*The Eiffelton Irrigation Order 1984*

DAVID BEATTIE, Governor-General

ORDER IN COUNCIL

At the Government Buildings at Wellington this 27th day of February 1984

Present:

THE HON. W. F. BIRCH, PRESIDING IN COUNCIL

PURSUANT to the Public Works Act 1981, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council hereby makes the following order:

ORDER

1. This order may be cited as the Eiffelton Irrigation Order 1984.
2. The area of land described in the Schedule hereto is hereby constituted as an irrigation district, to be known as the Eiffelton Irrigation District (herein referred to as "the district").
3. **Irrigation Scheme Headworks and Off-farm Works**—The Minister of Works and Development is hereby authorised to construct, maintain and control the irrigation scheme headworks and off-farm works which are proposed to consist of a total of 10 wells with the associated pumps and ancillary electrical equipment. These will be situated at strategic points within the district boundary adjacent to the Deals, Windermere and Home Paddock drains. Water will be pumped into the drains to supplement existing flows and will be utilised by the farmers operating their own on-farm pumping systems for sprinkler irrigation.
4. **Annual Basic Charge**—Every occupier shall pay, as a minimum, the annual basic charge on all irrigable land within the district. This basic charge shall be \$7.30 per irrigable hectare. The irrigability of any land is assessed from the nature of the land, the capability of the water supply works to supply water and availability of the water supply. The basic charge is intended to recover the farmer's share of the capital costs of the headworks and off-farm works.
5. **Annual Water Availability Charge**—The annual water availability charge replaces the annual basic charge if equal to or greater than the annual basic charge. The annual water availability charge shall be \$20.37 per unit rate of supply. One unit rate of supply is 150 m<sup>3</sup>/week. This is the design requirement for irrigating 1 hectare of land. This charge is intended to recover the basic charge plus the cost of operation, maintenance and renewal of the scheme.
6. **Reduction in Charges During Development Period**—There will be no reduction of charges and the charges will be at the full rate from the notified commencement of availability of supply of water.
7. **Period of Charges**—The number of seasons of supply over which charges will be payable will be 15 years from the notified time of commencement of availability of supply of water.
8. **Basis of Charges**—The charges are based on the estimated costs of the proposed scheme in terms of December 1982 money values. The basic charge is based on recovering 30 percent of the currently estimated \$483,000 capital cost of construction of the scheme headworks and off-farm works plus interest at a rate of 9 percent, this being the appropriate current Rural Banking and Finance Corporation of New Zealand interest rate as at the date of the notification of this scheme under section 202, Public Works Act 1981. A scheme irrigable area of 2462 hectares has been used. The water availability charge includes in full the estimated cost of operation and maintenance of the scheme.
9. **General Objectives of Scheme**—The general objectives of the scheme are to provide additional irrigation water for agricultural purposes for land deemed suitable for irrigation.
10. **Capability of Scheme**—The nominal scheme irrigable area is 2462 hectares generally. It is calculated that the scheme will provide sufficient additional water, by pumping to supplement existing water resources in the 3 drains and taking due regard of stock water and

fisheries requirements, for farmers to apply up to 150 m<sup>3</sup>/ha/week over their irrigable area.

**11. General Conditions of Supply**—Water will be supplied to those areas for which water availability agreements have been drawn up.

**12. Factors Affecting Supply**—Supply may be limited by unavailability of water from the drains due to water right restrictions, pump failure or reduced well yields. A roster will be imposed on each drain.

**13. Scheme Programme**—The required wells will be sunk and pumps installed within 1 year of approval. Subject to Government approval and allocation of funds, it is planned to complete the scheme works in time to have water available to the whole irrigation district for the 1984–85 irrigation season. It is expected that some parts of the scheme may receive water in the 1983–84 irrigation season.

**14. Required Voting Majority**—The Minister of Works and Development confirms that the required minimum of 80 percent of the valid votes cast in the poll were in favour of the proposed irrigation scheme.

**15. Irrigation Season**—The irrigation season shall be between 1 September and 30 April. Scheme charges incurred over the preceding 12 months will be invoiced as at 30 April of each year and due for payment without penalty within 28 days of date of invoice.

**16. Minimum Area**—The minimum aggregate area of land occupied by any occupier that it is proposed to include in the proposed irrigation scheme shall be four (4) hectares.

This consolidated amendment makes changes to several chapters of NZS 1900 of an editorial nature:

- as consequential amendments resulting from amendments or revocation of Standards referred to in the Model building bylaw;
- deletes definitions which are not appropriate to the bylaw;
- provides for the redefinition of Standards from documents incorporated in the bylaw by reference, to means of compliance. This is done to simplify the publication of MP 101 and reduce the extent of documents incorporated by reference in the bylaw;
- to include a standard clause in the bylaw, commonly included in means of compliance Standards, providing for reference to named Standards to be taken as including amendments to those Standards.

Copies of the standard specifications so amended may be ordered from the Standards Association of New Zealand, Wellington Trade Centre, 15-23 Sturdee Street (or Private Bag), Wellington.

Copies of the amendments will be supplied free of charge upon request, unless where otherwise stated.

Dated at Wellington this 1st day of March 1984.

Management has been described as "what managers do". But what is that? Getting things done? Getting other people to do them? Using resources economically? And what does the 'effective' manager do? This book looks at answers to such questions. It has been written as an introduction to the subject, especially for New Zealand managers who want to manage their organisation better.
