#### *Consent to the Generation of Electricity by the Ashburton Electric Power Board by the Use of Water*

PURSUANT to section 25 of the Electricity Act 1968, the Minister of Energy consents to the generation of electricity by the Ashburton Electric Power Board, subject to the following conditions.

#### CONDITIONS

1. The conditions directed by the Water Power Regulations 1934, to be implied in every licence to use water for the purpose of generation or storing electricity, shall be deemed to be conditions of this consent as if it were such a licence.

2. This consent is subject to compliance with the Water Power Regulations 1934, the Electrical Supply Regulations 1976, the Electrical Wiring Regulations 1976, the Radio Interference Regulations 1958, and with all regulations made in amendment thereof or in substitution therefor, as if in the case of the Water Power Regulations 1934 it were a licence under the Public Works Act 1928, to use water for the purpose of generating electricity, as well as a consent under the Electricity Act 1968, to generate electricity by the use of water.

3. The generation of electricity by the use of water, pursuant to this consent, shall be carried out by means of the works described in the Schedule hereto.

4. This consent is granted subject to prior compliance with the Water and Soil Conservation Act 1967.

5. This consent shall come into force on the 1st day of September 1981, and shall continue in force for a period of 21 years unless it is sooner lawfully determined.

6. The station shall be operated at all times to utilise the whole of the flow in the Rangitata Diversion Race available for generation purposes in such a manner that the supply of water to other users is not affected.

7. Nothing expressed or implied by this consent shall raise any undertaking representation, or warranty on the part of Her Majesty the Queen or the Government of New Zealand

that the Rangitata Diversion Race contains at any time sufficient water for the purposes for which the consent is granted, nor shall the granting of this consent impose on Her Majesty the Queen or the Government of New Zealand any liability to pay compensation or damages to any person for the increase or reduction in the water supply to the station from time to time however caused.

8. For the purpose of assessing in accordance with the Water Power Regulations 1934, the rental or annual sum payable in respect of this consent, the maximum generating capacity of the scheme shall be assessed at 1.7 MW.

#### SCHEDULE

##### GENERAL DESCRIPTION OF WORKS

1. The station will utilise the head of water available across the three drop chutes in the Rangitata Diversion Race situated in Block VI, Shepherd's Bush Survey District being part R.S. 30240.

2. A new race is to be constructed upstream of the power station to connect with the existing race upstream of and as close to the upper drop chute as is reasonably practical.

3. The existing 6.3 metre head is to be increased to 7.3 metres by raising the banks of the existing race by one metre at the point of connection to the new race. The increased height is to be tapered off to the height of the existing embankment level at such distance upstream thereof as may be determined by hydraulic design considerations.

4. From the new upstream race the water is to pass through a single turbine in a power house to be built across the new race.

5. The nominal installed capacity of the generator driven by the turbine will be approximately 1,700 kW.

6. A spillway with an automatically controlled radial gate is to bypass the water not utilised by the turbine during periods of reduced output or shut-down past the power station into the tailrace channel.

7. A tailrace channel downstream of the power station is to lead the water from the turbine and spillway back into the original race downstream of and as close to the bottom drop chute as is reasonably practical.

All as indicated on the plan marked N.Z.E. 1006 deposited in the office of the Electricity Division of the Ministry of Energy at Wellington.

Dated at Wellington this 30th day of July 1980.

W. F. BIRCH, Minister of Energy.

**MAORI STOREHOUSES AND KINDRED STRUCTURES**By *Elsdon Best*

116 p., illustrated. 1974 reprint. \$6.50

As an authority on Maori culture, the author has compiled in this publication a comprehensive record on the use of the different storage structures, etc., used by the Maori in former times. By studying items pertaining to Maori technology it is hoped this will throw light upon many phases of the social life and customs hitherto unknown. This bulletin is No. 5 in the Dominion Museum Series.

**METRICS FOR JOHN AND JANE CITIZEN**By *James McGill Webb*INDUSTRIAL TRAINING SERVICE—DEPARTMENT OF LABOUR  
48 p. 50c

As the name implies this book is written for use by the layman rather than the technician, the engineer, or the scientist. This book does not include conversion tables but rather relates to metric units and their use, comparisons of size, and includes a wide range of metric information. How big is a litre? What is a kilopascal? When will I use a centimetre? What will I buy in kilograms? Why is New Zealand going metric? If these and similar questions are causing you concern this book will provide the answers.

**NEW ZEALAND FARM PRODUCTION AND MARKETING**Edited by *M. J. Moriarty*

100 p. \$1.80

The British application to join the European Economic Community has brought forcefully home to all New Zealanders the dangers that face an economy dependent upon a narrow range of export products and one principal overseas market. This book reviews the problems facing Government and agriculture that arise from these facts. Series No. 9. (New Zealand Institute of Public Administration.)

**NEW ZEALAND HOUSEHOLD SURVEY REPORT

**MAORI**By *Witi Ihimaera*

45 p. 1975. \$1.20

A colourful booklet describing the coming of the Maori to New Zealand, his history, heritage, folklore, beliefs, and cultural unity.

Each chapter has a quotation from a Maori proverb, phrase, saying, or canoe chant and these concepts are presented in words and pictures.

Continues with the arrival of the pakeha and the pattern of events which followed, the Treaty of Waitangi and the Land Wars. Moves on to the Maori today, finishing with the theme, one country, two heritages in unity.

Well illustrated with 64 coloured photos, of interest to all New Zealanders and tourists. (Tourist and Publicity Department.)

