Foundation for Research, Science, and Technology Act 1990

Notice of Revocation and Replacement of Government Priorities Under Section 7(1) of the Foundation for Research, Science, and Technology Act 1990

Statement of Science Priorities

Under section 7(1) of the Foundation for Research, Science, and Technology Act 1990 (“the Act”), the Foundation for Research, Science and Technology (“the foundation”) is hereby advised of an amendment to the Government’s priorities that the foundation must adhere to in carrying out its functions under section 5(1)(a) of the Act.

This notice revokes and replaces all previous notices, issued under section 7(1) of the Act, published in the *New Zealand Gazette**.

Funds to which this notice applies

This statement sets out the Government’s policies and priorities that the foundation will have regard to in allocating funds that are not otherwise subject to a ministerial scheme issued under section 8A of the Act.

Priorities for allocating funds

Priorities to which the foundation must adhere to in allocating funds are:

- the annual Estimates of Appropriations for Vote RS&T;
- my Letter of Expectations to the foundation;
- the output agreement between the foundation and myself;
- current Roadmaps for Science (which currently includes those for Environmental Research, Biotechnology Research, Nanoscience, and Nanotechnologies and Energy Research); and
- any other priority setting documents that I may issue from time to time.

The foundation shall confer with the Ministry of Research, Science & Technology to ensure that the foundation’s allocation strategies, and the associated investment signals to the research sector, contribute to the Government’s objectives and the needs of the end-users of research and research organisations.

I expect the foundation to seek guidance on matters including, but not limited to:

- research organisations’ strategies;
- whole-of-government and government departments’ strategies;
- end-user and other private sector strategies.

Dated at Wellington this 7th day of October 2007.

Notice of Introduction of a Ministerial Scheme Under Section 8A of the Foundation for Research, Science, and Technology Act 1990: The Pre-Seed Accelerator Scheme

Direction to: The Foundation for Research, Science and Technology (“the foundation”).

Under section 8A of the Foundation for Research, Science, and Technology Act 1990, I direct the foundation to allocate funds in accordance with the Pre-Seed Accelerator Scheme (“the scheme”) as specified in this notice.

Nature of the Scheme

The scheme will facilitate the application of the results of research through supporting commercialisation. The scheme is also intended to foster commercialisation skills, technological learning and technological innovation by public sector research providers¹.

The intended outcome of this scheme is to increase the stream of commercial prospects from publicly funded research² carried out by public sector research providers, and develop these projects to the point where a private sector firm or other suitable commercialisation partner can be attracted.

The scheme will support experimental development and related pre-commercial activities³ that develop research undertaken by public sector research providers to an “investor-ready”⁴ point.

Scheme Objectives

Projects that meet the scheme’s objectives are eligible to receive funds from the foundation.

The scheme’s objectives are to:

- maximise the commercial benefits to New Zealand of previously publicly funded research;
- raise public sector providers’ commercial capabilities and skills; and
- improve public sector research providers links with potential private sector partners.

In making funding decisions, the foundation will fund those projects that, in its view, best meet the following criteria:

- Projects that commercialise previously publicly funded research;
- have a clear link to a business strategy focused on developing projects with strong commercial potential (especially to create new exports) to the “investor-ready” point;
- are likely to be started sooner and completed earlier because of the scheme’s support; and
- have the potential to generate an enduring wealth creating capability in New Zealand.

The foundation will have full discretion to manage the allocation of funds for the scheme in a way that will achieve the objectives of the scheme.

The Mechanism

The foundation, or a provider to whom the foundation has devolved funds, will use the scheme to fund a project, or portfolio of projects at an aggregate level, at up to 50% of the eligible costs⁵ that the provider will incur.

The provider may reprioritise existing foundation funds, up to a maximum of 12.5% of eligible costs.

The balance of the eligible costs may come from one or more of the sources listed below:

- The provider’s own discretionary funds;
- Other external funds, such as private sector co-investment, but excluding non-research funds sourced from public sector funding agencies.

