Decision No: 1052.
Reference No: 4/82

Before the Indecent Publications Tribunal

In the matter of an application by the Comptroller of Customs for decisions in respect of the following publication: *The Good, The Bad and The Beautiful*, by Fiona Richardson. Published by W. H. Allen & Co. Ltd. London:

Chairman: Judge W. M. Willis.

Members: Mesdames H. B. Dick, L. P. Nikera; Messrs J. V. B. McLinden, I. W. Malcolm.

Hearing: 1 April 1982.

Decision: 28 February 1983.

Appearances: Mr P. E. P. M. Leloir for Comptroller of Customs. No submissions by importer Wholesale Book Distributors.

DECISION

A single copy of the above paperback was imported commercially and seized at Auckland. The importer has disputed forfeiture so that the book comes before the Tribunal for classification.

Mr Leloir has submitted that the book was "merely a cheap collection of explicit sexual escapades and crude language". In the Tribunal's view the book is almost completely devoid of plot, it

has no redeeming features, is devoid of literary merit and in short has nothing to recommend it. There were no submissions from the importers, Wholesale Books Ltd., and the Tribunal has no difficulty in classifying it as indecent.

Unfortunately this book became misplaced among the many others in the Tribunal's hands but was later located. This accounts for the delay in giving this decision.

District Court Judge W. M. WILLIS, Chairman.

SCHEDULE II

CONDITIONS OF APPROVAL

CNG fuel cylinders are approved subject to the following conditions—

1. That they be permanently and clearly marked, on a thickened portion of the cylinder, with characters not less than 6 mm high, if space permits, but in any case not less than 3 mm high, displaying the following information:

- The specification to which the cylinder was manufactured.
- The manufacturer's name or mark, and the serial number of the cylinder.
- The date of the original cylinder inspection and the identification mark of the inspection authority who made the inspection.
- The date of any periodic cylinder test and the identification mark of the cylinder testing station who made each test.
- The cylinder test pressure.
- The design charging pressure of the cylinder at 15°C.
- The nominal water capacity of the cylinder.
- Where required by the marking provisions of the specification to which the cylinder was manufactured, the tare weight of the cylinder.

2. That they be clearly marked or labelled to indicate that the cylinder is suitable for use with CNG.

3. That they be provided with valve threads of the type ¼ inch NGT (National Gas Taper) and that each cylinder be supplied with a metal tag attached around the cylinder neck, between the cylinder and the cylinder valve, which identifies the valve thread type.

4. That they be provided with a cylinder shut off valve designed for a working pressure of 16.5 MPa and capable of withstanding the test pressure of the cylinder. Cylinder shut off valves shall be fitted with a handwheel to facilitate ease of opening and closing of the valve and shall be fitted with a pressure relief device, which remains in contact with the gas contained in the cylinder whether the handwheel is in the open or closed position, comprising of a burst disc backed by fusible alloy. The fusible alloy is to have a nominal yield temperature of 100° centigrade and the burst disc shall yield at a pressure of not less than 24.75 MPa and not more than the test pressure of the cylinder. Cylinder valves shall be provided with an outlet thread of ¼ inch NPT (female) and a stem thread compatible with the cylinder neck thread.

5. That they shall not be charged with CNG to a greater pressure than 16.5 MPa at 15° centigrade.

6. That they be tested at periods not exceeding 5 years in accordance with the requirements of Australian Standard AS 2337-1980 and in accordance with the periodic test requirements laid down in the specification to which the cylinder was manufactured.

NOTE—The effect of this notice is to allow the continued use in New Zealand of CNG fuel cylinders imported into New Zealand prior to the introduction of the Dangerous Goods (Class 2—Gases) Regulations 1980, and which were acceptable under previous dangerous goods requirements, but whose cylinder neck threads would disqualify them for general approval under the Tariff Regulations 1976. They are approved subject to the additional proviso that the cylinder valve thread type be clearly marked on a metal tag attached between the cylinder and the cylinder valve.

The terms of this approval do not allow the continued importation of such CNG fuel cylinders.

Dated at Wellington this 2nd day of March 1983.
