*The Kapiro - Pungaere Irrigation Order 1984*

DAVID BEATTIE, Governor-General  
ORDER IN COUNCIL

At the Government House at Wellington this 19th day of November 1984

Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL

PURSUANT to the Public Works Act 1981, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby makes the following order.

ORDER

1. This order may be cited as the Kapiro - Pungaere Irrigation Order 1984.

2. The Minister of Works and Development is hereby authorised to construct, maintain and control the water supply works described in the First Schedule hereto to serve the district described in the Second Schedule hereto.

3. The area of land described in the Second Schedule is hereby constituted as an irrigation district to be known as the Kapiro - Pungaere Irrigation District (herein referred to as "the District").

4. The annual basic charge payable in respect of irrigable land within the irrigation district and served by the scheme shall be \$130 per hectare.

5. The annual water availability charge payable in respect of water supplied shall be \$140 per 1000 cubic metres.

This will entitle the occupier to use up to a total of 1500 cubic metres of water per irrigable hectare per season over the area subject to a water availability agreement. This will result in an effective minimum charge of \$210 per hectare. Extra water will be available up to a total of 1000 cubic metres per hectare in any irrigation season, and the occupier shall be liable for an extra water charge based on the actual quantity used and at the same price per 1000 cubic metres as for the water availability charge.

In some seasons water supply may be reduced by the Minister of Works and Development for that season as provided for in section 218 of the Public Works Act 1981, and the charge may be reduced.

6. Water charges under section 214 of the Public Works Act 1981 shall be payable over 30 seasons of supply, commencing from the availability of water.

7. The annual basic and water availability charges shall be reduced for the first six seasons of supply as shown in the Third Schedule. The reductions, together with the interest thereon, shall be debited to the appropriate scheme account, and recovered over the subsequent 24 years.

8. The water for the scheme is to be taken from an existing reservoir on the Waipapa Stream and will maintain a piped supply of irrigation water at a minimum pressure of 150 kilopascals to 939 hectares of irrigable land in the District for the irrigation of sub-tropical fruits. The works are capable of supplying 2500 cubic metres of water per irrigable hectare per season at a maximum rate of 3.5 millimetres over a 24-hour period.

9. The charges have been based on the total estimated headworks and off-orchard costs plus the costs of operation, maintenance and renewals and the demand for water, as stated under sections 209 and 211 of the Public Works Act 1981, and shall be subject to adjustment at the commencement of the availability of supply, at the end of the seventh season of availability of supply, and every 2 years thereafter to compensate for any difference in any element of these charges as allowed for under sections 210 and 212 of the Public Works Act 1981.

10. The season shall be that period commencing on the 15th day of September and ending on the 30th day of April next following.

11. The minimum aggregate area of land occupied by any occupier that is to be included in the District shall be eight (8) hectares.

## NOTICE

1. **Title**—(1) This notice may be cited as the Standard Grade for the Export of Cherries Notice 1984.

(2) This notice shall come into force on the day after the date of its notification in the *New Zealand Gazette*.

2. **Interpretation**—Unless the context otherwise requires, terms and expressions used in this notice shall have the same meaning as in the New Zealand Grown Fruit and Vegetables Regulations 1975\*. Certain of these terms and expressions as applicable to cherries are defined in the First Schedule to this notice.

3. **Application of Notice**—This notice determines the standard grade for the export of cherries from New Zealand.

4. **Title and Grade**—The grade mark assigned to this standard grade shall be Class 1 (hereinafter referred to as “the grade”).

NOTE—Consignments to European markets may have to meet specific OECD grade requirements. Refer to Second Schedule for further information.

5. **Definition of Produce**—This grade applies to cherries grown from varieties of *Prunus avium* (L) and *Prunus cerasus* (L), to be supplied fresh to the consumer.

**6. Provisions Concerning Quality**—The purpose of this standard is to define the quality requirements for cherries at the dispatching stage, after preparation and packing.

