NOTES TO THE ACCOUNTS

1. Statement of Accounting Policies—

The general accounting principles as recommended by the New Zealand Society of Accountants for the measurement and reporting of results and financial position have been followed in the preparation of these financial statements.

- the measurement base adopted is that of historical cost
- accrual accounting is used to match expenses and revenues

The following particular accounting policies which significantly affect the measurement of the Bank's profit and financial position have been applied on a basis consistent with previous years.

Depreciation—Depreciable fixed assets are depreciated on a straight line basis at rates estimated to write off the cost, less residual value, over the useful life of each class of asset. The principle rates in use are:

- Buildings: 1 percent and 2½ percent
- Office equipment, fixtures and fittings: 10 percent and 20 percent
- Computer equipment: 12 percent

New Zealand Government Stock—

New Zealand Government stock is recorded at par value less discount on acquisition which is amortised over the term of the investment on a straight line basis.

The stock is held pursuant to ratio requirements and under normal circumstances is held to maturity. Periodically stock is sold to improve interest yield.

2. Term Investment Accounts—

	1984 \$	1983 \$
Under 1 year	52,167,494	36,660,331
1–2 years	12,601,667	18,406,409

3–5 years	6,556,310	4,496,690
	<u>\$76,202,143</u>	<u>\$64,219,882</u>

3. Taxation—

The charge for income tax is the amount of tax liability in respect of the accounting profit for the year.

The liability for deferred taxation arises from items of income and expenditure being included in taxation calculations in periods different from those in which they are dealt with in the financial accounts. The significant timing differences relate to depreciation and accrued income.
