(A) CLASS I: Motor vehicles (other than omnibuses), being sedans, station wagons, utilities, vans capable of carrying passengers and goods or a combination of passengers and goods, chassis/cabs, providing that the gross vehicle weight of such vehicles does not exceed 3,500 kg	(i) Chassis, consisting of:  A metal underbody, side members, end members, cross members, sub-frame, tank supports, brackets for fixing engine, springbrackets, engine, and gearbox.  (ii) Bodies, the following parts:  Panels, and framework (if any)	These goods (except the engine and gearbox) may be built up into a 'frame' and the engine and gear box may be fully assembled and attached to a frame. The frame must not be further assembled but such other minor fittings, for example, stays, lugs, and brackets as are ordinarily affixed to the frame may be so affixed.  May be built up into the form of a 'shell', with doors attached thereto. The shell may have a coat of grease, oil, red oxide, or similar protective coating, not including cellulose or pyroxylin or similar lacquer. The shell shall not be advanced in manufacture beyond the stage where the necessary welding processes have been performed; for example, the seams shall not be soldered, filled or smoothed. The shell may not be attached to the model underbody or frame or to parts affixed thereto as referred to in (i) above but may subject to the foregoing restrictions, be imported in such condition as the importer elects.
