*The Standards Act 1965—Draft New Zealand Standard Specifications Available for Comment*

PURSUANT to subsection (3) of section 23 of the Standards Act 1965, notice is hereby given that the following draft New Zealand standard specifications are being circulated.

Number and Title of Specification

DZ 6101 Classification of hazardous areas—  
Part 1: Explosive gas atmospheres. \$11.00 (incl. GST).

This standard will provide guidance for the classification of hazardous areas according to the existence of or likelihood of the existence of an explosive gas/air mixture. Zones 0, 1 and 2 are covered. These are sometimes referred to as Class I areas.

The draft applies to open and enclosed areas, in all above-ground situations, where there may be a risk due to the presence of flammable gas or vapour mixed with air under normal atmosphere conditions.

This standard does not apply to underground workings including coal mining; processing and manufacture of explosives; areas which may be affected by oxygen enrichment; areas where risks may arise due to the presence of combustible dusts; or potential catastrophic failures such as the bursting of pressure vessels, pipelines or tanks.

Part 2: Combustible dusts. \$11.00 (incl. GST).

This proposed standard sets out requirements for the classification of hazardous areas according to the existence of, or the likelihood for the existence of, combustible dusts. Zones Y and Z are covered—such areas are sometimes referred to as Class II areas.

The draft standard applies to open and enclosed areas where ambient air temperature and pressure apply. Areas where higher and lower atmospheric temperatures and pressures are present are not excluded provided that their effects on the properties of the flammable materials are taken into account. It also considers areas where hybrid mixtures exist.

This standard does not apply to areas where inherently explosive dusts are present; underground workings of coal mines; or areas which may be affected by oxygen enrichment.

All persons who may be affected by these publications and who desire to comment thereon, may obtain copies at the price shown, from the Standards Association of New Zealand, Wellington Trade Centre, 181-187 Victoria Street (or Private Bag), Wellington.

NOTE—Payment must accompany all requests for drafts.

#### *Game Industry Levy*

PURSUANT to regulation 17(3) of the Game Industry Board Regulations 1985, notice is given that the Game Industry Board hereby fixes the rates of game industry levy (which levy rates are inclusive of goods and services tax imposed by the Goods and Services Tax Act 1985) as follows:

- (a) On each deer slaughtered in deer slaughtering premises, 31 cents per kilogram hot clean carcass weight after removal of condemned parts;
- (b) On each killed game deer carcass brought in to a game packing house, 5 cents per kilogram cold clean carcass weight after removal of condemned parts;
- (c) On each piece of antler in velvet from fallow deer received at a game packing house for processing or packing, 110 cents per kilogram green weight; and
- (d) On each piece of antler in velvet from deer other than fallow deer received at a game packing house for processing or packing, 330 cents per kilogram green weight.

A nil rate of levy will apply to any farmed deer or killed game deer carcasses which are wholly condemned for any reason following slaughter or receipt in to a game packing house.

No levy shall be payable in respect of any one farmed deer carcass or killed game deer carcass or piece of antler in velvet more than once.

If the game industry levy is not paid on or before the due date for payment, or is not paid within such extended time as may be allowed by the board under regulation 18(3) of the Game Industry Board Regulations 1985, an additional levy equal to 10 percent of the amount of levy unpaid, shall be payable by the proprietor of the deer slaughtering premises or game packing house concerned. This additional levy for late payment shall apply at a rate of 10 percent on outstanding balances on the monthly anniversary date of when payment was due in each subsequent month.

These rates of levy will come into effect from and inclusive of the 1st day of October 1987 and apply during the 1987-88 game season and subsequently until such time as new levy rates are fixed and come into force.

## LPG Fuel System Approvals—Concessional Fuel Cylinder Approvals

PURSUANT to regulation 90B of the Traffic Regulations 1976\* (as inserted by the Traffic Regulations 1976 Amendment No. 7) and pursuant to the powers delegated to me by the Secretary for Transport, I, Hugh Cameron Matheson, Senior Automotive Engineer, hereby approve the components listed in the Schedule hereto for inclusion in any LPG automotive fuel system installed and operated in accordance with the requirements of New Zealand Standard NZS 5422, Part 1, 1987 (and any standard made in amendment thereto or in substitution therefor) subject to the conditions of approval set out in respect of any component in the said Schedule.

SCHEDULE  
LPG FUEL CYLINDERS

MOT Reference	Manufacturer	Country of Origin	Specification	Material	Inspection Authority	Working Pressure Rating (MPa)	Test Pressure (MPa)	Nominal Water Capacity (litres)
AF LO3C 030	Gregg Manufacturing	USA	ASME 8/1	Steel	ASME	2.15 (312 psi)	2.58 (375 psi)	72 (19.2 US Gal.)

CONDITIONS OF APPROVAL

LPG fuel cylinders are approved subject to the following conditions—

1. That they be permanently and clearly marked, on a suitably attached metal plate, with characters not less than 6 mm high if space permits but in any case not less than 3 mm high, displaying the following information:
  - (a) The specification to which the cylinder was manufactured.
  - (b) The manufacturer's name or mark and the serial number of the cylinder.
  - (c) The date of the original cylinder inspection and the identification mark of the inspection authority who made the inspection.
  - (d) The date of any periodic cylinder test and the identification mark of the cylinder testing station who made each test.
  - (e) The cylinder test pressure.
  - (f) The nominal water capacity of the cylinder.
  - (g) The tare weight of the cylinder.
2. That they be clearly marked or labelled to indicate that the cylinder is suitable for use with LPG.
3. That they be provided with valve threads and fittings which provide the following functions—
  - (a) Filling connection incorporating a non return valve.
  - (b) Service valve incorporating an excess flow valve.
  - (c) Contents gauge.
  - (d) Pressure relief valve.
  - (e) A fixed liquid level indicator and an automatic fill shut off device which prevents the cylinder being filled beyond 85 percent of the total cylinder capacity.

Valves and fittings shall have a service pressure rating of at least that of the cylinder to which they are fitted and shall be dimensioned, threaded and marked in accordance with the requirements of section 2.2 of New Zealand Standard NZS 5422:1987 "The use of LPG and CNG Fuels in Internal Combustion Engines—Part 1 LPG Fuel".
4. That they be tested at periods not exceeding five years in accordance with the requirements of Australian Standard AS 2337.1-1987 or in accordance with the periodic test requirements laid down in the specification to which the cylinder was manufactured.
5. That they be fitted to a motor vehicle in such a position that they will not be subject to the direct rays of the sun, either by fitting them within a suitable vehicle compartment, or by providing a suitable shield if the cylinders are fitted to the exterior of the vehicle.
6. The terms of this approval do not allow the continued importation of such LPG fuel cylinders and it does not apply to cylinders which have not been installed in a motor vehicle by 31 December 1985.

NOTES: The effect of this notice is to allow the continued use of LPG fuel cylinders which are known to have been imported into New Zealand prior to the introduction of the Dangerous Goods (Class 2—Gases) Regulations 1980 and which were acceptable under the previous dangerous goods requirements, but whose working pressure rating would disqualify them for approval for general use under the Traffic Regulations 1976. They are approved subject to the additional proviso that they must not be exposed to direct sunlight (to reduce the possibility that solar radiation would raise the temperature of the contents of the cylinder such that the developed pressure of the cylinder contents exceeded the working pressure rating of the cylinder).

Dated at Wellington this 16th day of September 1987.
