## NOTES TO THE ACCOUNTS FOR THE YEAR ENDED 31 MARCH 1983

1. *Statement of Accounting Policies*

The general accounting principles recommended by the New Zealand Society of Accountants for the measurement and reporting of profits on an historical basis have been followed. Particular accounting policies used which significantly affect the measurement of the Bank's profit and its financial position, are set out below:

(a) Recognition of Income—Interest on investments is recognised as income for the period in which it is earned, rather than the period in which it is received. Interest charged on personal loans is apportioned over the term of the loan, using the "Rule of 78" method.

(b) Depreciation—Fixed assets are being depreciated on a straight line basis at rates which will write off the cost over their estimated useful lives to estimated residual values. The principal write-off periods are:

Buildings	40-100 years
Computer and Office Calculating Equipment	5-10 years
Furniture and Fittings	10-15 years
Other Fixed Assets	3-15 years

(c) Taxation—Taxation charged against net profit is the estimated expense relating to the result of the year. It includes an amount for taxation, the payment of which is deferred to future periods, because taxation practice differs from accounting policies in the treatment of:

- (i) Interest accrued on investments.
- (ii) Depreciation charges.
- (iii) Interest accrued included in the purchase price of New Zealand Government Securities.

(d) Investments—New Zealand Government and Local authorities securities are stated at cost, excluding interest accrued at date of purchase. Such securities are normally held to maturity, and their value on redemption approximates cost.

## AUDITORS' REPORT

WE the undersigned, being the auditors of the South Canterbury Savings Bank appointed in terms of section 29 (3) of the Trustee Savings Banks Act 1948, report that: we have examined the balance sheet and accompanying financial statements and notes to the accounts for the year ended 31 March 1983. Our examination was

made in accordance with the general principles of auditing and included such tests of the accounting records and such other auditing procedures as we considered necessary in the circumstances.

We have obtained all the information and explanations that we have required and in our opinion proper books of account have been kept by the bank and the accompanying balance sheet together with the profit and financial loss account and the notes attached thereto give a true and fair view of the the financial position of the bank as at 31 March 1983 and the results of its operations and the source and application of funds for the year then ended.

Dated at Timaru this 23rd day of May 1983.

HUBBARD CHURCHER &amp; CO., Chartered Accountants.

## NOTES TO ACCOUNTS FOR YEAR ENDED 31 MARCH 1983

STATEMENT of accounting policies—The general accounting principles recommended by the New Zealand Society of Accountants for the measurement and reporting of profit on an historical cost basis have been followed by the bank.

The following particular accounting policies have been applied.

(a) *Recognition of Income and Expenditure—*

- Investment income includes interest accrued to 31 March.
- Interest on personal loans is added at the commencement of the loan. This amount is brought into revenue during the appropriate financial years by applying the "Rule of 78".
- Interest on savings and current accounts represents interest credited at 31 March and the interest paid on closed accounts during the year. Investments accounts which are credited with interest during the year have an appropriate adjustment made for the interest accrued to 31 March.
- Interest paid and accrued on depositors' investment accounts has been calculated at the full rate payable on the assumption that all deposits will reach maturity.

(b) *Fixed Assets and Depreciation—*

(a) The fixed assets, have been depreciated at depreciation rates approved by the Inland Revenue Department. Computer equipment has been depreciated at the first year rate of 25 percent of cost price and there after at 20 percent of the diminishing value each year. All assets still in use are included in the books and it is calculated that the depreciation rates being used will write off the items over the period of their useful lives. In accordance with the bank's established policy no additional depreciation as provided for in the rates set by the Inland Revenue Department on the purchase of assets (other than the computer equipment) have been claimed for taxation purposes.

(b) It is considered that the amount charged in the profit and loss account does not differ materially from that which would result from calculating depreciation had the straight line method been adopted.

(c) *Investments*—The New Zealand Government stock and local authority securities have generally been held to maturity but in the year just ended there has been a departure from this practice. The bank has replaced a number of its investments in order to obtain an improved yield over a longer term but at the present time it does not intend to engage in trading in investments as part of normal business activities. The stock and securities are recorded at face value on purchase. Premium redemptions and discounts due on maturity of Government stock purchased under par are held in reserve to be brought into account upon maturity or sale of the stock concerned. Similarly any premium paid on the purchase of Government stock is also held in reserve to be written off as a loss on maturity or earlier sale of the particular stock.

(a) *Taxation*—The amount provided for income tax is the amount of the calculated tax liability in respect of the accounting profit shown for the year by the profit and loss account.

## NOTES TO THE ACCOUNTS

1. *Statement of Accounting Policies—*

The general accounting principles as recommended by the New Zealand Society of Accountants for the measurement and reporting of profits on an historical basis have been followed. Particular accounting policies used which significantly effect the measurement of the Bank's profit and its financial position are set out below:

2. *Government Stock—*

(a) Government stock is recorded at face value, adjusted by any premium paid or discount received, which is amortised or credited to revenue over the term of the investment.

(b) Values of Government stock:

	1983	1982
	\$	\$
Face value	21,059,660	18,581,660
Less: Unexpired discounts	688,457	354,851

Book value	20,371,203	18,349,186
Market value	18,286,571	16,480,761

3. *Other Investments—*

All investments, other than Government stock are shown at cost price, and all are expected to realise the reported amounts at maturity.

4. *Interest:*

(a) Interest on Investments—Interest on Investments is brought into revenue during the period in which it is earned, rather than the period during which it is received.

(b) Personal Loans—The policy is to add interest to the full advance at the commencement of the loan, and this amount is brought into revenue during the appropriate financial year by applying the "Rule of 78".

(c) Accrued Interest on Investment Accounts—Interest accrued on depositor's investment accounts has been calculated at the full rate payable on the assumption that all deposits go through to maturity.

5. *Fixed Assets—*

Land and buildings are shown at a registered valuers current valuation less accumulated depreciation. All other assets are shown at cost less accumulated depreciation.

6. *Depreciation—*

Office equipment	10 years
Furniture	10 years
Vehicles	5 years

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31 MARCH 1983

1. *Statement of Accounting Policies:*

- (a) *General accounting policies*—The accounting policies recognised as appropriate for the measurement and reporting of results and financial position under the historic cost method of accounting have been adopted on a basis consistent with the previous year.
- (b) *Recognition of income*—The income earned is recorded on an accrual basis and includes the amortization of premiums and discounts on the purchase of Government and Local authority stock. Interest on personal loans is calculated according to the rule of 78.
- (c) *Expenditure*—Interest on depositor's accounts represents interest paid, credited or accrued for the financial year ended 31 March 1983. Other expenses, including computer development costs, are charged to the accounts in the year in which the expenditure is incurred.
- (d) *Fixed assets and depreciation*—Fixed assets are valued at cost less accumulated depreciation. Depreciation has been charged using the straight line method based on the economic life of the assets.
- (e) *Taxation*—Taxation charged against net profit is the estimated expense relating to the result of the year. It includes an amount for taxation, the payment of which is deferred to future periods, because taxation practice differs from accounting policies in the treatment of:

- (i) Interest accrued on investments.
  - (ii) Depreciation charges.
  - (iii) The amortization of profits and losses in respect of Government and Local authority stock purchases and sales.
- (f) Valuation of investments—All investments are shown at cost with the exception of New Zealand Government stock. On the basis Government stock will normally be held to maturity the bank considers it appropriate to record such stock at nominal value. Differences between cost and nominal value are immaterial and have been transferred to interest received or interest paid at the date of purchase.
