## NOTES TO THE FINANCIAL STATEMENTS YEAR ENDED 30TH SEPTEMBER 1984

## 1. STATEMENT OF ACCOUNTING POLICIES—

General Accounting Policies—The measurement base adopted is that of historical cost. Reliance is placed on the fact that the company is a going concern.

Accrual accounting is used to match expenses and revenues.

## Significant Particular Accounting Policies—

## Valuation of Investments—

New Zealand public securities are valued at cost adjusted annually for the proportion of discount or premium on purchase so as to allow redemption value by maturity date.

Whilst in the ordinary course of business some realisation of New Zealand public securities may take place at prices below book values, in the majority of cases these securities are held to, or close to maturity dates when they would be redeemed at face value. Accordingly, no provision is made for any difference between book value and market value of individual securities.

## Sale of Public Securities—

Profit or losses realised on sale of public securities are reflected in the statement of profit in equal annual instalments over the unexpired period to maturity or five years, whichever is the shorter.

## Taxation—

The liability method of interperiod tax allocation has been applied primarily in respect of public security interest income.
