Guide to Import Licence Tendering (Excluding Tendering under ANZCERT) November 1984

(This supersedes the Guide issued in January 1984)

INTRODUCTION

1. These notes set out the provisions for tenders called from time to time for the issue of global import licences including those under industry development plans. Special provisions might be introduced for tendering under industry development plans from time to time. Other guide notes cover the special provisions for tendering under the Australia/New Zealand Closer Economic Relations Trade Agreement which relates to goods from Australia only.

2. Import licence tendering derives from the Import Control Regulations 1973, Amendment No. 3 and is administered by the Department of Trade and Industry. Except as may be stipulated in this guide, licences granted under tendering will be subject to the usual procedures, and terms and conditions, laid down pursuant to the Import Control Regulations 1973, and nothing in these guidelines limits any provision of those regulations.

3. The Registrar of Import Licence Tendering administers tendering. The address is P.O. Box 3146, Wellington.

4. The objectives of import licence tendering are:

- to allocate import licences on an open and competitive basis;

- to introduce more import competition into the domestic production sector;
- to widen the base of information available on industry competitiveness so as to facilitate the move away from import licensing to the Tariff as the main means of protection.

WHO MAY BID

5. Import licence tendering is open to all entities which are entitled to obtain an import licence in normal circumstances, i.e., persons or firms domiciled in New Zealand (see Import Licensing Schedule for "Who Can Apply").

REGISTER OF TENDERERS

6. A Register of Tenderers is maintained by the department. Each tenderer is allocated a confidential registration number. The registration number must be entered on all bid forms submitted. The Registrar may require a tenderer on the Register to provide evidence of the intention and ability to import the goods bid for. If satisfactory evidence is not forthcoming the tendering bids could be declared invalid and the registration cancelled.

7. Tenderers on the Register receive free of charge all mailings of the Calls for Tenders, other notes, confirmation of the confidential registration number and a supply of bid forms.

8. Tenderers who submit bids without first having been allocated a registration number will be given their number at the opening time. They will be required to use this number in tenders thereafter.

*Any Change to Information Held on The Register Should Be Notified to The Registrar*

CALLS FOR TENDERS

9. Calls for Tenders will specify the tender number, the item code, the tariff item, a brief description of the goods involved, the total number of licence units to be tendered under each tender number (each unit is for \$2,000 unless otherwise stated). Each separate Call for Tenders is referred to as a Round. The Call for Tenders is normally open for at least 21 days.

10. The Call for Tenders is published in the *New Zealand Gazette* or in supplements to the *New Zealand Gazette*. These are posted to tenderers on the Register or may be purchased from bookshops of the New Zealand Government Printer. These bookshops are listed at the back of these notes.

11. The Registrar may amend the Call for Tenders and withdraw tenders where necessary. Amendments will be published in the *New Zealand Gazette*. The Registrar may attach conditions to tenders.

HOW TO BID

12. Bid forms T&I 335C are supplied with the mailing of the *New Zealand Gazette* or they may be obtained from any office of the department. The forms are designed to allow 5 bids under 8 different tender numbers. If more than 5 bids per tender number are required 2 or more bidding panels may be used for the same tender number. To complete the bid form:

- Fill in the correct tender number from the *New Zealand Gazette* in each of the bidding panels used.
- Enter the number of licence units sought (each unit is for \$2,000 unless otherwise stated).
- Enter the amount bid per unit. Zero bids may be made. Zero bids should be entered as 0. Other bids should be in whole dollars.
- Enter your registration number. *Failure to do so will invalidate the bids.* See paragraph 8 however.
- Fill in the importer's code. This may be obtained from the Customs Department. This is used as a check on the computer against the registration number. Failure to enter this code will not of itself invalidate bids.
- Fill in the name and address section.
- Sign the form. *Failure to do so will invalidate the bids.*

**The Bid Must be Typed and Signed in Ink.**

**Several Bids Forms May be Sent in One Envelope.**

**Only Original Typed Bids Should be Sent.**

**Carbon Copies Are Not Accepted.**

**Duplicate Copies Are Not Required.**

RESPONSIBILITY FOR CLASSIFICATION

13. It is the responsibility of the tenderer to ensure that the goods to be imported against a given tender number are correctly classified in the Tariff Item(s) and/or Statistical Keys included in the relevant tender number. It is likewise the responsibility of the importer to observe all statutory regulations pertaining to the goods concerned.

