## NOTES TO THE ACCOUNTS

*A. Statement of Accounting Policies:*

The measurement base adopted is that of historical cost with the exception of land and buildings which have been valued at 90 percent of current valuation. Reliance is placed on the fact that the bank is a going concern.

Accrual accounting is used to match expenses and revenues.

The following particular policies which significantly affect the measurement of profit and of financial position have been applied:

*Note 1: Depreciation:*

All assets with the exception of land and buildings are recorded at cost less depreciation to date. Depreciation has been charged using the straight-line method based on the estimated economic life of assets. The following are the estimated lives of major asset categories:

Buildings	50-100 years
Furniture and fittings	10 years
Office equipment and plant	7-10 years
Security equipment	20 years
Computer equipment	7 years
Vehicles	5 years

*Note 2: Government Stock:*

Total discounts and premiums on Government stock securities are amortised over the term of the investment on a straight-line basis. The value of the stock in the balance sheet is shown at its cost price adjusted by amortised discount or premium to date.

*Note 3: Personal Loans:*

The Bank's policy is to add total interest due to the loan when advanced, and interest revenue is recognised on the basis of the "Rule of 78".

*Note 4: Taxation:*

(a) The provision for income tax charged in the revenue statement is the calculated tax liability in respect of the accounting profit after adjusting for permanent differences.

(b) The provision for deferred taxation arises from items of income and expenditure being included in taxation calculations in periods different from those in which they are dealt with in the financial accounts.

*Note 5: Change in Accounting Policy:*

There has been a change in accounting policy in that some fixed assets were previously depreciated on the diminishing value basis. It is not considered that this change will have any material effect on results or financial position.

*B. Associate Company:*

The Bank's investment in Trusteebank Computer Limited has been shown in the accounts according to the standard accounting practice adopted by the New Zealand Society of Accountants for an associate company.

The investment is made up as follows:

	\$	\$
Debentures		563,000
Paid up shares		140,000
Share of accumulated profit brought forward		104,086
Plus share of profit for year	62,352

## AUDITORS' REPORT

We report that we have examined the balance sheet of the Trusteebank Bay of Plenty as at 31 March 1985 and the revenue statement for the year ended on that date, and have received all the information and explanations we have required.

In our opinion, the accompanying balance sheet and revenue statement present fairly the financial position of the Bank as at 31 March 1985 and the results of the operations for the year ended on that date, and were in general conformity with generally accepted accounting principles applied on a basis consistent with that of the preceding year.

We have also examined the statement of changes in financial position which, in our opinion, gives a true and fair view of the changes in financial position of the Bank for the year ended 31 March 1985.
