Departmental Notices

Economic Development

Commerce Act 1986

Statement to the Commerce Commission of Economic Policy of the Government: Incentives of Regulated Businesses to Invest in Infrastructure

To: The Commerce Commission

Pursuant to section 26 of the Commerce Act 1986 ("the Act"), I hereby transmit to the Commerce Commission the following statement of the economic policy of the Government in relation to the incentives of regulated businesses to invest in infrastructure.

Government Policy Statement—Incentives of regulated businesses to invest in infrastructure

This statement sets out the Government's economic policy on infrastructure investment in the context of businesses that are, or may be, regulated under Parts 4, 4A or sections 70 to 74 of Part 5 of the Act.

Introduction and background

1. The Government's objective of returning New Zealand's per-capita income to the top half of the OECD requires improved labour and capital productivity.

2. Improved labour and capital productivity relies on quality infrastructure including secure and affordable energy

services, affordable and sophisticated telecommunications technologies, and efficient transport links. In recognition of this, the Government has adopted the following overarching objective for infrastructure:

"To enhance infrastructure's net contribution to economic growth and societal well-being over time, while reducing the incidence and severity of service failures and adverse effects on the environment."

3. The provision of efficient infrastructure requires that businesses have the confidence and incentives to make investments in replacement, upgraded and new facilities and services.

4. Particular issues arise in the case of businesses which are or may be regulated under Parts 4, 4A or sections 70 to 74 of Part 5 of the Act. The way in which the prices, revenues and/or quality of goods and services produced by these businesses is regulated or controlled can affect their incentives to invest in new or upgraded infrastructure.

5. This is an important issue because regulated businesses tend to operate in basic infrastructure sectors where security of supply is of paramount importance.

6. Similar considerations apply to investment by regulated businesses in related facilities and services. It is in the long term interests of the economy in general and consumers in particular that regulated businesses, in common with non-regulated businesses, are able to utilise existing assets to reduce the cost of investing in new infrastructure and to take advantage of economies of scale and scope.

Economic policy objectives

7. The Government's economic policy objective is that regulated businesses have incentives to invest in replacement, upgraded and new infrastructure, and in related businesses for the long-term benefit of consumers. The Government considers that this objective will be achieved by:

- (a) regulatory stability, transparency and certainty giving businesses the confidence to make long-life investments;
- (b) regulated rates of return being commercially realistic and taking full account of the long-term risks to consumers of underinvestment in basic infrastructure; and
- (c) regulated businesses being confident they will not be disadvantaged in their regulated businesses if they invest in other infrastructure and services.

8. The Government also considers that it is important that regulatory control ensures that:

- (a) the consumers of regulated businesses are not disadvantaged by the investments of regulated businesses in other infrastructure and services;
- (b) regulated businesses are held accountable for making investments in that business where those investments have been provided for in regulated revenues and prices; and
- (c) regulated businesses provide infrastructure at the quality required by consumers at an efficient price.

Signed at Wellington this 7th day of August 2006.

LIANNE DALZIEL, Minister of Commerce.

The Waikato Community Trust Incorporated Notes To and Forming Part Of the Consolidated Financial Statements for the Year Ended 31 March 2006**1. Statement of Accounting Policies****Basis of Reporting**

The financial statements presented here are for the reporting entity The Waikato Community Trust Incorporated.

The financial statements have been prepared in accordance with the requirements of the New Zealand Institute of Chartered Accountants for the measurement and reporting of profit on a historical cost basis with the exception of investments which are recorded at market value. The reporting currency is in New Zealand dollars.

Specific Accounting Policies

The following specific accounting policies which materially affect the measurement of financial performance and the financial position have been applied:

(a) Reserves Policy

Set out below are the reserving policies. They were adopted by the trust in 1998 and have been amended following reviews in 2000, 2001, 2003, 2004 and 2005 to reflect investment performance.

Trust Funds

In order to prudently manage the financial affairs of the trust, the trustees have adopted the following policies for accounting for the trust's capital and retained earnings.

- **Capital**

Following the sale of the trust's shares in Trust Bank New Zealand Limited in April 1996, the trustees agreed that the value of the trust at that time should be maintained for the benefit of current and future generations living in the Waikato region. For this purpose, the trustees agreed that \$169,800,000 would be considered as the "initial capital" of the trust.

The "initial capital value" is increased each year to show the "base capital value" which reflects growth due to inflation and regional growth. An amount was transferred from retained earnings in 1997 to increase the capital of the trust from its original amount of \$21,316,622 to the "initial capital value" and to provide for growth during the 1997 year. Each year, an appropriate amount is transferred from income to allow for growth due to inflation and regional population growth. Transfers were not made in the 2003, 2004 and 2005 years due to insufficient returns on investments. Following a sufficient increase in investment performance, an appropriate amount has been added to base capital in 2006 for the 2003 to 2006 years.

- **Investment Fluctuation Reserve**

The trustees have adopted an investment strategy with a targeted long term annual rate of return of 6.8% (2005 – 6.8%) of the trust's "base capital value". Recognising that actual returns are likely to fluctuate from year to year, the trust holds the variation from the target in an investment fluctuation reserve. In years when investment returns are less than the target, an appropriate amount is transferred to income.

At the trust’s current risk profile, the investment fluctuation reserve should have a lower limit of 9% (2005 – 9%) and an upper limit of 25% (2005 – 25%) of the “base capital value”. When the reserve falls below the lower limit, the levels of expenditure and distributions are reviewed by the trust. If the reserve exceeds the upper limit, any further excess returns are transferred to the donation reserve.

• **Donation Reserve**

The trust’s present donation policy is to distribute annually as donations 3.5% (2005 – 3.5%), subject to the investment fluctuation reserve policy, of the “base capital value”. The trustees recognise that for a number of reasons this might not always be achievable and that there will inevitably be fluctuations between the donations distributed and the actual target.

The surplus or deficit after transfers to the capital and the investment fluctuation reserve is held in the donation reserve and represents the trust’s retained earnings or accumulated losses. It is the trust’s intention to apply the surplus in this fund to future donations or recover deficits from future income.

(b) Property, Plant and Equipment

All property, plant and equipment has been recorded at cost price less accumulated depreciation.

(c) Depreciation

Depreciation of property, plant and equipment, other than land, art and artefacts, is calculated using taxation rates so as to allocate the cost of the assets over their useful lives. The following rates are used:

Motor vehicles	31.2%	Diminishing value
Buildings	4.0-31.2%	Diminishing value

(d) Donations

(f) Taxation

(g) Currency Translation

Monetary assets denominated in foreign currency are converted to New Zealand dollars at the exchange rates reported at balance date and any unrealised profit or loss resulting from the conversion is reflected in the statement of financial performance. All hedge instruments are also revalued to market value at year end and unrealised profits and losses are reflected in the statement of financial performance.

(h) Cash Flows

For the purpose of the statement of cash flows, cash includes cash on hand, deposits held at call with banks, net of bank overdrafts, which are used as part of day-to-day cash management.