IMPORT DOCUMENTATION

14. Tender import licences are frequently issued on a Tariff Item or Statistical Key basis. It is essential that the descriptions of goods on overseas suppliers' invoices are in accordance with descriptions in the New Zealand Customs Tariff, i.e. the description must be sufficiently specific to enable Port Officers to determine the appropriate Statistical Key for the goods when they are being cleared.

**Failure to Describe Goods Appropriately on Import Documents Could Lead to Delays in Clearance.** It is the responsibility of the importer to instruct his supplier as to how the goods should be described. In any cases where importers consider that the description on the overseas suppliers' invoices are insufficient for Custom Department purposes, additional material should be supplied to enable Statistical Keys to be verified.

#### CLOSING OF BIDS

15. Bids must be received by the Registrar of Tenderers in Wellington by the closing date and time specified in the Call for Tenders.

16. Bids may be submitted by post, courier, the Post Office Bureau fax system or by hand. Bids will not be accepted on other than the official bid form. Bids should be addressed to the Registrar of Tenderers, P.O. Box 3146, Wellington, and envelopes should be clearly marked "Import Licence Tender" in the bottom right hand corner of the envelope. This avoids bids being opened in error.

17. Withdrawals and substitute bids will be accepted up to 10 a.m. the day after the closing date.

18. Substitute bids must be clearly marked **Substitute** and be filled out correctly and the tender number and bids to be cancelled or amended must be clearly identified.

19. The Registrar may extend the closing date where necessary.

#### LATE BIDS

20. Bids received after the closing time will not be accepted. A photocopy of late bids and envelopes will be sent to the tenderers concerned.

#### PROCESSING OF BIDS

21. Bids are opened under the supervision of a Justice of the Peace. Each bid is given a security number. A computer tape is then prepared. The registration number is entered at this stage to identify each tenderer and to produce the correct name and address on result letters, invoices and licences. It is extremely important therefore to enter the registration number on all bid forms. Until the bids are processed and a computer print-out is obtained it is difficult for staff to confirm the arrival of particular bids.

#### INVALID BIDS

22. The following aspects, individually or together, are the main factors making a bid invalid:

- (a) No tender number recorded or other information lacking.
- (b) Registration number not entered by a registered bidder.
- (c) Bid not legible.
- (d) Bid not signed.
- (e) Late Bid.
- (f) Bidder does not meet requirements under Who May Bid.
- (g) Non-existent or past tender number entered.
- (h) Bid made on incorrect type of bid form.
- (i) Bids from overdue debtors.

#### DETERMINATION OF RESULTS

23. The highest bids win the licence units available. If insufficient units are available to satisfy the requirements of the lowest winning bidder, that tenderer may forego accepting the licence offered.

24. Where the lowest winning bids are all at the same rate per licence unit, the computer is programmed to make a random choice of the winning bid.

25. The value of all winning bids made by a tenderer in any particular tender number will be amalgamated into one licence. The premiums due for such licence will likewise be amalgamated into one invoice.

#### ANNOUNCEMENT OF RESULTS

26. The results of each tenderer's bids are sent out on a computer printed letter. These are usually ready within a month of the closing of bids. Not until the results are ready for despatch will results be given over the telephone.

27. A period of usually 5 days is allowed for questions to be raised about the results contained in the result letters. Copies of all results on the computer print-out are available for inspection at all offices of the department shortly after the result letters are posted.

#### PUBLICATION OF RESULTS

28. All results are published in the *New Zealand Gazette*. These become available usually within a month of the notification of individual results.

