M.W. TAYLOR, Comptroller of Customs.

TARIFF INDUSTRY ASSISTANCE (DECISION) NOTICE NO. 1988/39

Decisions of the Minister of Customs in respect of Part I and Part II of the Customs Tariff

- Notice is hereby given that the following decisions have been made in respect of the goods published in the Schedules to this notice. 1 SCHEDULE 2 - Decisions cancelled. The cancellations listed in this schedule take effect fourteen days from Gazette date unless
- 2 otherwise specified, eg, WEF (date).

SCHEDULE 3 - Limited Decisions 3

Approvals given under Schedule 3 are restricted to the applicant for whom the approval was originally given and are not (a) available for general use.

This Notice only serves to inform the importing/manufacturing community of the approvals existence.

(b) Schedule 3 and 4 will not be published in the Consolidated List of Decisions.

It should be noted that any concession or determination can be subject to amendment or cancellation by notification in the Gazette. Where the month of the start date and end date is shown the day of the start date is the first day of that month and the day of the end date is the last day of that month - eg. 3/88 to 9/89 is 1/3/88 to 30/9/89. 5

Item	Description of Goods or quadrant scales, accuracy class of 0.5 and having face size	Normal	Pref.	Ref.	No.	From	То
	of 72mm or 96mm square						
	(3) Milk cryoscopes						
	(4) Moving coil and moving coil/rectifier ammeters and						
	voltmeters, including microammeters, milliameters and D.C. millivoltmeters for use with external shunts, flush mounting						
	horizontal sector scales, accuracy class 2.5 and having body						
	diameter of between 54 and 70mm						
	(5) Moving coil and moving coil/rectifier ammeters and						
	voltmeters, including milliameters and D.C. millivoltmeters,						
	for use with external shunts, flush mounting with circular or quadrant scales accuracy class 1.5 and having face size of						
	72mm or 96mm square						
	(6) Moving iron ammeters and voltmeters including milliameters,						
	flush mounting and quadrant scales to accuracy class 1.5 and						
	having face size of from 72mm to 144mm square inclusive						
	(7) Temperature, pressure, humidity and moisture control and						
	measuring devices (8) Industrial type batch and predetermining batch counters,						
	but not including digital electronic frequencies above 1MHz						
	(9) Variable speed controllers for A.C. motors, sizes up to and			1 .			
	including 255 kw						
	(10) Data logging systems designed for the measuring, indicating						
	of physical data such as temperature, humidity, voltage, current,						
	power and flow pressure EXCLUDING:						
1. A.	Public water supply data logging equipment,						
	(11) Echo-sounding, ultra-sonic and detecting equipment						
	having a maximum depth range of up to 110m, excluding						
	hermetically sealed units						
	(12) Bin and hopper level control instruments and apparatus						
	(13) Electronic differential thermostat switches designed to						
	monitor or control the flow of gases, liquids or solids in the control of forced circulation solar heating systems,						
	controlling loads up to 10hp or 7.5 kilowatts resistive						
	(14) Electronic marine instruments for recording boat speed						
	and distance other than Decca Logs and Seafarer Logs						
	(15) Energy management systems, peculiar to use for measuring,						
	analysing and controlling electrical demand						
	(16) Gas detection systems, peculiar for use in commercial and/or industrial environments, which measure and report						
	concentrations of flammable or toxic gases in the air via						
	alarm and/or analogue						
	(17) Moving iron ammeters and voltmeters, flush mounting,						
	quadrant scale, to accuracy class 1.5 and having face sizes						
	from 72mm to 144mm square (18) Moving coil and moving coil/rectifier ammeters and						
	voltmeters, flush mounting, having face areas of between						
	5184 square millimeters and 9216 square millimeters and		١.				
	having sector, quadrant or circular scales						
	NOTE: circular, sector and quadrant type scales are illustrated						
	in Fig. 2 on pages 11 and 12 of BS 3693, PART 1, 1964, "The						
	Design of Scales and Indexes.''						
	(19) Portable electrically powered gas leak detector, gas detector and gas monitor and smoke warning alarms						
	(20) Post payment self-service petrol dispensing systems						
	(21) Power factor correction systems, including power factor						
	controllers and ancillary equipment mounted in a common						
	cubicle and designed to measure and automatically control						
	the overall power factor in a 3-phase electrical						
	installation, and such power factor controllers when imported separately						
	(22) Telemetry system designed for the remote control						
	measuring and indicating of physical and electrical data,						
	such as voltage, current, power and position status						
	(23) Electronic taximeters						
	(24) Ripple signal control equipment						
	(25) Parts of electrical weight or load measuring equipment; viz: load cells, load bars, weigh cells, load transducers, weight						
	transducers, strain gauge transducers, force transducers						
	Other than:						
	Hermetically sealed transducers (being gas tight), shock proof						
	transducers (being without fittings or attachments),						
	explosion proof transducers, load pins, shackle pins, cannister

M.W. TAYLOR, Comptroller of Customs.

INITIATION OF DUMPING INVESTIGATION

Pursuant to the provisions contained in section 186H of the Customs Act 1966 Notice is hereby given by the Comptroller of Customs of the initiation of the investigation to determine both the existence and effect of the alleged dumping of the goods set out in the Schedule, being satisfied that sufficient evidence has been provided that:

- The goods exported or intended to be exported to New Zealand are being dumped; and

- By reason thereof material injury to an industry has been or is being caused or threatened. SCHEDULE
