Given under my hand, at Auckland, this eighteenth day of May, one thousand eight hundred and sixty-nine.

J. WILLIAMSON,
Superintendent.

H. M. GAOL, MOUNT EDEN.

Superintendent's Office,
Auckland, 6th May, 1869.

THE following Report from the Visiting Justices of their Annual Inspection of the Mount Eden Gaol is published for general information.

J. WILLIAMSON,
Superintendent.

Mount Eden Gaol,
March, 15, 1869.

Sir,—

We, the undersigned, Visiting Justices of Mount Eden Gaol, have the honour to report that we have made our annual inspection of the Gaol, and found perfect order, cleanliness, and care in every department thereof.

We refer your Honor, for details of labour, conduct, &c., to the Gaoler's reports hereto annexed. The same reports furnish a statement of things required whether in repairs or additions.

We would especially refer your Honor to the statements of the Governor or Gaoler with respect to deficiencies in the female department, as the want of refractory cells, and of all means for classifying female prisoners; also to his statement respecting the numerical strength of warders, and that he draws your Honor's attention to the situation of the Hospital.

Your Honor will doubtless remember that we already had the honor of soliciting your attention to these points in a former report.

We have, &c.

PONSONBY PEACOCK,
JAMES NAUGHTON,
Visiting Justices.

His Honor the Superintendent,
Auckland.

GAOLER'S REPORT.

REPAIRS REQUIRED.

Roofing of Governor's and Gaoler's quarters, flooring of mess rooms and passages, wooden fencing, enclosing "old division" of the gaol. Attention is called to the damaged state of boiler in cook-house, "old division." papering and painting Governor's house, new flooring to verandah.

ADDITIONS MADE.

Nil.

All closets in new division of the gaol have been made into earth closets.

ADDITIONS REQUIRED.

Refractory cells in female prisoners department. Shed or awning over stone cutters, also one in female labor yard, workshops, easy communication with back and front of new division, chiefly for use of sentry at night.

SKILLED LABOR.

A return is furnished, showing value of productive and non-productive labor for six months, namely from 1st of June to 30th November, 1868.

CONDUCT.

A return is furnished shewing the number of prison offences and punishment awarded during the year 1868.

SCHOOL.

During the past quarter a prisoners' evening class, under the tuition of a prisoner, has been established for the purpose of studying the higher branches of mathematics.

His Honor the Superintendent has granted a fresh supply of books to gaol school, including mathematical works for use of this class. The Rev. Mr. Heywood, chaplain to the gaol, examines the class nearly every week, and has kindly interested himself in the matter.

The hours of attendance are from 6 to 7 every evening, (Sundays and holidays excepted).

The prisoners attending school during the hours of labor are formed into three classes; the first and second being composed of Europeans, and the third of Maoris. The prisoners upon the whole are very attentive and appear desirous to learn.

LIBRARY.

The majority of the books received at the formation of the library, are to a greater or less extent damaged. Some are lost, while others are worn out. Previous to his departure His Lordship Bishop Selwyn kindly presented a number of books for the use of the prisoners. Contributions of tracts, &c., have been received from the Rev. C. Baker and the Rev. Mr. Hamer; the latter gentleman also lectures to the prisoners every Saturday afternoon.

CLASSIFICATION.

In all cases, each previously convicted prisoner is slept in a cell by himself, and in cases of juvenile offenders, they are kept apart from the other prisoners as much as possible. Each convict occupies a separate cell. There are no means for classifying the female prisoners.

An addition is required in the number of warders. Attention is called to the situation of gaol hospital.

R. A. EYRE,
Governor and Gaoler.

PUBLIC NOTIFICATION.

By JOHN WILLIAMSON, Esquire,
Superintendent of the Province
of Auckland.

WHEREAS, by "The Highways Act, 1867," it is amongst other things enacted that, "If the Electors or Trustees of any District shall fail to fix any or a sufficient rate or if the Trustees of any district shall neglect or refuse to repair and maintain the public highways of such district they having moneys in their hands or under their control for that purpose it shall be lawful for the Superintendent or any two Justices of the Peace upon complaint of any three qualified electors in such district and upon the report of the Provincial Engineer that such public highways or any of them are not in the state of repair required by the traffic on such highway to cause such highway to be repaired and for such purpose at any time to levy a rate not exceeding 6d. per acre or one penny in the pound on the estimated value to sell of the lands and tenements within such district such rate to be assessed payable and levied as nearly as may be in conformity with provisions of Sections 22 to 31 of this Act the Superintendent or such Justices as the case may be performing as nearly as may be the various duties of the Trustees therein mentioned:"

And, whereas, JOHN ROBINSON NICHOLSON, GEORGE COBLIN, and JAMES FOY, being three qualified Electors in the District under the said Act known as the TOWN OF ONEHUNGA Highway District, have made complaint to me that the Trustees of the said TOWN OF ONEHUNGA District have not levied a sufficient rate for the repairs of the public highways in such District during the current year:

And, whereas, moreover, the Provincial Engineer has reported to me that certain of such public highways are not in the state of repair required by the traffic on such highways:

Now, therefore, I, John Williamson, Superintendent of the Province of Auckland, aforesaid, acting in pursuance of the powers in me vested as aforesaid, do hereby levy a rate of HALF-A-PENNY in the pound upon the estimated value to sell of all the lands and tenements within the said TOWN OF ONEHUNGA District, to be assessed and payable in accordance with the provisions of the said Act.