29. Copies of the *New Zealand Gazette* may be obtained on a subscription basis from the New Zealand Government Printer on a March year basis on payment of \$30. Payment should be made direct to the Subscription Clerk, Government Printer, Private Bag, Wellington. Alternatively, copies may be obtained through the bookshops of the Government Printer.

#### WAIVING OF BIDS

30. The Registrar may use his discretion to waive bids where a gross error is brought to his attention by the bidder. Where a bid

is waived after the announcement of results, a substitute bid will not be accepted and no adjustment will be made to the results.

#### INVOICES

31. Invoices are sent to all successful bidders shortly after the announcement of results. The premiums due must be paid within 6 months of the date of the invoice. The payment date will be shown on the invoice.

#### ISSUE OF LICENCES

32. Tender licences are in general valid for a year from the date of the invoice. Licences are issued by the department in Wellington on payment of the premium. Payment must *not* be made before invoices are received. The invoice should be returned at the time of payment.

33. Payment by *bank cheque* allows the department to issue licences more promptly than if payment is made by personal cheque. Other cheques take up to 15 working days to be cleared through the banking system.

34. Payment should be made to the Finance Officer, Department of Trade and Industry, Private Bag, Wellington.

#### NON-PAYMENT OF PREMIUMS

35. Before the final date for payment of premiums for any round a final payment notice is sent to licence winners who have not yet redeemed their licences. If at the end of the payment period any licences are still unredeemed, the tenderer will be barred from all further tendering for a period of 2 years or alternatively until payment has been received.

36. To re-enter the tendering scheme within the 2-year period outstanding debtors will be required to pay overdue premiums *without* the issue of the associated licence. These provisions apply to all transactions covered in these notes.

37. Unredeemed licence will normally be re-tendered in a following round and will not therefore be available to be uplifted or assigned after the payment period.

#### LICENCES NOT BID FOR

38. Where there are more licences available than bid for this is recorded in the results shown in the *New Zealand Gazette* under the tender numbers concerned. The results will show the average weighted premium for each such tender number. These licences will be available at this cost.

39. Licences not bid for in a particular round will be allocated among applicants 3 weeks after the date of publication of the results gazetted. This delay is designed to give applicants in all parts of the country equal opportunity to apply for this licence. The licences will be valid only for the balance of the licence year applicable to the round concerned. Invoices will be payable by the same payment date for that round.

40. Where more licences are applied for than is available, the computer will be programmed to make a selection.

41. Licences obtained in this way will qualify for continuity licence if the licence is redeemed within the payment period for that round of tenders.

42. Any licence left over after this initial allocation has been completed will be available *on request* at the premium indicated above at any time during the period of validity of the licence. These licences will be valid for the balance of the licence year concerned. These licences must be paid for when the invoice is received. If payment is not received promptly the licence may be allocated to another applicant.

43. Licence referred to in paragraph 42 will not qualify for continuity licence.

44. Licence not bid for will not be available to overdue debtors.

#### CONTINUITY LICENCE

45. Successful tenderers may elect to carry over up to 50 percent of the total value (or volume) of licence won in tendering in 1 year into the following year. Continuity licence will be issued after invoicing and on payment of the appropriate proportion of the premium paid for the original licence. Licences and invoices will be made out to the nearest dollar.

46. This option will be offered to tenderers after the end of the 6-month payment period and in time to allow for appropriate adjustments to be made to the amount of licence available for tender in the next year.

47. Licences will be available for a period of one year starting with the next tender licence period. Invoices will be for payment within 6 months of the licence starting date. However, it should be noted that:

- (a) Tender licence which has been assigned to another party will not qualify for carryover by either party.
- (b) Licences which have been less than 75 percent used will not qualify. A declaration of actual and intended licence usage will be required.
- (c) Licence entitlement carried over into a second year will not qualify for the third year.