Allocation of Funding

Funds available to the scheme will be published each year in the Estimates of Appropriations.

Period of Operation

The scheme commenced operation on 1 August 2003. This notice is effective from 3 September 2007. Its continuation and mode of operation will be reviewed after three years.

Monitoring Agency

Monitoring and review of this scheme, including the implementation of this ministerial notice by the foundation and the extent to which the scheme achieves its stated objectives, will be carried out by the Ministry of Research, Science & Technology (MoRST).

Dated this 25th day of August 2007.

HON. STEVE MAHAREY, Minister of Research, Science and Technology.

¹For the purposes of this scheme, "public sector research providers" include entities governed by the Education Act 1989, the Crown Research Institutes Act 1992, Te Papa, Cawthron Institute and any New Zealand-based not-for-profit research associations. Subsidiaries that are more than 50% owned directly or indirectly by one or more public sector research providers are included.

²"Publicly funded research" means research funded or co-funded by any New Zealand-based public sector funding agency.

³The definition that is applied to "experimental development and related pre-commercial activities" will be determined by the foundation and MoRST, based on the definition in the OECD Frascati Manual.

⁴"Investor ready" means a working prototype or similar stage at which a private sector firm, venture capital investor or other investor may reasonably be expected to be attracted, in order to advance or to complete the commercialisation process.

⁵Eligible costs mean the total costs of a project or a group of projects funded under this scheme.

Notice of Introduction of a Ministerial Scheme Under Section 8A of the Foundation for Research, Science, and Technology Act 1990: Research Consortia Scheme

Direction to: The Foundation for Research, Science and Technology ("the foundation").

Under section 8A of the Foundation for Research, Science, and Technology Act 1990 ("the Act"), I direct the foundation to allocate funds in accordance with the Research Consortia Scheme ("the scheme") as specified in this notice.

This notice replaces all previous directions to the foundation for funds to facilitate research partnerships between private firms and public research organisations through Research Consortia issued under section 7(1) of the Act.

Nature of the Scheme

The scheme will facilitate public/private research partnerships.

Partnerships built through this scheme are intended to increase the competitiveness of New Zealand firms and sectors through undertaking useful research.

This scheme will support research across three broad industry areas:

- Food and fibre;
- manufacturing; and
- infrastructure.

Scheme Objectives

Projects that meet the scheme's objectives are eligible to receive funds from the foundation.

The scheme's objectives are to:

- facilitate public/private research partnerships that provide early user engagement and increase private investment in New Zealand; and

- invest in research through user-led research consortia in partnership with research providers. Partnerships will have clearly defined pathways to the implementation and commercialisation for their intended research outcomes.

In making funding decisions, the foundation will fund projects that best meet the following criteria:

- High scientific and technological quality of research;
- potential benefit to New Zealand through innovation;
- clearly defined partnerships and pathways to the implementation of the research outcomes;
- a fit-for-purpose science track record;
- potential to build RS&T capability; and
- potential to increase the level of innovation within user groups.

Allocation of Funding

The foundation will have full discretion to manage the allocation of funds for the scheme in a way that will achieve the objectives of the scheme.

Processes for allocating funds through this scheme are not considered to be negotiated investments as described in the direction to the foundation, pursuant to section 103 of the Crown Entities Act 2004, dated the 4th day of May 2006 and published in the *New Zealand Gazette*, 18 May 2006, No. 47, page 1183.

Funds available to the scheme will be published each year in the Estimates of Appropriations.

Performance Measures

The performance measures for the scheme will be published in the annual Estimates of Appropriation.

Period of Operation

This notice is effective from 3 September 2007. The scheme will operate for a minimum of five years from the date of this notice. Its continuation and mode of operation will be reviewed after five years.

Monitoring Agency

Monitoring and review of this scheme, including the implementation of this ministerial notice by the foundation and the extent to which the scheme achieves its stated objectives, will be carried out by the Ministry of Research, Science & Technology.

Dated this 24th day of September 2007.

HON. STEVE MAHAREY, Minister of Research, Science and Technology.
