NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 1982

1. Statement of Accounting Policies—The general accounting principles recommended by the New Zealand Society of Accountants for the measurement and reporting of results based on historic costs have been adopted in the preparation of these financial statements.

The particular accounting policies which the Bank considers appropriate for the measurement and reporting of profit and financial position are detailed below:

Recognition of Income—Income reported in the profit statement was earned in the current income year and includes the amortisation of premiums, and discounts on the purchase of Government and local authority stock.

Interest earned from personal loans is taken to account using the Rule 78 method of allocation.

Depreciation—Fixed assets, except for data processing equipment are depreciated by applying rates approved by the Inland Revenue Department including first year allowance where applicable.

Data processing equipment is depreciated on a straightline basis at rates estimated to write off the cost of the assets over their useful life.

The difference between the policy adopted and the straightline basis is not considered to be material.

Principal rates used are:—

Building ..	1 percent to 2 percent cost price.
Furniture, fittings and equipment ..	10 percent to 20 percent diminishing value.
Data processing equipment ..	14 percent cost price.

Valuation of Assets—All current assets and investments are shown at cost with the exception of Government and local authority stock. On the basis that these will normally be held to maturity they have been valued at cost, adjusted by the amortisation of premiums or discounts on purchase, calculated on a yield basis, over the term of the stock. Stock purchased prior to 1 April 1980 has been included at face value.

In some cases, low yielding Government stock has been sold for tax purposes in sale and purchase arrangements and stock purchased is shown at the cost of the original holding.

Taxation—Provision for taxation charged against profits is the estimated expense relating to the results for the year.

Provision for deferred taxation relates to timing differences on accrued interest income, depreciation and profits and losses on the sale and purchase of New Zealand Government Stock.

Changes in Accounting Policies—Accounting policies have been changed to include an accrual for holiday pay due but unpaid at 31 March 1982. This has reduced the net profit after taxation by \$77,550.

2. Provision for Deferred Maintenance—The amount provided in the 1981 accounts has yet to be expended. It is expected that this provision will be used in the current financial year or written back in the profit statement.

3. Deferred Taxation—Deferred taxation arises because of timing differences in respect of the increase in interest accrued \$214,748, the sale of Government Stock \$458,616, and depreciation \$28,235.

4. Government Stock—New Zealand Government stock held at 31 March:

	1982	1981
	\$	\$
Face value ..	50,103,571	41,288,270
Less unamortized premiums and discounts ..	57,135	38,541
Book value ..	<u>50,046,436</u>	<u>41,249,729</u>

New Zealand Government Stock is held pursuant to the ratio requirements of the Trustee Savings Bank Act 1948 and subsequent amendments and under normal circumstances is held to maturity dates. During the 1982 year a parcel of Stock was sold at a loss with the proceeds reinvested to give the bank an improved return. The estimated market value of Government Stock at 31 March 1982 was \$43,955,647 (1981 \$33,873,580).

5. Fixed Assets—

	Cost	Depreciation to Date	Book Value 1982	Book Value 1981
Land ..	529,340		529,340	399,807
Buildings ..	4,304,433	375,189	3,929,244	3,393,920

Totals 1981 ..	<u>\$5,122,775</u>	<u>\$959,714</u>	<u>\$4,163,061</u>	

The estimated current value of the Bank's properties, based on the latest Government valuations for land, with additions since the valuation dates at cost, and insurance indemnity values for buildings, is \$8,078,819.

6. Contingent Liabilities and Commitments—

	1982	1981

AUDITORS' REPORT TO THE TRUSTEES OF THE SOUTHLAND SAVINGS BANK

We have obtained all the information and explanations that we have been required. In our opinion proper accounting records have been kept by the Bank so far as appears from our examination of those records.

1. Statement of Accounting Policies:

(a) General accounting principles—The general accounting principles as recommended by the New Zealand Society of Accountants for the measurement and reporting of profit and financial position under the historical cost method has been followed in the preparation of these accounts, except for the revaluation of land and buildings.

(b) Particular accounting principles—The following particular accounting principles which materially affect the measurement of profit and financial position have been applied:

(i) Interest Income—Interest is recognised on an accrual basis. Term and personal loan interest excludes unearned interest, and has been apportioned according to the rule of 78 method.

(ii) Fixed Assets—All fixed assets are valued at cost less accumulated depreciation with the exception of land and buildings which have been revalued to 90 percent of professional valuations.

For accounting purposes, depreciation is calculated using straight line rates based on the economic life of the assets. The following lives have been estimated:

Buildings	..	40—50 years
Furniture and Fittings	..	7—10 years
Office equipment	..	7—10 years
Motor vehicles	..	3 years to estimate residual value.

(iii) Taxation—The charge for income tax is the amount of the tax liability in respect of the accounting profit for the year and includes both current and deferred tax.

Deferred taxation arises from timing differences between accounting and taxation recognition of income and expenditure. These differences relate to depreciation and investment income.

(iv) Current Assets—Debtors are valued at expected realisable value. Stock on hand as shown in the balance sheet represents bulk stationery supplies valued at cost less a provision for obsolescence.

(v) Investments—Investments are disclosed at cost except for Government stock which is at cost adjusted by interest accrued contained in the purchase price, and by the amortisation on a straight line basis of premiums and discounts over the term of the investment. In accordance with this policy the amortisation credited to revenue for this financial year amounts to \$56,832 (1981—\$3,280 debit).

(c) Changes in Accounting Policies—There have been no changes in accounting policies that would have a material effect on the determination of profit for the year.

AUDITORS' REPORT TO THE TRUSTEES OF THE EASTERN AND CENTRAL SAVINGS BANK

We have examined the balance sheet of the bank as at 31 March 1982, and the related revenue account and statement of changes in financial position for the year then ended. Our examination was made in accordance with generally accepted auditing standards and accordingly included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

In our opinion, the accompanying balance sheet, revenue account and statement of changes in financial position present fairly, using the historical cost method, the financial position of the bank at 31 March 1982, and the results of its operations and the changes in financial position for the year then ended, in conformity with generally accepted accounting principles applied on the basis consistent with that of the preceding year.

BROWN WEBB AND CO., Chartered Accountants.

Hastings, 24 May 1982.

I hereby certify that to the best of my knowledge and belief, all requirements of the Trustee Savings Bank Act 1948, and regulations thereunder, have been complied with in respect of the Eastern and Central Savings Bank for the year ended 31 March 1982.