## EXTENSION OF LICENCE

48. Tender licences will not be extended beyond their expiry date except in the circumstances outlined below. In cases where goods have been ordered in time to arrive before the licence expires but are delayed for reasons outside the importer's control (e.g. delay of ships) licences can be extended for 60 days beyond their expiry date by an endorsement of the licence by a Customs Licensing Officer. Requests for such extensions of licences must explain the reasons for the delay, provide evidence that the goods were ordered in time to arrive before the expiry of the licence and that they will arrive within the 60 day extension period. Applications for such extensions must be made before the licence expires. Substitute licences will not be issued.

## ASSIGNMENT OF LICENCE

49. Tender licences may be assigned to another party where the parties concerned signify their agreement to this to the Registrar on the appropriate form which is available from any office of the department. All or part of the licence may be assigned to one or more other parties. Although either party may pay the premium, the ultimate responsibility to ensure payment is made is with the original tenderer.

50. The assignment will not be granted where the receiving party is already barred from tendering because of non-payment. Assignment may not be granted where the Customs Department raises valid objections to the transaction. The assignment may be refused where it is, in the view of the Department of Trade and Industry, likely to be contrary to the objectives of tendering.

## LICENCE USAGE

51. As tendering aims to provide increased opportunities for importers, to foster competition and to provide information relevant to the measurement of protection for domestic producers, tender licence-holders are expected to make full use of their licences. The department monitors the use of tender licences.

52. If it is established that any tender licence-holder may be frustrating the aims of tendering by substantially under-using tender licence the company and possibly subsidiaries and associates will be barred from tendering for a 2-year period. The use of less than 75 percent of licence would generally be regarded as substantial under-utilisation.

## SALES TAX AND DUTY

53. The goods imported will be subject to the appropriate rate of duty and sales tax where applicable. The assessment of sales tax payable on goods imported under tender licences will include the amount of the tender bid.

## COMPANIES IN RECEIVERSHIP/LIQUIDATION

54. If during the 6-month payment period a company should go into receivership or liquidation, the Receiver will be regarded as having responsibility for any premiums due and licences available. The Receiver may take the option of assigning such licence.

55. If the Official Assignee does not exercise that option all licences will be considered void and may be re-tendered in a future round. The Receiver may continue to lodge bids for a company in receivership while it is still trading.

## TAKEOVER/MERGER OF COMPANY

56. If a company is taken over or merged during the 6-month payment period any unredeemed licence will be regarded as being the responsibility of the new company.

57. A company already barred which is taken over will continue to be barred for the required period unless outstanding premiums are paid.

## GOODS MADE EXEMPT

58. Where goods are made exempt during the period of validity of a licence, a refund or part refund may be allowed against premiums paid where the whole item code is made exempt. The refund will be in proportion to the amount of licence used at the date of the exemption. Tenderers should apply in writing to the Registrar. Premiums not yet paid will be waived.

59. Where the goods in a tender number become only partially exempt, importers should produce import entries to show the c.i.f. value of exempt goods imported against the licence. A pro-rata refund of the calculated balance of the premium will be made according to the value of the exempt goods already imported. Premiums on licences not yet redeemed will be waived in total on production of satisfactory evidence that only the exempt goods were to be imported.

## RECLASSIFICATION OF GOODS

60. Where goods are reclassified by the Customs Department after the issue of a licence, the licence will be endorsed by the Collector of Customs to allow the importation of the goods originally tendered.

## SHORTFALL OF LICENCE

61. Additional tender licence cannot be issued to cover shortfall in licence value. Imports in excess of the value of licences held will

be regarded as goods arrived in terms of the section "Importation of Goods without Licence or Permit" in Annex III of the Import Licensing Schedule.

## LOST OR DESTROYED LICENCES

62. If a licence is lost or destroyed, the appropriate declaration should be made with the Collector of Customs. The value of any balance on the licence should be certified where possible by the Collector. The declaration should then be forwarded to the Registrar.

