NOTES TO THE FINANCIAL STATEMENTS

NOTE 1: Accounting Policies:

General Accounting Policies:

The following general accounting policies have been adopted by the Bank in the preparation of the financial statements:

- The historical cost basis is used, modified for the revaluation of land and buildings, and investment properties.
- Accrual accounting is used to match revenue and expenses.
- Reliance is placed on the fact that the Bank is a going concern.

*Particular Accounting Policies:**Recognition of Income:*

Income shown in the profit statement is earned in the current year and includes the amortisation of premiums and discounts on the purchase of government and local authority securities.

*Expenditure:**Interest credited to depositors accounts:*

Interest on deposits is accrued to balance date on a daily basis at the appropriate rate of interest.

Other Expenses:

Other expenses, including expenditure on computer program development, are charged to the accounts in the year in which the expenditure is incurred.

Depreciation:

Fixed assets, other than freehold land, are depreciated on a straight line basis at rates estimated to write off the cost or revalued amount, less residual value, over the economic life of each class of asset.

The principal annual rates in use are:

Buildings—50 to 100 years.

Computer equipment, office furniture and motor vehicles—7 to 10 years.

Taxation:

Provision is made for taxation after taking advantage of all deductions available under current taxation legislation.

The liability method of accounting for the taxation effect of timing differences has been adopted by the bank.

The major timing differences relate to depreciation and the recognition of investment income.

*Valuation of Assets:**Current Assets and Investments:*

All current assets and investments are shown at cost with the exception of government and local authority securities. Government and local authority securities are regarded as long term investments and are redeemable at maturity at their face value. These securities are valued at cost, adjusted by the amortisation of the discount or premium calculated on a purchase yield basis over the term of the securities. The discount or premium is calculated after adjusting for interest accrued in the purchase price.

The realisable value of fixed interest securities fluctuates with the movement in market yields and it is customary for such fluctuations to be disregarded in the reporting of the results of the long term institutional investor.

Fixed Assets:

Fixed assets are shown at cost less accumulated depreciation with the exception of revalued land and buildings which are shown at 90 percent of independent registered valuations.

Changes in Accounting Policies:

There have been no changes in accounting policies this year.

However, the requirement to hold New Zealand government securities pursuant to the same Act was removed on 11 February 1985.

AUDITORS' REPORT TO THE TRUSTEES OF TRUSTEEBANK OTAGO

We have obtained all the information and explanations that we have required. In our opinion proper accounting records have been kept by the Bank so far as appears from our examinations of those records.

In our opinion, the financial statements give, using the historical cost method modified by the revaluation of land, buildings and property investments, a true and fair view of the financial position of the Bank at 31 March 1986 and the results of its operations and the source and application of funds for the year ending on that date.
