FINANCIAL ACCOUNTS FOR YEAR ENDING 31 OCTOBER 1977

AUDITOR'S REPORT TO MEMBERS OF NATIONAL BANK OF NEW ZEALAND SAVINGS BANK LTD.

We have obtained all the information and explanations that we have required. In our opinion, proper books of account have been kept by the Company and proper returns adequate for the purpose of our audit have been received from the branches. In our opinion according to the best of our information and the explanations given to us and as shown by the said books, the balance sheet and the profit and loss account together with the notes above, are properly drawn up so as to give respectively, a true and fair view of the state of the company's affairs as at 31 October 1977, and of its business for the year ended on that date.

HUTCHISON HULL & CO., Chartered Accountants.

NOTES TO THE ACCOUNTS

1. Statement of Accounting Policies—

(a) *General*—The general accounting principles recognised as appropriate for the measurement and reporting of results and financial position under the historical cost method have been followed.

(b) *Tax Allocation*—The charge for taxation in the profit and loss account is the amount of the estimated tax liability at current company taxation rates in respect of the net profit reported for the year. Timing differences arising from income receivable which has been accrued but not received in the current period and unrealised appreciation on investments (see note 3) are accounted for in the deferred taxation account.

(c) *New Zealand Government and Local Authority Securities*—These are all redeemable at par at fixed dates. Whilst in the ordinary course of business some realisation of the Bank's investment in these securities may take place at prices below book values, it is the opinion of the Directors that existing reserves are sufficient to cover any losses that are likely to arise on sales undertaken in the normal course of business.

The Book Values of securities purchased at a discount or a premium are adjusted through New Zealand Government Stock Revaluation Reserve so as to obtain their redemption values by maturity dates. (see note 3 below).

The difference between book values and proceeds on realisation of New Zealand Government Stock is taken to Profit and Loss Account in equal annual instalments over a period of 5 years commencing with the year in which it arises. The balance yet to be taken to Profit and Loss Account is held in New Zealand Government Stock Revaluation Reserve. (see note 3 below).

2. As at 31 October 1977, the redemption value of New Zealand Government and Local Authority Securities was \$65,044,689, Book Value was \$64,347,277 and Market Value (exclusive of accrued interest) was \$62,234,528.

3. New Zealand Government Stock Revaluation Reserves Arising from Adjustment of Book Value of Securities purchased at a discount or a premium and still held.
