The Levels Plain Irrigation Scheme Renewal Order 1986

PAUL REEVES, Governor-General
ORDER IN COUNCIL

At Wellington this 21st day of April 1986.

Present:

HIS EXCELLENCY THE GOVERNOR-GENERAL IN COUNCIL

PURSUANT to sections 208 and 222 of the Public Works Act 1981, His Excellency the Governor-General, acting by and with the advice and consent of the Executive Council, hereby makes the following order:

ORDER

1. This Order may be cited as the Levels Plain Irrigation Scheme Renewal Order 1986.

2. This area of land described in the First Schedule hereto is hereby constituted as an irrigation district, to be known as the Levels Plain Irrigation District (herein referred to as "the district").

3. The Minister of Works and Development is hereby authorised to construct, maintain and control the water supply for the scheme works which shall comprise:

(i) Off-farm Works:

- (a) Headworks: The headworks utilise the existing structures built for the original Levels Plain Irrigation Scheme. Works will involve repairing and renewing the existing facilities, and upgrading the operation by automating the control of the amount of water taken in from the Opihi River and bypassed back to it. Provision will be made for the protection of fish within the scheme.

- (b) Distribution Works: These works will be the alteration or renewal of the existing open race supply system and the provision of wells. Wells will be provided, or where suitable (at the sole discretion of the Minister of Works and Development) existing wells purchased or leased and their use managed as an integral part of the scheme.

Off-farm works are funded initially by the Crown with 30 percent of the cost together with interest on balance owing recovered through water charges. The capital value of \$180,000 of the existing assets is included as part of the off-farm works capital costs.

(ii) On-farm Works:

For the Levels Plain Irrigation Scheme these works shall be for the renewal, upgrading, modifying, changing and installation of on-farm water distribution and application systems as are appropriate for the efficient distribution and application of water for irrigation in the Levels Plain Irrigation Scheme.

These works presently qualify for a Rural Bank and Finance Corporation Loan with deferral of principal and interest repayments for up to 3 years, subject to approval of an on-farm development plan by the Minister of Works and Development.

4. Water Charges—The accumulated deficit in the operation account will be written off on 1 May 1986 at the commencement of the transition period.

The water charges shall commence with the transition period which is planned to take 5 years. Estimates of the charges are set out in the Second Schedule hereto.

Charges will be reviewed annually and if necessary adjusted to take account of actual costs.

(i) Transition Period Charges:

The water charges to apply for the transition period shall comprise the transition period basic charge and the transition period water availability charge.

The transition period basic charge per hectare of land liable for the charge shall for the first season be \$2 (two dollars).

The transition period water availability charge per unit rate of supply of water allocated shall for the initial season be the charge that would have applied per hectare of land for a contract supply of water had the renewal of the scheme not commenced. The charge for 1986/87 shall be \$25.20 per hectare.

(ii) Annual Charges:

The water charges to apply from the end of the transition period shall be called the annual charges and shall comprise the basic charge and the water availability charge as determined in sections 209 and 211 of the Public Works Act 1981.

The basic charge repays the scheme's portion of the capital together with interest on balance owing over the repayment period.

The water availability charge repays the scheme's portion of the capital together with interest on balance owing over the repayment period, plus the operation and maintenance costs.

5. For the purposes of calculating the 'transition period basic charge' and the 'transition period water availability charge' the repayment period shall be 40 years.

The number of seasons of supply from the date of notification of commencement of supply shall be 35.

6. Allocation—On any day in the irrigation season one unit of water shall be the volume of water able to be taken from the Opihi River as permitted by the Opihi River Water Management Plan for that day multiplied by 7 and divided by the gross irrigable area in hectares served by the river intake, rounded to the nearest ten units and expressed in cubic metres of water.

One unit rate of supply shall be one unit of water per week, which has a maximum value of 400 m³/week/hectare, and will be reduced as allocation is restricted.

(i) Transition Period—

(a) For land over 8 hectares the allocation shall be one unit rate of supply for each hectare of land.

(b) For land under 8 hectares water will be allocated on the basis of one unit of water for each hectare of land following a request in writing by the occupier provided that water has been supplied to the land in the 5 seasons prior to the Order in Council. Other land under 8 hectares may have water supplied by special agreement with the Minister of Works and Development.

(ii) The Renewed Scheme—

(a) For land over 8 hectares the allocation shall be one unit of water for each hectare of irrigable land.

(b) For land under 8 hectares water will be allocated by special agreement with the Minister of Works and Development.

7. Conditions of Supply—(i) During the Transition Period:

(a) For all land that has taken water 'on contract' or 'on demand' within the 5 seasons prior to the Order in Council:

(i) One unit rate of supply will be supplied for each hectare of land.

(All water supply 'on contract' or 'on demand' has been supplied under an agreement between the Crown and the owners or occupiers of land within the irrigation district under the authority of section 277 of the Public Works Act 1928).

(b) For land not having taken a supply—

(i) For land 8 hectares and over one unit rate of supply will be provided for each hectare of land on which the on-farm works are completed.

(ii) For land under 8 hectares a supply may be made available subject to terms and conditions determined by the Minister of Works and Development.

(ii) The Renewed Scheme—

(a) For land 8 hectares and over one unit rate of supply will be supplied for each hectare of land on which the on-farm works are completed

Completed on-farm works shall be application systems that take water from a scheme turnout specifically provided for that method. For example, a spray supply to be approved must be taken from a spray sump.

