NOTES TO THE ACCOUNTS

Statement of Accounting Policies

1. (a) *Amortisation of Public Securities*—Book values of New Zealand Government and local authority securities which were purchased at a discount or a premium, are being amortised annually so as to attain their redemption values by maturity date.

(b) *Profits and losses on Realisation of Public Securities*—The difference between the book value and proceeds on realisation of New Zealand Government and local authority securities is taken to Profit and Loss Account in equal annual instalments over a period of 5 years commencing with the year in which they arise.

2. *Investments*—The New Zealand Government and local authority securities are all redeemable at par at fixed dates. Whilst in the ordinary course of business some realisation of the Bank's investment in these securities may take place at prices below book values, it is the opinion of the Directors that existing reserves are sufficient to cover any losses that are likely to arise on sales undertaken in the normal course of business.

BETWEEN GOVERNMENTS AND BANKS

By Dr Hawke

244 p. \$7.50

The Reserve Bank of New Zealand was established in 1933 but today's institution bears little resemblance to the one that was originally constructed by the 1933 legislation. The author, with a combination of historical and economic skill, covers the story and makes an assessment of the Bank's performance to date. A valuable contribution to New Zealand's historical record.
