The following particular accounting policies which materially affect the measurement of profit and of financial position have been applied and are unchanged from last year.

Valuation of Assets—New Zealand public securities are valued at cost adjusted annually for the proportion of discount or premium on purchase so as to allow redemption value by maturity date.

Sale of Public Securities—Profit or losses realised on sale of public securities are reflected in the statement of profit in equal annual instalments over the unexpired period to maturity or 5 years, whichever is the shorter.

Taxation—Deferred taxation has been adopted to account for timing differences primarily in respect of public security interest income accrued but not paid.

	1980 (\$000's)	1979 (\$000's)
