*The Standards Act 1965—Draft New Zealand Standard Specification Available for Comment*

PURSUANT to subsection (3) of section 23 of the Standards Act 1965, notice is hereby given that the following draft New Zealand standard specification is being circulated.

Number and Title of Specification

DZ 4232 Performance criteria for fire resisting closures. \$11.00 (incl. GST)

- Part 1. Internal and external fire doorsets.
- Part 2. Fire resistant glazing systems.

This draft Standard has been prepared to replace NZS 1188:1954 *Fire doors and fire windows* as the approved means of compliance with NZS 1900:Chapter 5 *Fire resisting construction and means of egress*.

It is also intended to be the agreed basis for the design, manufacture and installation of all fire doors and fire windows required by any regulation, code, or bylaw in New Zealand.

The draft Standard sets out the performance requirements for fire doors and fire windows rather than laying down detailed prescriptions for their construction and installation as in NZS 1188. It also includes requirements for the installation of fire doors and fire windows which will ensure compliance with the performance requirements, and act as a practical guide to designers and builders.

The draft ensures technical compatibility with Australian performance criteria, where such criteria are consistent with New Zealand manufacturing and installation practices.

All persons who may be affected by this publication and who desire to comment thereon, may obtain copies at the price shown, from the Standards Association of New Zealand, Wellington Trade Centre, 181-187 Victoria Street (or Private Bag), Wellington.

NOTE—Payment must accompany all requests for drafts.

The closing date for the receipt of comment is 21 August 1987.

Dated at Wellington this 28th day of May 1987.

Director, Standards Association of New Zealand.

It also makes editorial changes in relation to references to fire doors and fire windows within the text.