- (a) The cherries must be:
- free from pests and diseases and meet any quarantine and other legal requirements of the importing country;
  - intact, whole fruit;
  - sound;
  - clean;
  - reasonably well formed—typical of variety and not more than slightly misshapen;
  - free from abnormal external moisture; and

They must have matured sufficiently to complete the ripening process and be able to withstand handling, storage and transport to meet the market requirements at the place of destination.
- (c) The cherries must be of good quality and have characteristics typical of the particular variety. The following may be accepted:
- A slight defect in shape or development;
  - A slight defect in colouring.
- The cherries must be free of defects such as burns, cracks, bruises and hail damage which:
- (i) may significantly impair the general appearance or keeping quality of the fruit, or;
  - (ii) are likely to make the fruit unattractive to the purchaser.

**7. Provisions Concerning Sizing**—Sizing is determined by the maximum diameter of the equatorial section. The minimum size allowed for export is 20 mm.

**8. Provisions Concerning Presentation:**

(a) Uniformity

The contents of each package must be uniform; each package must contain only cherries of the same origin, variety, quality, degree of ripeness and size.

The visible part of each package must be representative of the entire contents.

(b) Packaging:

The cherries must be packed in such a way as to ensure that they are suitably protected.

The materials, and particularly the paper used inside the package, must be new, clean and of a quality such as to avoid causing any external or internal damage to the produce. The use of materials and particularly of paper or stamps bearing trade specifications is allowed provided that the printing or labelling has been done with a non-toxic ink or glue.

SECOND SCHEDULE

GRADE REQUIREMENTS FOR EUROPEAN MARKETS

1. Some European countries are members of the OECD Scheme for the International Standardisation of Fruit and Vegetables and as such NZMAF is required to supply an OECD Control Certificate stating that the produce conforms to the OECD scheme's grade standards.

2. Before exporting cherries to a European country, exporters should check with a Regional Ministry of Agriculture and Fisheries office to ascertain if the importing country requires a control certificate, and obtain a copy of the OECD grade standards.

Notwithstanding clause 2 of this Schedule it is the responsibility of the exporter to ensure that produce exported meets the legal requirements of the importing country and the specifications of the importer.

GENERAL INFORMATION

THE following explanatory notes do not form part of this standard grade, but are presented for the information of growers/exporters.

1. In order to certify produce fit for export a certifying officer may require information from the exporter to the effect that the property on which the fruit was produced has been registered for export. It is the responsibility of the exporter to obtain this information from the Executive officer of the New Zealand Stonefruit Export Council.

2. To assist with the interpretation of “sound” fruit that has not been exported within 18 days of harvest will be considered unsound.

3. Growers and Exporters must ensure that fruit is kept under optimum storage conditions between harvest and dispatch.

4. Cherry varieties maturing before Pellissier or Dawson should not be exported to Australia as it is considered that they would not be able to withstand handling and meet the market requirements.

Dated at Wellington this 28th day of November 1984.

Director-General of Agriculture and Fisheries.

*The Standards Act 1965—Overseas Specification Available for Comment*

PURSUANT to subsection (3) of section 23 of the Standards Act 1965, notice is hereby given that the under-mentioned overseas specification is being considered for declaration as a New Zealand specification.

Number and Title of Specification

AS 1753:1983 Webbing for restraining devices for occupants of motor vehicles. \$21.50

The 1975 edition of AS 1753 was adopted in New Zealand as NZS 5432:1981 and it is now proposed that AS 1753:1983 should be declared as NZS 5432:1985.

This standard specifies requirements for webbing for restraining devices. It provides classification, material and construction, testing, identification of each roll of webbing, and packaging requirements. Methods of test are given in the appendices.

This 1983 edition provides a full matrix of webbing widths and dry breaking forces, so that although some classes are not currently called for there are now 26 classes of webbing provided instead of the 9 in the previous 1975 edition.

All persons who may be affected by this specification and who desire to comment thereon, may obtain copies from the Standards Association of New Zealand, Wellington Trade Centre, 15-23 Sturdee Street (or Private Bag), Wellington, at the price shown.
