NEW ZEALAND CUSTOMS SERVICE**CUSTOMS AND EXCISE ACT 1996****CUSTOMS (VOLUME OF ALCOHOL) RULES 1996**

PURSUANT to Section 288(1)(g) of the Customs and Excise Act 1996 the Chief Executive hereby makes the rules prescribing the manner in which the volume of alcohol in an alcoholic beverage is to be ascertained.

RULES**1 Title, Commencement, Application and Purpose -**

- (a) These rules may be cited as the Customs (Volume of Alcohol) Rules 1996.
- (b) These rules shall come into force on the 1st day of October 1996.
- (c) These rules shall apply for the purposes of prescribing the manner in which the volume of alcohol in an alcoholic beverage is to be ascertained.
- (d) The volume of alcohol in an alcoholic beverage shall be ascertained by multiplying the quantity of litres of the particular beverage by its alcoholic strength in accordance with these rules.

2 Interpretation

In these rules, unless the context otherwise requires -

- (a) The term "the Act" means the Customs and Excise Act 1996;
- (b) Any terms used in these rules which are defined in Section 2 of the Act shall have the meanings given to them by that section;
- (c) "Targeted strength" means the intended percentage of alcohol by volume for each product, and each brand of the product in relation to alcoholic beverages, as advised by the manufacturer in accordance with such conditions as may be specified under section 12(2) of the Act;
- (d) "Weighted mean value", in relation to beer which is accounted for in an entry for home consumption, means the percentage of alcohol by volume obtained by dividing the total quantity of litres of alcohol, as ascertained in accordance with these rules, by the total quantity of litres of beer so entered.

3 Methods to ascertain volume of alcohol in beer -

The volume of alcohol in beer may be ascertained by any one or more of the following processes:

- (a) by use of a Servo Chem Automatic Beer Analyser; or
- (b) by use of Headspace Gas Chromatography; or
- (c) by way of distillation followed either by the gravimetric measurement of the distillate or by measurement in an oscillating U-tube type density meter.

4 Methods to ascertain volume of alcohol in alcoholic beverages other than beer -

The volume of alcohol in alcoholic beverages other than beer may be ascertained by any one or more of the following processes:

- (a) by use of Headspace Gas Chromatography; or
- (b) by way of distillation followed either by the gravimetric measurement of the distillate or by measurement in an oscillating U-tube type density meter; or
- (c) by way of Hydrometric testing using an OIML hydrometer of the British Standard BS 5470, in the case of goods of a class or kind which, if imported, would be classified in Tariff headings 2208.20 to 2208.60.

Provided that if the Chief Executive has reason to believe that any alcoholic beverage analysed by use of the process specified in paragraph (c) of this rule has had added to it any substance so as to impair the hydrometer reading, he or she may disregard the results so obtained and require the beverage to be analysed using any one or more of the processes specified in paragraphs (a) or (b) of this rule.

5 **Manner of calculating the volume of alcohol -**

- (1) For the purposes of the Act, the volume of alcohol present in an alcoholic beverage shall be calculated on entry as an amount corresponding to the value of "C" in accordance with the formula:

$$C = A \times B$$

where:

A is the total quantity of the beverage, in liquid litres, to which the entry relates; and

B is the alcohol strength of the beverage.

- (2) For the purposes of paragraph (1) of this rule, in respect of alcoholic beverages, other than beer, the alcohol strength is:

(a) The targeted strength providing that, when tested, it is equal to the strength obtained from analysis in accordance with these rules; or

(b) Where the targeted strength is not confirmed when tested, the result obtained by analysis in accordance with these rules.

- (3) Subject to paragraph (5) of this rule, for the purposes of paragraph (1) of this rule, in respect of beer the alcohol strength is:

(a) Subject to paragraph (4) of this rule, where the targeted strength is confirmed within plus 0.04% by the weighted mean value, the targeted strength stated to 2 decimal places; or

(b) Subject to paragraph (4) of this rule, where the targeted strength is not confirmed pursuant to subparagraph (a) of this rule when tested and the weighted mean value exceeds the targeted strength by more than 0.04%, the weighted mean value stated to 2 decimal places;

(c) Where the targeted strength is not confirmed pursuant to subparagraph (a) of this rule when tested and the weighted mean value is less than the targeted strength, the targeted strength stated to 2 decimal places.

- (4) Notwithstanding subparagraphs 3(a) and (b) of this rule, with respect to beer, if in the case of two successive entries the weighted mean value exceeds the targeted strength, the alcohol strength for the purposes of paragraph (1) of this rule shall be the weighted mean value until that value is equal to or is less than the targeted strength;

- (5) Where the production of beer at any one place of manufacture -

(a) Is not expected to exceed 1,000,000 litres per annum; and

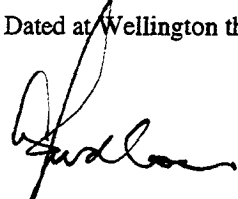

(b) Analyses are not done in accordance with these rules; and

(c) The beer is packaged with a stated label strength, or, in the case of bulk beer, where the product is otherwise packaged with a stated label strength; and

(d) The label strength is no less than the targeted strength for the product -

the alcohol strength for the purposes of subparagraph (1) of this rule shall be the label strength.

Notes

General:

2. An application for a Ruling must be legible and complete in all material detail. Where appropriate an application should be supported by illustrations or other adequate identification (e.g., commercial, trade and/or technical literature or chemical formulae). Applications that are **incomplete or not supported by sufficient information** in respect of the goods for which a Ruling is sought, or **not accompanied by the prescribed fee, will not be progressed until that information/fee is provided.**
3. **The application must be accompanied by the goods or a sample of the goods.** If this presents a difficulty please discuss with the National Tariff Advisory Unit before lodging your application.
4. **The Chief Executive may, at any time, request information from the applicant if it is considered that such information is relevant to the proper consideration of the application.**
5. At any time after a Ruling is made, the applicant may be required to satisfy the Chief Executive that the facts or information on which the Customs Ruling was made remain correct and, where applicable, that any conditions on which the Ruling was made have been complied with.
6. The giving of a classification or concession interpretation Ruling by the New Zealand Customs Service does not constitute a decision on whether or not the goods may be a prohibited import. It is the responsibility of the importer to ensure that no prohibition exists for the particular goods on which a Ruling is given.
7. A Ruling ceases to have effect after the expiry of 3 years from the date of notice of the Ruling, or any amendment to that Ruling. The applicant should take particular note of the matters stated in Section 125 of the Act which could cause a Ruling to cease to have effect.
8. Applicants are encouraged to lodge directly their application with the **National Tariff Advisory Unit, New Zealand Customs Service, Box 2218, Wellington.** However, an application may be lodged at any Customs Office.