Given under my hand, at Auckland,
this twentieth day of May, one
thousand eight hundred and
sixty-nine.

NOTICE TO MARINERS.

SNAG IN ENTRANCE TO BULLER RIVER.

Marine Department,
Wellington, 22nd April, 1869.

SINCE publication of the Notice to Mariners with reference to the Snag in the Fairway of the North Channel of the Buller River, dated the 7th of the present month, information has been received that the channel has worked farther to the north-east, so that the sailing directions then published are no longer correct.

Vessels entering in daylight must keep the Flagstaff and the Beacon carrying the red flag (which is only hoisted at tide time) in one; and failing this, they must be steered in close accordance with the directions of the semaphore arm at the Flagstaff.

As the channel shifts so rapidly, no directions can be given for entering by night; and only masters who are so thoroughly acquainted with the port and the local signals as to be able to take it without special directions, would be justified in attempting it.

JAMES M. BALFOUR,
Colonial Marine Engineer.

NOTICE TO MARINERS.

NEW LIGHTHOUSES IN COURSE OF ERECTION ON THE COASTS OF NEW ZEALAND.

Marine Department,
Wellington, 22nd April, 1869.

SEVERAL new Lighthouses being in course of erection in New Zealand, the following preliminary description of them is published for general information; more exact and detailed descriptions will be published when the works are more advanced.

It is anticipated that the lights will be ready for exhibition early in 1870.

JAMES M. BALFOUR,
Colonial Marine Engineer.

1.—Lighthouse on Farewell Spit, Cook Strait.

The lighthouse is to be erected in the immediate vicinity of "Bush End," on Farewell Spit, at the Western entrance to Cook Strait.

The light is intended to show all round, and is to be a REVOLVING WHITE LIGHT, of the second order dioptric, attaining its greatest brilliance *once a minute*.

Over the Spit end it is intended to make the light show RED instead of white as elsewhere, in order to caution mariners of their approach to that danger.

The light will be elevated above 120 feet above the sea level, and will be visible in clear weather about 17 nautic miles, allowing 15 feet for the height of the observer's eye, and at lesser distances according to the state of the atmosphere.

The tower is to be an open-framed structure of timber, and will be 118 feet in height from the ground to the top of the lantern.

2.—Lighthouse on Cape Campbell, Cook Strait.

The lighthouse will be erected on a knoll at the Northern extreme of the high land of Cape Campbell, on the South side of the Eastern entrance to Cook Strait.

The light will show all round where not intercepted by the land, and is to be a REVOLVING WHITE LIGHT of the second order dioptric, attaining its greatest brilliance *once a minute*.

The light will be elevated about 155 feet above the sea level, and will be visible in clear weather about 19 nautic miles, allowing 15 feet for the height of the observer's eye, and at lesser distances according to the state of the atmosphere.

The tower is to be an open-framed structure of timber, and will be 73 feet in height from the ground to the top of the lantern.

3. Lighthouse on Nugget Point Molyneux Bay.

The lighthouse is to be erected on a well-defined knoll, about 240 feet high, at the outer extremity of Nugget Point, the southern limit of Molyneux Bay (in 46° 27' South latitude, and 169° 51' East Longitude, as measured on the Admiralty chart.)

The light will show to seaward over an arc of about 225°, and will be a FIXED WHITE LIGHT of the first order dioptric.

The light will be elevated about 252 feet above the sea level, and will be visible in clear weather about 23 nautic miles, allowing 15 feet for the height of the observer's eye, and at lesser distances according to the state of the atmosphere.

The tower will be of stone, and painted to suit the background. It will be 31 feet in height from the ground to the top of the lantern.

4.—Temporary Light at Manukau Heads.

A small fifth order apparatus has been ordered from England, and will be erected on one of the beacons on the South Head of Manukau Harbour, on its arrival.

The light will be a FIXED WHITE LIGHT of moderate power, though from the great elevation of the land (about 500 feet), it may be seen, *in very exceptionally clear states of the atmosphere*, at a distance of nearly thirty nautic miles.

This light is only meant to benefit vessels accustomed to trade on the coast; it is not intended in any way to encourage vessels to attempt to enter Manukau Harbour during the night, nor is it meant to encourage strangers to approach the port.
