Greytown, 31st December, 1875.

SIR—I have the honor to forward the Annual Report for the Wairarapa and East Coast Districts for the year ending 31st December, 1875.

It will be seen that there are still nine flocks in the district that have not obtained clean certificates, although I believe several of them will prove clean when examined.

The scab is at present confined to the country in the neighborhood of Tu Puru Puru, and to Messrs. Sutherland's and Cameron's stations on the Pahau River.

There is nevertheless great danger of its spreading, notwithstanding the efforts being made to confine it within the boundaries mentioned.

The flock of native sheep at Mungahua were shorn and dipped under my own superintendence, but, owing to some misunderstanding with the natives, I gave up charge of the flock. Although a month had elapsed between the first dip and the second, I was told that there were only two lambs out of nearly 3000 sheep that showed any signs of scab.

I have been enabled to induce the natives at Long Bush to accept the assistance of some of their European neighbors. The Mungahua natives are also assisted by Europeans, so that the natives at both places have the assistance of Europeans, whose names are a positive guarantee that everything will be done that it is possible to do.

I have, &c.,

THOMAS TELFORD,

Inspector of Sheep, Wairarapa and East Coast.

Henry Bunny, Esq.,
Provincial Secretary, Wellington.

SHEEP INSPECTOR'S REPORT—*continued.*

Masterton, 13th January, 1876.

SIR—I have the honor to forward you my Report for the year ending 31st December, 1875.

Although the number of flocks infected with scab are very much less than last year, and even those that are infected are only so to a much slighter extent, still I very much regret that the Return shows so many flocks still infected.

Owing to the rough nature of many of the runs, on some of which there is a large proportion of bush, there is great difficulty in keeping the sheep clean, owing to the number of sheep that have taken to the bush at various times when scabby, and are frequently now coming out, and mixing with those already cleaned; but, as the sheep-owners have already erected a great deal of fencing, and are still erecting more, I trust that will have the effect of greatly reducing the list of infected runs by next year.

I have, &c.,

JOHN DRUMMOND,

Inspector of Sheep, East Coast District.

Henry Bunny, Esq.,

Provincial Secretary, Wellington.