**MAORI AGRICULTURE**By *Elsdon Best*

NATIONAL MUSEUM BULLETIN No. 9

315 p. 1976. \$13.50

The only comprehensive study of Maori agriculture available, this bulletin adds a further volume to the series of Elsdon Best's works which the Government Printer undertook to reprint preserving the original text and bulletin numbers. I recommend this book and the series as a whole; to collectors, archaeologists, and to those studying the prehistoric economy of the Maori people. (Government Printer.)

**THE MAORI CANOE**By *Elsdon Best*

NATIONAL MUSEUM BULLETIN No. 7

451 p. 1976. \$17.50

A reprinted edition without textual alterations and retaining the old Dominion Museum number. Another example of Elsdon Best's dedicated effort to preserve Maori culture. The material presented on canoes, their materials, types, methods of construction, and associated artifacts make interesting reading for the layman as well as for scholars of the Maori. (Government Printer.)

**THE MAORI AS HE WAS**By *Elsdon Best*

295 p. 1974 reprint. \$6.50

Fifty years of public demand since this book was first published resulted in the need for reprints in 1934 and 1952. The text has been reproduced unchanged but the originals of some of the figures could not be traced and these have been replaced with similar illustrations. There have been many advances in our knowledge of Maori life since this book first appeared. The work of numerous ethnologists, and more recently archaeologists, has critically examined many of the earlier concepts, confirming some, disproving others, and altering others to varying degrees. No one has yet produced a synthesis of the results of all this scholarship and there is still nothing as comprehensive as this book of Best's to give a general account of the Maori. This book was first published when Best was 68 and thus represents the accumulated knowledge of a lifetime. It has now become a classic introduction to Maori life. Its continued availability should help the reader to obtain a basic background to old time Maori life which can be extended by further reading.

**THE NEW ZEALAND POLICEMAN**By *J. F. Glynn*

92 p. 1975. \$4.25

This book is the research essay prepared by Chief Inspector J. F. Glynn, of the New Zealand Police, as part of the requirements for the Diploma of Public Administration at the Victoria University of Wellington. The book deals with the developing role of the New Zealand Police within the social framework of a changing democratic society, and has been welcomed by magistrates, academics, and lay readers as filling an important gap in the available works on this topic. (New Zealand Institute of Public Administration.)

**NUCLEAR POWER FACT FINDING GROUP REPORT**

Chairman, M. M. Burns, D. 9.

1977 \$5.10

Reports on the possible environmental consequences of a nuclear power production programme in New Zealand compared with possible alternatives.

Discusses pollution, including noise and thermal pollution, deterioration of visual amenities, and interference with ecosystems.

**THE PAREMATA BARRACKS**By *R. I. M. Burnett*

32 p., 9 illustrations. 70c

Paremata Barracks were built during the Maori Wars when incidents reached down to Cook Strait during the early days of settlement in Wellington which was then Port Nicholson.

**THE PA MAORI**

*By Elsdon Best*

NATIONAL MUSEUM BULLETIN No. 6

459 p., illustrated. Reprinted 1975. \$15  
The bulletin contains a wealth of information and descriptions of many Pa sites and structures. Although great advances in archaeology have modified some of the details listed by Best and some of the PAs included in the book no longer exist, the information contained in this bulletin is still an important contribution in this field and is not readily available elsewhere.

**PERINATAL MORTALITY IN NEW ZEALAND, 1972-73**

SPECIAL REPORT SERIES NO. 50

*By F. H. Foster (Department of Health)*

1977 \$4.40  
The report of a study of the biological and social effects on perinatal mortality in New Zealand which was prepared for the Health Statistics of the World Health Organisation. Seven other countries presented similar reports to the WHO. This New Zealand data prepared for the international study provides very useful information, previously unavailable, about New Zealand.

**POLICIES FOR REGIONAL DEVELOPMENT IN NEW ZEALAND**

*Edited by G. A. Town*

124 p. \$3.50  
In this book, the authors discuss the criteria which they feel should determine any sound policies in the field of regional planning and development. Although many different points of view are presented, there is unanimity that economic considerations alone should not dictate future policy. Essentially, it is for New Zealanders to consider all the relevant factors and decide what pattern of development they wish to see emerge. This book is intended as a constructive contribution to the public debate currently underway. Series No. 17. (New Zealand Institute of Public Administration.)

**THE PLANNING AND CONTROL OF GOVERNMENT EXPENDITURES**

(PLANNING, PROGRAMMING, AND BUDGETING SYSTEM)

76 p. \$2.50  
Records some of the improvements in management systems that have been made within the Government in recent years to help Ministers, members of Parliament, and public servants deal with the problem of planning and controlling expenditure. (The Treasury.)

**POWER—THE UPPER WAITAKI HYDRO POWER DEVELOPMENT**

MINISTRY OF WORKS AND DEVELOPMENT

24 p. 1978. \$1.50  
This booklet traces the history of the Upper Waitaki Hydro Power Development. Other items of interest include construction equipment, seismology, the environment, and the development of the town of Twizel.  
Well illustrated with colour photos.

**PROSPECTS AND LIMITATIONS OF NUMERICAL WEATHER PREDICTION**

*By K. E. Trenberth*

New Zealand Meteorological Service, Ministry of Transport April 1977. 24 p. 80c

The development and a description of numerical weather prediction techniques are described and contrasted with previous methods of forecasting. Emphasis is on New Zealand and Southern Hemisphere aspects. The problems and the major sources or error in weather prediction are outlined in detail and used to estimate their effects on accuracy and predictability of the weather both at present and in the future.

The practices that are described have been developed and used to improve the reading ability of children of all ages from seven to seventeen.

**REALITIES OF CURRICULA**

DEPARTMENT OF EDUCATION

90 p. 1978 \$2.50  
This research was commissioned by the Department of Education and undertaken by Dr Campbell in 1976. Dr Campbell's study is an analysis of the response from 635 teachers and 1883 students.
