neither have any transfers been made from reserves or out of the current year's profits to write them down, apart from the amortisation of premium on stocks bought above par referred to above.
(b) Provision for taxation includes an appropriate adjustment for deferred taxation.

2. The market value of Government and local authority securities at 30 September 1977 was \$93,467,000 (1976 \$91,083,000).

3. There is a contingent liability for subsidies on home lay-by accounts.

4. The names of other group companies in New Zealand are listed for reference:

A.N.Z. Custodians Ltd.
A.N.Z. Holdings Ltd.