Uncontrolled methods of application, (for example, wild flooding) will not be approved methods.

Existing on-farm works that comply with these requirements will be classified as completed works.

(b) For land under 8 hectares a supply may be made available subject to terms and conditions determined by the Minister.

(c) Land irrigated from groundwater may draw water to the installed capacity of the pumps subject to such restrictions that may be required to maintain the groundwater at a viable level.

8. Land Liable to Pay Water Charges—All land 8 hectares and over shall:

(a) During the Transition Period:

(i) Pay the transition period basic charge on each hectare of land occupied.

OR If water has been supplied in the 5 years prior to the Order in Council pay the transition period water availability charge on the allocation.

(b) For the Duration of the Renewed Scheme:

(i) Pay the basic charge on the irrigable area of each property.

OR Where a water availability agreement is entered into pay the water availability charge for each unit rate of supply of water allocated.

For areas of land 8 hectares and greater for which the occupier does not wish to enter into a water availability agreement, i.e. does not wish to take a supply of water, the National Authority shall determine the irrigable area taking into consideration any request made in writing by the occupier.

9. General conditions of allocation and supply that shall apply during and after the transition period.

(i) Due allowance will be made for the equitable redistribution of any surplus water.

(ii) The only grounds on which the Minister will consider a reduction in charges for a diminished or reduced supply shall be a failure of the off-farm works.

(iii) For areas developed for border-dyking, the allocation will be delivered by a rostered supply.

(iv) For areas developed for spray irrigation, unless otherwise arranged, a continuous supply will be made available to serve a spray unit.

(v) If the property has a well supply provided by the scheme, at any time during the season the supply from the scheme race may be discontinued or reduced and be required to be taken from the well.

(vi) For areas using other forms of irrigation, a suitable supply will be made available, subject to such conditions as are appropriate.

(vii) Where an occupier is given a special service, the cost of that service or an appropriate charge may be recovered directly.

Equally, where an occupier incurs an operating expenditure for the benefit of the scheme, he may seek to have made an appropriate payment.

10. Fencing—Construction and maintenance of fences to Scheme Races:

(i) Boundary and subdivision fences will be the responsibility of adjacent land occupiers.

(ii) Other fences will be the responsibility of the scheme.

11. The general objectives of the Renewed Scheme are:

(i) To define the district.

(ii) To make the operation and the terms and conditions of supply of water suitable for all forms of irrigation.

(iii) To co-ordinate and manage the use of underground water to complement the water in the Opihi River.

(iv) To make water availability better defined and more reliable.

(v) To minimise future maintenance.

12. Estimated Capability of Scheme—It is calculated that the scheme will provide a sufficient supply of water for the irrigable land within the scheme, subject to the restrictions that will be imposed under the Opihi River Water Management Plan.

13. Water will be supplied to each property at the boundary in a manner suitable for the irrigation of that property.

14. The supply of water to the scheme shall be from the open race system which draws its water from the Opihi River and from the underground water that is affected by the application of water for irrigation on the Levels Plain.

All water supplied shall be subject to the conditions:

(i) Of the notified use.

(ii) Of the Opihi River Water Management Plan.

(iii) Of existing and new water rights.

(iv) Of such other conditions as may from time to time be imposed by the National Authority, Legislation, and those requested by a majority of irrigators and agreed to by the Minister of Works and Development.

15. The scheme's substitution will commence with the upgrading of the intake structure on the Opihi River. The balance of the work will be carried out according to a programme determined by the District Commissioner of Works, Christchurch, currently estimated to take 5 years.

16. Where an owner or occupier sells or leases a part or parts of his land he shall provide facilities to supply water to each part. The facilities shall be installed as directed by the Minister of Works and Development.

17. The season shall be from 1 May to 30 April the following year. From 1 May to 31 August in each year, a supply will not be available except by special arrangement.

18. The minimum aggregate area of land occupied by any occupier that it is proposed to include in the substituted irrigation scheme is eight (8) hectares. The aggregate area of land must be contiguous.

19. The application of Part XIX (Irrigation) of the Public Works Act 1981 to the existing Levels Plain Irrigation Scheme shall be in two parts:

(i) The period during the phasing in of the renewed scheme and the termination of the existing scheme, to be called the "transition period" during which the off-farm works are substituted to commence 1 May 1986.

(ii) The operation of the renewed scheme after the transition period shall commence the season for which the Minister of Works and Development declares the supply of water available to the whole district.

EFFECTIVE MANAGEMENT: For Busy Managers**STATE SERVICES COMMISSION**

114p. 1974. \$4.95 plus 65c p & p

Management has been described as "what managers do". But what is that? Getting things done? Getting other people to do them? Using resources economically? And what does the 'effective' manager do? This book looks at answers to such questions. It has been written as an introduction to the subject, especially for New Zealand managers who want to manage their organisation better.

PROFESSIONALLY SPEAKING

25p. 1983. \$3.25 plus 65c p & p

"Speech is power; speech is to persuade, to convert, to compel", said Emerson. Ignorance is the biggest stumbling block in the path of the aspiring public speaker. Your purpose in speaking must be that you have something to say, rather than that you have to say something. This inexpensive booklet will help the person who has to speak professionally.

ELECTRICITY FOR MOTOR MECHANICS**N.Z. TECHNICAL CORRESPONDENCE INSTITUTE**

256 p. 1986 reprint. Illustrated. \$15.00 plus \$1.60 p & p