## PILLAGED GOODS

63. Details of the value of pillaged goods, insurance documents and marked-off licences should be submitted to the Registrar.

## LPG Fuel System Approvals—Concessional Fuel Cylinder Approvals

PURSUANT to regulation 90B of the Traffic Regulations 1976\* (as inserted by the Traffic Regulations 1976, Amendment No. 7) and pursuant to the powers delegated to me by the Secretary for Transport, I, Robert Norman Abram, Chief Automotive Engineer, hereby approve the components listed in the Schedule hereto for inclusion in any LPG automotive fuel system installed and operated in accordance with the requirements of New Zealand Standard NZS 5422., Part 1, 1980 (and any standard made in amendment thereto or in substitution thereof) subject to the conditions of approval set out in respect of any component in the said Schedule.

SCHEDULE  
LPG FUEL CYLINDERS

| MOT Reference | Manufacturer                | Country of Origin | Specification | Material | Inspection Authority | Working Pressure Rating (MPa)<br>(250 psi) | Test Pressure (MPa)<br>(375 psi) | Nominal Water Capacity (litres)<br>(26.6 US gals) |
|---------------|-----------------------------|-------------------|---------------|----------|----------------------|--|----------------------------------|---|

CONDITIONS OF APPROVAL

LPG fuel cylinders are approved subject to the following conditions—

1. That they be permanently and clearly marked, on a suitably attached metal plate, with characters not less than 6 mm high if space permits but in any case not less than 3 mm high, displaying the following information:

- (a) The specification to which the cylinder was manufactured.
- (b) The manufacturer's name or mark and the serial number of the cylinder.
- (c) The date of the original cylinder inspection and the identification mark of the inspection authority who made the inspection.
- (d) The date of any periodic cylinder test and the identification mark of the cylinder testing station who made each test.
- (e) The cylinder test pressure.
- (f) The nominal water capacity of the cylinder.
- (g) The tare weight of the cylinder.

2. That they be clearly marked or labelled to indicate that the cylinder is suitable for use with LPG.

3. That they be provided with valve threads and fittings which provide the following functions:

- (a) Filling connection incorporating a non-return valve.
- (b) Service valve incorporating an excess flow valve.
- (c) Contents gauge.
- (d) Safety valve.
- (e) A fixed liquid level indicator or an automatic fill shut off device which prevents the cylinder being filled beyond 85 percent of the total cylinder capacity.

Valves and fittings shall have a service pressure rating of at least that of the cylinder to which they are fitted and shall be dimensioned, threaded and marked in accordance with the requirements of section 2.3 of New Zealand Standard NZS 5422 "The use of LPG and CNG Fuels in Internal Combustion Engines—Part 1 LPG Fuel".

4. That they be tested at periods not exceeding 5 years in accordance with the requirements of Australia Standard AS 2337-1980 or in accordance with the periodic test requirements laid down in the specification to which the cylinder was manufactured.

5. That they be fitted to a motor vehicle in such a position that they will not be subject to the direct rays of the sun, either by fitting them within a suitable vehicle compartment, or by providing a suitable shield if the cylinders are fitted to the exterior of the vehicle.

6. The terms of this approval do not allow the continued importation of such LPG fuel cylinders and it does not apply to cylinders which have not been installed in a motor vehicle by 31 December 1985.

NOTES: The effect of this notice is to allow the continued use of LPG fuel cylinders which are known to have been imported into New Zealand prior to the introduction of the Dangerous Goods (Class 2—Gases) Regulations 1980 and which were acceptable under the previous dangerous goods requirements, but whose working pressure rating would disqualify them for approval for general use under the Traffic Regulations 1976. They are approved subject to the additional proviso that they must not be exposed to direct sunlight (to reduce the possibility that solar radiation would raise the temperature of the contents of the cylinder such that the developed pressure of the cylinder contents exceeded pressure rating of the cylinder).

Dated at Wellington this 25th day of October 1984.

R. N. ABRAM, Chief Automotive Engineer.
