NOTES TO THE FINANCIAL STATEMENTS
Year ended 30 September 1977

1. **Statement of Accounting Policies**—The general accounting principles for the measurement and reporting of profits and losses under the historical cost method have been adopted in the preparation of these financial statements.

The following particular accounting policies which materially affect the measurement of profit and of financial position have been applied and are unchanged from last year except as referred to below:

Valuation of assets: New Zealand public securities are valued at cost adjusted annually for the proportion of discount or premium on purchase so as to allow redemption value by maturity date.

Sale of Public Securities: Profits or losses realised on sale of public securities are reflected in the statement of profit in equal annual instalments over the unexpired period to maturity of five years, whichever is the shorter.

Taxation: Deferred taxation has been adopted this year to account for timing differences primarily in respect of public security interest income accrued but not received. The adoption of deferred taxation has increased the amount of income tax provided in the statement of profit by \$16,300. An adjustment for the tax effect relating to prior years has been made to unappropriated profits.

2. **Taxation overprovided**—The overprovision of prior years' taxes credited to unappropriated profits is due to the Bank utilising deductions available in respect of public security interest accrued but not received.

3. **New Zealand Public Securities**—The redemption values of these securities at 30 September 1977 is \$69,017,000 (1976 \$67,599,000).
