Syllabus for Schools Forms 1 to 4 Workshop Craft

THIS syllabus introduces students to the principles and practices of design, the traditions and practices of craftsmanship, and develops their technical knowledge. There is strong emphasis on encouraging individual and creative work. Students are involved in a range of discussions, choices and activities out of which they develop their own solutions to problems, then construct them in the workshop. This "design and make" approach is the crux of workshop craft. High standards of practical work and a solid foundation of technical knowledge are as important as ever.

Workshop craft seeks to develop safe workshop habits and attitudes that reflect a pride in workmanship. Students in workshop craft are required to work with a range of different materials in solving design and construction problems.

Copies of the Forms 1 to 4 Workshop Craft Syllabus for schools will be issued to all schools during term 3, 1986. Additional copies may be obtained from the Government Printing Office bookshops.

Dated at Wellington this 29th day of September 1986.

NOTES TO THE FINANCIAL STATEMENTS FOR THE YEAR ENDED 31ST MARCH 1986

1. *General Accounting Policies—*

The accounting policies as recommended by the New Zealand Society of Accountants for the measurement and reporting of results and financial position under the historic cost, modified by the revaluation of current assets, has been adopted consistent with the previous year. Reliance is placed on the fact that the Bank is a going concern.

2. *Particular Accounting Policies—*

- (a) *Recognition of Income*—The income earned is recorded on an accrual basis and includes the amortization of premiums and discounts on the purchase of Government and local authority stock. Interest on personal loans is calculated according to the Rule of 78.
- (b) *Expenditure*—Interest on depositors accounts represents interest paid, credited or accrued for the financial year ended 31st March 1986. Other expenses, including computer development costs and losses associated with dealing in securities, have been charged to the accounts in the year in which the expenditure or loss was incurred.
- (c) *Fixed Assets and Depreciation*—Fixed assets are valued at cost less accumulated depreciation with the exception of land and buildings which are valued at 90 percent of a registered valuers valuation. Depreciation has been charged using the straight line method which writes off the asset over its useful economic life to its estimated residual value:

Buildings	80–100 years
Computer and office equipment	5–10 years
Furniture and fittings	5–20 years
Motor vehicles	2–5 years

- (d) *Taxation*—Taxation charged against net profit is the estimated expense relating to the result for the year. It includes amount for taxation, the payment of which is deferred to future periods, because taxation practice differs from accounting policies in the treatment of:

- (i) Interest accrued on investments,
- (ii) Depreciation charges,
- (iii) The amortization of profits and losses in respect of Government and local authority stock purchases and sales.

(e) *Current Assets and Investments*—All current assets and investments are shown at cost with the exception of New Zealand Government stock. On the basis that Government stock will normally be held to maturity the Bank considers it appropriate to record such stock at nominal value. Discounts or premiums on Government stock purchases are amortised on a straight line basis over the term of the stock.

The realisable value of fixed interest securities fluctuates with the movement in market yields and it is customary for such fluctuations to be disregarded in the recording of results of the long term institutional investor.

3. *Changes in Accounting Policies:*

In previous years deferred taxation has been calculated on the partial liability method which recognises that only some differences resulting in a deferred taxation liability will ever become payable. The Bank now recognises that all such differences resulting in deferred taxation will become payable at a future date and this has resulted in an adjustment to the provision for deferred taxation of \$258,614.

4. *Abnormal Items:*

An amount of \$442,792 has been included in the profit and loss account being a loss on sale of Government stock, redundant computer equipment written off, and stationery written off, which have had a significant effect on the current years profit.

5. *New Zealand Government Stock:*

The estimated market value at 31 March 1986 was \$12,604,000. The Government Guarantee on Depositors' Funds including accrued interest in terms of section 44 of the Trustee Banks Act 1983 and subsequent amendments was in force at balance date and continues to remain in force.

REPORT OF THE AUDITORS

WE report that we have obtained all the information and explanations that we have required. In our opinion proper accounting records have been kept by the Bank so far as appears from our examination of those records.

In our opinion the accompanying profit and loss account, balance sheet, statement of changes in financial position and notes, using the historical cost method modified by the revaluation of certain assets, are properly drawn up so as to give a true and fair view of the state of the Bank's affairs as at 31 March 1986 and the results of its business and the changes in financial position for the year ended or that date in accordance with section 43 (c) of the Trustee Banks Act 1983.
